## **Contesting The Boundaries Of Liberal And Professional Education The Syracuse Experiment:**

*Contesting the Boundaries of Liberal and Professional Education* Peter Marsh, 1988-06      Contesting the Boundaries of Liberal and Professional Education Peter Marsh, 1988-06-01      Shaping the College Curriculum Lisa R. Lattuca, Joan S. Stark, 2011-01-11

*Shaping the College Curriculum* focuses on curriculum development as an important decision making process in colleges and universities. The authors define curriculum as an academic plan developed in a historical social and political context. They identify eight curricular elements that are addressed intentionally or unintentionally in developing all college courses and programs. By exploring the interaction of these elements in context, they use the academic plan model to clarify the processes of course and program planning, enabling instructors and administrators to ask crucial questions about improving teaching and optimizing student learning. This revised edition continues to stress research-based educational practices. The new edition consolidates and focuses discussion of institutional and sociocultural factors that influence curricular decisions. All chapters have been updated with recent research findings relevant to curriculum leadership, accreditation assessment, and the influence of academic fields, while two new chapters focus directly on learning research and its implications for instructional practice. A new chapter drawn from research on organizational change provides practical guidance to assist faculty members and administrators who are engaged in extensive program improvements. Streamlined yet still comprehensive and detailed, this revised volume will continue to serve as an invaluable resource for individuals and groups whose work includes planning, designing, delivering, evaluating, and studying curricula in higher education. This is an extraordinary book that offers not a particular curriculum or structure but a comprehensive approach for thinking about the curriculum, ensuring that important considerations are not overlooked in its revision or development and increasing the likelihood that students will learn and develop in ways institutions hope they will. The book brings coherence and intention to what is typically an unstructured, haphazard, and only partially rational process guided more by beliefs than by empirically grounded substantive information. Lattuca and Stark present their material in ways that are accessible and applicable across planning levels: course, program, department, and institution, local settings, and academic disciplines. It is an admirable and informative marriage of scholarship and practice and an insightful guide to both. Anyone who cares seriously about how we can make our colleges and universities more educationally effective should read this book. Patrick T. Terenzini, distinguished professor and senior scientist, Center for the Study of Higher Education, The Pennsylvania State University.

**Syracuse Scholar**, 1990      Dialogic Education Ronald C. Arnett, 1993-01-06

*Examining undergraduate education from the point of view of a philosopher of communication*. Ronald C. Arnett takes a positive view of higher education during a time when education is being assailed as seldom before. Arnett responds to this criticism with convincing support of the academy, reinforced by his personal experiences as well as those of others: scholars and teachers. Arnett's book is an invitation to converse about higher education as well as a reminder of the potential for dialogue between teacher and student dialogue.

that the author defines as a willingness to enter conversation about ideas to maintain relationships through differences and to ask value questions Arnett sees education as more than the dispensing of information He emphasizes the importance of character development as well as the development of relationships between students and teachers Arnett stresses the importance of honesty and integrity in students teachers and administrators and he insists that education should focus more on the good of the entire school than on the individual Arnett does not offer this book as the truth about education nor as a how to teach manual Rather he regards it as an attempt to understand education from a communication perspective and as a reminder of the positive and constructive aspects of teaching The book is based on Arnett's belief that educators who care about ideas and people not only improve education but also benefit the community
