Contested Arctic Indigenous Peoples Industrial States And The Circumpolar Environment:

Contested Arctic Eric Alden Smith,Joan McCarter,1997 The Arctic may be the last frontier of colonialism where industrial societies are aggressively exploiting the resources and undermining the social cohesion of indigenous peoples In fact this colonization of the circumpolar north is only now reaching its full momentum Among the new conquistadores are oil company geologists loggers even resource biologists bringing not only industrial pollution but also cultural pollution in their wake For centuries the aboriginal Arctic population has efficiently used resources to meet modest human needs developing a special relationship to the land water and wildlife But at the intersection of national ambitions and arctic ecosystems native communities are being relentlessly squeezed between the ravages of resource extraction and the often naive agendas of environmentalists in urban centers far away This volume explores some of the major threats to the Arctic environment and indigenous peoples responses to these threats Case studies discuss the push for oil and gas development in Canada Alaska and Russia the toxic legacy of the former Soviet Union land tenure conflicts in Russia and wildlife management in Canada and Scandinavia CONTESTED ARCTIC (p) ,1997 **Contested Arctic** Eric Alden Smith,Joan McCarter,2015-08-17

Pathways to the Present Mansel G. Blackford, 2018-03-31 Ranging from the Hawaiian Archipelago to the Aleutian Islands from Silicon Valley to Guam Pathways to the Present is a thoroughly researched and concisely argued account of economic and environmental change in the postwar American Pacific Following a brief survey of the history of the Pacific the author takes the Hawaiian Islands as the center of American activities in the region and looks at interactions among native Hawaiian developmental military and environmental issues in the archipelago after World War II He then turns to land and water use problems that have intersected with more nebulous quality of life concerns to generate policy controversies in the Seattle region and the San Francisco Bay area especially Silicon Valley Economic expansion and environmentalism in Alaska are examined through the lens of changes occurring along the Aleutians From there the study considers Hiroshima after its destruction by the atomic bomb in 1945 looking at residents desire to combine urban planning concepts The author investigates the effort to remake Hiroshima as a high tech city in the 1990s an attempt inspired by the perceived success of Silicon Valley and postwar

planning on Okinawa where American influences were particularly strong The final chapter takes into account issues raised on Guam regarding the growth of tourism and the use of the island for military purposes and links these to developments in the Philippines to the west and American Samoa to the south *The Magdalenian Household* Ezra B. W. Zubrow, Françoise Audouze, James G. Enloe, 2010-09-17 What was home and family like in Paleolithic Europe How did mobile hunter gatherer families live work and play together in the fourteenth millennium BP What were the functional and spatial constraints and markers of their domesticity the processes that create and sustain a household Despite the long recognized absence of comprehensive archaeological data on such ancient homes and hearths the archaeologists in this volume begin unraveling the domesticity of the Upper Paleolithic by drawing on both an immense trove of new material evidence and comparative site data and a range of incisive and illuminating ethnographic analogies theoretical models and simulations Five Late Magdalenian sites from the Paris Basin and one later Azilian site provide striking evidence of well preserved camps of short duration situated on valley bottoms and buried by gentle floods Of particular interest and value is the site of Verberie rich in lithic tools faunal remains hearts and other indicators of spatial organization which has been excavated continuously for twenty six years by the same director and provides an unparalleled source of information on Paleolithic domesticity The first group of essays and reports look at the technology and demographic evidences of domesticity the second set seeks clues to the spatial patterning of Paleolithic households while the final essays draw on ethnographic analogies to reconstruct and interpret gendered divisions of labor perishable technologies and other activities not directly recognizable from archaeological remains *Journal of Small Business and Entrepreneurship*, 2006-01 *Reindeer Management in Northernmost Europe* Bruce C. Forbes, Manfred Bölter, Ludger Müller-Wille, Janne Hukkinen, Felix Müller, Nicolas Gunsley, Yulian Konstantinov, 2006-03-09 The findings presented in this volume represent a concerted effort to develop a more inclusive form of reindeer management for northernmost Europe Our guiding principle has been to foster a new paradigm of participatory research We wish to move beyond the historical reliance on western approaches to basic and applied science These have been concerned primarily with interactions between herded animals and the various components of their biophysical environment e g plants insects predators climate and others In our view sociocultural and economic drivers along with herders experience based knowledge gain equal currency in the effort to understand how management may mitigate against the negative aspects of the challenges modern herding faces while also exploring concepts of sustainability from different perspectives see also Jernsletten and Klov 2002 Kankaanpää et al 2002 Ulvevadet and Klov 2004 This broadening of the pool of disciplines and local national and international stakeholders in policy relevant research invariably complicates virtually all aspects of the research process Multidisciplinary or in our sense transdisciplinary approaches also require extraordinary effort from all participants if they are to succeed As such those approaches should not be undertaken lightly nor without personnel who possess appropriate experience in cooperating with those of different

disciplines and preferably also with relevant practitioners and public social and administrative institutions In such settings the potential for misunderstandings is quite high

Environmental Health Perspectives, 1997 *Self-Determination*

Terry Lee Anderson, Bruce L. Benson, Thomas Flanagan, 2006 This book compares and contrasts historical and contemporary Canadian and U S Native American policy The contributors include economists political scientists and lawyers who despite analyzing a number of different groups in several eras consistently take a political economy approach to the issues Using this framework the authors examine the evolution of property rights from wildlife in pre Columbian times and the potential for using property rights to resolve contemporary fish and wildlife issues to the importance of customs and culture to resource use decisions the competition from states for Native American casino revenues and the impact of sovereignty on economic development In each case the chapters present new data and new ways of thinking about old evidence In addition to providing a framework for analysis and new data this book suggests how Native American and First Nation policy might be reformed toward the end of sustainable economic development cultural integrity and self determination For these reasons the book should be of interest to scholars policy analysts and students of Native American law economics and resource use as well as those interested in the history of Native Americans and Canada s First Nations

Exploring Sustainable Development Martin Purvis, Alan Grainger, 2013-06-17 Sustainable development is capturing the attention of planners politicians and business leaders Within the academic sphere its study is increasingly breaching disciplinary boundaries to become a focus of attention for natural and social scientists alike But in studying such a key concept it is vital that there is a clear definition of what it means how it is applied on the ground and the influence it exerts upon people s perceptions of change in the physical environment economic activity and society Exploring Sustainable Development is a major new text which provides a multifaceted introduction to key areas of study in this field examining sustainability at the full range of spatial scales from the local to the global Building on existing theory it demonstrates the unique contributions that thinking geographically about space place and human environment relationships can bring to the analysis of sustainable development This book explores different interpretations of sustainable development in both theory and practice in developed and developing countries and in rural and urban areas It pays particular attention to the local national and international politics of implementation the future of climate and energy the role of business and different conceptions of agricultural sustainability This wide ranging text is ideal for undergraduates and postgraduates in geography environmental science development studies and related social and political sciences
