

Content Area Vocabulary Learning

By: [Douglas Fisher](#), [Nancy Frey](#)

Vocabulary lies at the heart of content learning. To support the development of vocabulary in the content areas, teachers need to give their students time to read widely, intentionally select words worthy of instruction, model their own word solving strategies, and provide students with opportunities to engage in collaborative conversations.

Vocabulary is a significant predictor of overall reading comprehension (Baumann, Kame'enui, & Ash, 2003) and student performance (Stahl & Fairbanks, 1986). When readers know a lot of words, they can read more complex texts. When writers know a lot of words, they can compose more sophisticated documents. For decades, the value of vocabulary was evident in content standards, and most states or provinces typically had a standard related to vocabulary.

This has changed with the Common Core State Standards for English Language Arts. Keep in mind that in elementary school, these standards speak to expectations in all content areas, not only the reading and language arts block. There are a total of 32 English language arts standards, and four of the standards (12.5%) focus explicitly on vocabulary.
