From Sovereign to Symbol Thomas Conlan, 2011-11-10 Fourteenth century Japan witnessed a fundamental political and intellectual conflict about the nature of power and society a conflict that was expressed through the rituals and institutions of two rival courts Rather than understanding the collapse of Japan's first warrior government the Kamakura bakufu and the onset of a chaotic period of civil war as the manipulation of rival courts by powerful warrior factions this study argues that the crucial ideological and intellectual conflict of the fourteenth century was between the conservative forces of ritual precedent and the ritual determinists steeped in Shingon Buddhism Members of the monastic nobility who came to dominate the court used the language of Buddhist ritual including incantations mantras gestures mudras and cosmograms mandalas projected onto the geography of Japan to uphold their bids for power Sacred places that were ritual centers became the targets of military capture precisely because they were ritual centers Ritual was not simply symbolic rather ritual became the orchestration or actual dynamic of power in itself This study undermines the conventional wisdom that Zen ideals linked to the samurai were responsible for the manner in which power was conceptualized in medieval Japan and instead argues that Shingon ritual specialists prolonged the conflict and enforced the new notion that loyal service trumped the merit of those who simply requested compensation for their acts Ultimately Shingon mimetic ideals enhanced warrior power and enabled Shogun Ashikaga Yoshimitsu rather than the reigning emperor to assert sovereign authority in Japan

[Zimbabwe's Fast Track Land Reform](#) Prosper B. Matondi, 2012-11-08 The Fast Track Land Reform Programme in Zimbabwe has emerged as a highly contested reform process both nationally and internationally The image of it has all too often been that of the widespread displacement and subsequent replacement of various people agricultural related production systems facets and processes The reality however is altogether more complex Providing new and much needed empirical research this in depth book examines how processes such as land acquisition allocation transitional production outcomes social life gender and tenure have influenced and been influenced by the forces driving the programme It also explores the ways in which the land reform programme has created a new agrarian structure based on small to medium scale farmers In attempting to resolve the problematic issues the reforms have raised the author argues that it is this new agrarian formation which provides the greatest scope for improving Zimbabwe's agriculture and development Based on a broader geographical scope than any previous study carried out on the subject this is a landmark work on a subject of considerable controversy
