Contesting Globalization Space And Place In The World Economy:

Contesting Globalization André C. Drainville, 2004-07-31 Contesting Globalization makes an innovative and original addition to the literature on globalization examining the challenges faced by those wishing to develop progressive visions of transparent global governance and civil society This new study closely traces the history and development of the institutions of global governance The World Bank IMF WTO etc as well as the emergence of the anti globalization movement The author argues that we are at a unique moment where social forces have moved from national and international struggles to a global struggle and intervention in the world economy A series of case studies examine the ways in which cities have become contested sites for global struggles from the London dockworkers strikes of the nineteenth century to the recent demonstrations against the international financial institutions in Genoa Seattle and Washington

Contesting Globalization André C. Drainville, 2004 This work examines the challenges faced by those wishing to develop progressive visions of transparent global governance and civil society It traces the history and development of the institutions of global governance as well as the emergence of the anti globalization movement

Neoliberal Hegemony Dieter Plehwe, Bernhard J. A. Walpen, Gisela Neunhöffer, 2007-05-07 Neoliberalism is fast becoming the dominant ideology of our age yet politicians businessmen and academics rarely identify themselves with it and even political forces critical of it continue to carry out neoliberal policies around the globe How can we make sense of this paradox Who actually are the neoliberals This is the first explanation of neoliberal hegemony which systematically considers and analyzes the networks and organizations of around 1 000 self conscious neoliberal intellectuals organized in the Mont Plerin Society This book challenges simplistic understandings of neoliberalism It underlines the variety of neoliberal schools of thought the various approaches of its proponents in the fight for hegemony in research and policy development political and communication efforts and the well funded well coordinated and highly effective new types of knowledge organizations generated by the neoliberal movement partisan think tanks It also closes an important gap in the growing literature on private authority presenting new perspectives on transnational civil society formation processes This fascinating new book will be of great interest to students of international relations political economy globalization and politics

Global Environmental Politics Gabriela Kutting, 2010-09-13 Global Environmental Politics is the perfect introduction to this increasingly significant area The text combines an accessible introduction to the most important environmental theories and concepts with a series of detailed case studies of the most pressing environmental problems Features and benefits of the book Explains the most important concepts and theories in environmental politics Introduces environmental politics within the context of political science and international relations theories Demonstrates how the concepts and theories apply in a wide variety of real world contexts Case studies include the most important environmental issues from climate change and biodiversity to forests and marine pollution Each chapter is written by an established international authority in the field This exciting new textbook is essential

reading all students of environmental politics and will be of great interest to students of International Relations and Political Economy *Global Capitalism* Hugo Radice, 2014-08-01 The essays in this volume were published across the 1984-2011 period and range across a variety of topics and approaches to investigate the changing nature of global capitalism as a social order. As such, they are a valuable and instructive account of the evolution of global capitalism and of the debates which sought to make sense of this. Moreover, they enable us to understand more clearly how capitalism may change and evolve in the coming years and decades. The introduction provides a brief historical account of how global capitalism has changed since the 1960s, before summarising each of the essays, situating them more immediately in the context in which they were written. After sketching the evolution of his views over the period, the author concludes by discussing some important dimensions of global capitalism that need further study. The twelve essays are presented in four sections dealing with the overarching theme of globalisation, the case of Britain, the developing regions of the global South and the former Soviet bloc, and the crisis that has gripped global capitalism since 2008. Presenting an interdisciplinary approach that corresponds with the emergence of international political economy as a distinct field of scholarship, this book will prove to be an invaluable resource for students and scholars of international political economy, politics, economics, international relations, development studies, human geography, critical sociology, and business studies. **Global Civil Society and Transversal Hegemony**

Karen M. Buckley, 2013-05-29 There has been clear recognition of tendencies towards uncritically celebrating resistance and the need for critical appraisal within the literature on globalization and contestation. This book provides a conceptual history of global civil society and a critical examination of the politics of resistance in the global political economy. It uses a dialectical method of analysis to illustrate the conceptual stasis of mainstream approaches to questions of globalization and contestation, while demonstrating the potential of a Gramscian approach to reconstitute hegemony as a key analytical and explanatory tool. Buckley offers insight into the movements of transversal hegemony and existent and anticipated modes of social relation through the case studies of the World Social Forum and the World People's Conference on Climate Change. Offering a more comprehensive understanding of change in the global political economy, this book will be of interest to students and scholars of international political economy, globalization, global civil society, sociology, and the politics of resistance.

Global Standards of Market Civilization Brett Bowden, Leonard Seabrooke, 2006-10-03 *Global Standards of Market Civilization* brings together leading scholars representing a range of political views to investigate how global standards of market civilization have emerged, their justification, and their political, economic, and social impact. Key chapters show how, as the modern state system has evolved, such standards have also developed, incorporating the capacity for social cooperation and self-government to which states must conform in order to fully participate as legitimate members in international society. This study analyzes their justification and their political, economic, and social impact. Civilization is a term widely used within modern political discourse; its meaning, yet it is poorly understood and misused. Part I explores the idea of a standard of

civilization its implications for governance and the use of such standards in political theory and economic thought as well as its historical application part II presents original case studies that demonstrate the emergence of such standards and explore the diffusion of liberal capitalist ideas through the global political economy and the consequences for development and governance the International Monetary Fund s capacity to formulate a global standard of civilization in its reform programs and problems in the development of the global trade including the issue of intellectual property rights This book will be of strong interest to students and scholars in wide range of fields relating to the study of globalization including international political economy international political theory international relations theory comparative political economy international law historical sociology and economic history The Politics of European Competition Regulation Hubert Buch-Hansen,Angela Wigger,2011-03-07 Examines the political power struggles that have shaped the evolution of European competition regulation over the past six decades *A History of World Order and Resistance* Andre C. Drainville,2013-06-17 This book combines theory with history to look into a dozen episodes of struggle over the concrete and situated terms of world ordering and it finds reasons to think that the contemporary movement of movements against neo liberal globalization has deeper roots and a broader history than is usually recognized Informed by case studies from the US the UK France South Africa Algeria the Philippines and Jamaica *A History of World Order and Resistance* examines how men and women are sometimes subjectified by world ordering and how they sometimes make themselves true subjects of their own global history The author an expert on resistance to world ordering situates the contemporary movement of movements against neo liberal globalization in a broader historical framework to argue that resistance to world ordering has not only developed its very own unalienating mode of relation to the world economy but also sustained it over two hundred years without political mediation or representations Herein lies the heart of the on going world revolution against capital The book concludes with a radical polemic against the political organization of the multitude *A History of World Order and Resistance* will be of interest to students and scholars of political theory international political economy and globalization *Governing International Labour Migration* Christina Gabriel,Hélène Pellerin,2012-08-21 This book offers a critical examination of the way in which the nature and governance of international labour migration is changing within a globalizing environment It examines how labour mobility and the governance of labour migration are changing by exploring the links between political economy and differentiated forms of labour migration Additionally it considers the effects of new social models of inclusion and exclusion on labour migration Therefore the book troubles the conventional dichotomies and categorizations permanent vs temporary skilled vs unskilled legal vs illegal that have informed migration studies and regulatory frameworks Theoretically this volume contributes to an ongoing project of reframing the study of migration within politics and international relations Bringing together an interdisciplinary group of scholars drawing on examples from the European Union North America and Asia *Governing International Labour Migration* will be of interest to students and scholars of migration studies IPE international

relations and economics Global Citizenship and the Legacy of Empire April Biccum, 2012-08-06 This book investigates the parallels between mainstream development discourse and colonial discourse as theorized in the work of Homi Bhabha Gayatri Spivak and Edward Said Aiming to repoliticize post colonial theory by applying its understandings to contemporary political discourses author April Biccum critically examines the ways in which development in its current form has recently begun to be promoted among the metropolitan public Biccum contends that what has begun is a sustained marketing campaign for development that is a repetition augmentation and ultimately much greater success of the work of the Empire Marketing Board of 1926 Demonstrating how this marketing campaign for development attempts to facilitate support for neo liberal globalization Biccum contends that this theatre of legitimation is emerging in response to growing critical voices and counter hegemonic activity on the international stage Featuring in depth analyses of the UK cultural values DfID the commemoration of the slave trade and campaigns including Live8 and Make Poverty History this book will be of interest to students and scholars of postcolonial studies development studies and international political economy It will also offer insights valuable to a wider range of subjects including critical theory and globalization studies *African Youth Cultures in a Globalized World* Paul Ugor, Lord Mawuko-Yevugah, 2016-03-09 All over the world there is growing concern about the ramifications of globalization late modernity and general global social and economic restructuring on the lives and futures of young people Bringing together a wide body of research to reflect on youth responses to social change in Africa this volume shows that while young people in the region face extraordinary social challenges in their everyday lives they also continue to devise unique ways to reinvent their difficult circumstances and prosper in the midst of seismic global and local social changes Contributors from Africa and around the world cover a wide range of topics on African youth cultures exploring the lives of young people not necessarily as victims but as active social players in the face of a shifting late modernist civilization With empirical cases and varied theoretical approaches the book offers a timely scholarly contribution to debates around globalization and its implications and impacts for Africa s youth *The Idea of Global Civil Society* Randall Germain, Michael Kenny, 2004-08-02 This volume deepens our understanding of the normative tensions central to the way in which governance is changing under globalization and illuminates the political realities which governance confronts The Southern Cone Model Nicola Phillips, 2004-08-02 Developing an original blend of perspectives from the fields of international and comparative political economy this book presents an innovative and in depth account of the contemporary political economy of the southern cone of Latin America Argentina Brazil Chile Paraguay and Uruguay It identifies a new and distinctive model of regional capitalist development emerging in the southern cone and a complex relationship with both the global political economy and the five distinctive national political economies in the region Ranging across the contours of labour business states and regionalist processes Phillips assesses the significance of the Southern Cone Model for the ways in which we understand contemporary capitalist development at both national and transnational levels **The Political Economy of**

European Employment Henk Overbeek, 2004-11-23 This edited collection examines unemployment in Europe in the context of globalisation the implementation of European Monetary Union and the Eastern enlargement of the EU It combines theoretical chapters with detailed case studies of Britain The Netherlands Italy Spain and Central Europe

Transnational Financial Regulation after the Crisis Tony Porter, 2014-02-05 The global financial crisis that began in 2007 was the most destructive since the 1930s The rapid spread of the crisis across borders and the complexity of these cross border linkages highlighted the importance for authorities of working together in responding to the crisis This book examines the transnational response that relied heavily on a set of relatively informal transnational regulatory groupings that had been constructed over previous decades During the crisis these arrangements were made stronger and more inclusive but they remain very complex Thousands of pages of new rules have been created by various transnational bodies and the implementation of these rules relies heavily on domestic law and regulation and private rules and practices This book analyses this complex response showing that its overly technical and incremental character the persistence of tensions between transnational processes and state centred politics and the ongoing power of private actors have made the regulatory response fall short of what is needed Transnational Financial Regulation after the Crisis provides new insights that are relevant for theory and practice not only for transnational financial regulation but for global governance more generally

Variegated Neoliberalism Huw Macartney, 2010-12-15 Variegated Neoliberalism provides comparative analyses of global and European banking communities and economic research centres in the UK France and Germany It explains the current neoliberal order in global finance and the realms of possibility for challenges to it

The Making of Modern Finance Samuel Knafo, 2013-07-03 The Making of Modern Finance is a path breaking study of the construction of liberal financial governance and demonstrates how complex forms of control by the state profoundly transformed the nature of modern finance Challenging dominant theoretical conceptions of liberal financial governance in international political economy this book argues that liberal economic governance is too often perceived as a passive form of governance It situates the gold standard in relation to practices of monetary governance which preceded it tracing the evolution of monetary governance from the late middle Ages to show how the 19th century gold standard transformed the way states relate to finance More specifically Knafo demonstrates that the institutions of the gold standard helped to put in place instruments of modern monetary policy that are usually associated with central banking and argues that the gold standard was a prelude to Keynesian policies rather than its antithesis The author reveals that these state interventions played a vital role in the rise of modern financial techniques which emerged in the late 18th and 19th century and served as the foundation for contemporary financial systems This book will be of strong interest to students and scholars of international political economy economic history and historical sociology It will appeal to those interested in monetary and financial history the modern state liberal governance and varieties of capitalism

The Political Economy of Global Capitalism and Crisis Bill Dunn, 2014-03-21 The

book provides a theoretically and historically informed analysis of the global economic crisis It makes original contributions to theories of value of crisis and of the state and uses these to develop a rich empirical study of the changing character of capitalism in the twentieth century and beyond It defends uses and develops Marxist theory while arguing particularly against jumping too quickly from abstract concepts to a concrete understanding of the crisis Instead it uses what Marx described in his notebooks as an obvious analytical ordering to progress from a general analysis of economy and society to a discussion of recent economic transformations and the specifics of the crisis and its aftermath Dunn argues that appropriately reconceived a critical Marxism can incorporate and enrich rather than rejecting insights from other traditions He disputes general characterisations of capitalism to the crisis and theories which see finance and the contemporary financial crises as largely detached from other aspects of the economy and society Providing a thoroughly socialised and historically based account this book will be vital reading for students and scholars of political economy international political economy Marxism sociology geography and development studies

Asymmetric Crisis in Europe and Possible Futures
Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics
