Contemporary Philosophy of Thought Michael Luntley, 1999-01-28 This lucid and engaging volume provides an introduction to the essential issues and concepts of contemporary analytic philosophy *Intentionality Deconstructed* Amir Horowitz, 2024 *Intentionality Deconstructed* An Anti Realist Theory argues for the view that there are and can be no intentional states We may put this view in terms of the truth of content ascriptions Content ascriptions in themselves cannot be true or false they lack truth conditions for the concept of intentionality is flawed Nonetheless content ascriptions have truth conditions and can be true or possess a related epistemic merit relative to practices of content ascription The suggested view does not deny the existence of those mental states standardly considered intentional notably the so called propositional attitudes it affirms it That is the book defends the existence of those states with the properties usually attributed to them but absent intentional properties Specifically it is argued that the so called propositional attitudes possess logico syntactic properties The postulation of such properties plays an important role in addressing the challenge of reconciling intentional anti realism with beliefs being true or having substitute epistemic merits the argument from the predictive and explanatory success of content ascription for intentional realism and the cognitive suicide objection to views that deny intentionality As part of the rejection of this final objection intentional anti realism is presented as a radical view which replaces traditional talk of content ascriptions with talk of quoted logico syntactic structures but which can yet give clear sense to its dispute with its rivals as well as to its own superiority On Thinking and the World Sandra M. Dingli, 2017-07-05 John McDowell's *Mind and World* has since its publication in 1994 become a seminal text putting forward many new ideas on the manner in which concepts mediate the relation between minds and the world Yet McDowell's ideas are not easy to comprehend In this book Sandra Dingli both elaborates and simplifies McDowell's ideas in order to give greater clarity to them and to assist in the understanding and appreciation of his work Dingli selects five particular contemporary philosophical topics which McDowell deals with and investigates in detail the implications of particular points of view analysing the current literature on each topic and drawing out shortcomings and possibilities for overcoming them This work is then both a critique and complement to McDowell's text McDowell's project is to dissolve a number of dualisms such as sensibility and understanding conceptual and non conceptual content scheme and content and reason and nature Dingli critically analyses each of these and claims that a proper understanding of the philosophical method of quietism is important for a correct understanding of this text concluding that McDowell does not go far enough in his attempt to attain peace for philosophy as traditional dichotomies such as that of realism and anti realism still appear to exert a grip on his thinking **A Companion to Philosophy of Law and Legal Theory** Dennis Patterson, 2010-01-15 The articles in this new edition of *A Companion to Philosophy of Law and Legal Theory* have been updated throughout and the addition of ten new articles ensures that the volume continues to offer the most up to date coverage of current thinking in legal philosophy

Represents the definitive handbook of philosophy of law and contemporary legal theory invaluable to anyone with an interest in legal philosophy. Now features ten entirely new articles covering the areas of risk regulatory theory, methodology, overcriminalization, intention, coercion, unjust enrichment, the rule of law, law and society, and Kantian legal philosophy. Essays are written by an international team of leading scholars.

**The Philosophy of Marjorie Grene** Randall E. Auxier, Lewis Edwin Hahn, 2002. Professor Grene is the 29th subject in a series that includes Albert Einstein, John Dewey, Jean Paul Sartre, and Bertrand Russell. This book includes photographs, 25 critical essays by Grene's distinguished peers, and her biting replies. She is known for her work and her controversial views in several areas including the philosophy of law, anthropology, and biology.

**Negative Natural Theology** Christopher J. Insole, 2024-11-21. How can we live in harmony with the universe and not just in it? What is it to feel at home in the world? Some thinkers who feel the force of these questions reach for the concept of God. Others do not. This book asks what might be at stake in the choice of whether or not to speak about God, not just in terms of abstract reasoning or arguments about God, but in relation to deeper undercurrents of motivation and yearning. The book is interested in sites in contemporary thinking where the concept of the divine beckons or looms, but also perhaps repels or hides. It asks what is at stake in the decision if it is that to talk about God and the divine or not to do so, with a wide and deep curiosity about what this might include: reasons and arguments, certainly, but also more biographical, intuitive, and affective dimensions including imagination and feelings about what is valuable. Also relevant are unconscious drives and factors. Concepts can convince or fail to convince, but also they can attract and repel. The book draws on both analytical and continental post-Kantian sources, treating individual thinkers such as Immanuel Kant, William James, Carl Jung, Karl Rahner, Albert Camus, Saul Kripke, Thomas Nagel, Derek Parfit, Karen Kilby, and Janet Soskice, as well as cultural movements such as modern paganism, new atheism, and humanism. Natural theology involves speaking about God without reference to revelation, tradition, or sources of authority, using the resources of reason alone. Negative theology is concerned with the way in which a type of abstract reasoning and rational argument run out without this necessarily being an ending; other types of speech and communication may become possible and essential. Speaking into this space, the book draws on philosophy, theology, anthropology, literature, and psychology.

**Transcending Boundaries in Philosophy and Theology** Kevin Vanhoozer, Martin Warner, 2016-02-24. Presenting new opportunities in the dialogue between philosophy and theology, this interdisciplinary text addresses the contemporary reshaping of intellectual boundaries. Exploring human experience in a post-Christian era, the distinguished contributors bring to bear what have been traditionally seen as theological resources while drawing on contemporary developments in philosophy, both continental and analytic. Set in the context of two complementary narratives, one philosophical concerning secularity, the other theological about the question of God, the authors point to ways of reconfiguring both traditional reason-faith oppositions and those between interpretation, text, and language experience.
