Context Of A Late Neandertal:

Context of a Late Neandertal Leveque, Anna Mary Backer, Michel Guilbaud, 1993 Reassessing Paleolithic Subsistence Eugène Morin, 2012-03-19 Contributes to the debate about modern human origins by exploring the diets and foraging patterns of both Neandertals and early modern humans Neandertals and Modern Humans in Western Asia Takeru Akazawa, Kenichi Aoki, Ofer Bar-Yosef, 2005-12-27 In this fascinating volume the Middle Paleolithic archaeology of the Middle East is brought to the current debate on the origins of modern humans These collected papers gather the most up to date archaeological discoveries of Western Asia a region that is often overshadowed by African or European findings but the only region in the world where both Neandertal and early modern human fossils have been found The collection includes reports on such well known cave sites as Kebara Hayonim and Qafzeh among others The information and interpretations available here are a must for any serious researcher or student of anthropology or human evolution **The Neanderthal Legacy** Paul A. Mellars, 2015-07-28 The Neanderthals populated western Europe from nearly 250 000 to 30 000 years ago when they disappeared from the archaeological record In turn populations of anatomically modern humans *Homo sapiens* came to dominate the area Seeking to understand the nature of this replacement which has become a hotly debated issue Paul Mellars brings together an unprecedented amount of information on the behavior of Neanderthals His comprehensive overview ranges from the evidence of tool manufacture and related patterns of lithic technology through the issues of subsistence and settlement patterns to the more controversial evidence for social organization cognition and intelligence Mellars argues that previous attempts to characterize Neanderthal behavior as either modern or ape like are both overstatements We can better comprehend the replacement of Neanderthals he maintains by concentrating on the social and demographic structure of Neanderthal populations and on their specific adaptations to the harsh ecological conditions of the last glaciation Mellars s approach to these issues is grounded firmly in his archaeological evidence He illustrates the implications of these findings by drawing from the methods of comparative socioecology primate studies and Pleistocene paleoecology The book provides a detailed review of the climatic and environmental background to Neanderthal occupation in Europe and of the currently topical issues of the behavioral and biological transition from Neanderthal to fully modern populations *Dynamics of Learning in Neanderthals and Modern Humans Volume 1* Takeru Akazawa, Yoshihiro Nishiaki, Kenichi Aoki, 2013-12-16 This volume presents the first of two proceedings from the International Conference on the Replacement of Neanderthals by Modern Humans which took place in Tokyo in November 2012 Focussing on a highly innovative working hypothesis called the learning hypothesis which attempts to explain the replacement as a result of differences in the learning abilities of these two hominid populations the conference served as the latest multidisciplinary discussion forum on this intriguing Palaeoanthropological issue The present volume reports on outcomes of the conference in three major sections Part 1 provides an archaeological overview of the processes of replacement assimilation of Neanderthals

by modern humans Part 2 consists of archaeological and ethnographic case studies exploring evidence of learning behaviours in prehistoric and modern hunter gatherer societies Part 3 presents a collection of papers that directly contributes to the definition validation and testing of the learning hypothesis in terms of population biology and evolutionary theory A total of 18 papers in this volume make available to readers unique cultural perspectives on mechanisms of the replacement assimilation of Neanderthals by modern humans and suggested relationships between these mechanisms and different learning strategies

Sourcebook of Paleolithic Transitions Marta Camps, Parth Chauhan, 2009-09-01 As the study of Palaeolithic technologies moves towards a more analytical approach it is necessary to determine a consistent procedural framework The contributions to this timely and comprehensive volume do just that This volume incorporates a broad chronological and geographical range of Palaeolithic material from the Lower to Upper Palaeolithic The focus of this volume is to provide an analysis of Palaeolithic technologies from a quantitative empirical perspective As new techniques particularly quantitative methods for analyzing Palaeolithic technologies gain popularity this work provides case studies particularly showcasing these new techniques Employing diverse case studies and utilizing multivariate approaches morphometrics model based approaches phylogenetics cultural transmission studies and experimentation this volume provides insights from international contributors at the forefront of recent methodological advances

Continuity and Discontinuity in the Peopling of Europe Silvana Condemi, Gerd-Christian Weniger, 2011-03-23 Since the Western world first became aware of the existence of Neanderthals this Pleistocene human has been a regular focus of interest among specialists and also among the general public In fact we know far more about Neanderthals than we do about any other extinct human population Furthermore over the past 150 years no other palaeospecies has been such a constant source of discussion and fierce debate among palaeoanthropologists and archaeologists This book presents the status of our knowledge as well as the methods and techniques used to study this extinct population and it suggests perspectives for future research

The Origins of Modern Humans Fred H. Smith, James C. Ahern, 2013-07-09 This update to the award winning *The Origins of Modern Humans* A World Survey of the Fossil Evidence covers the most accepted common theories concerning the emergence of modern *Homo sapiens* adding fresh insight from top young scholars on the key new discoveries of the past 25 years *The Origins of Modern Humans* Biology Reconsidered allows field leaders to discuss and assess the assemblage of hominid fossil material in each region of the world during the Pleistocene epoch It features new fossil and molecular evidence such as the evolutionary inferences drawn from

assessments of modern humans and large segments of the Neandertal genome It also addresses the impact of digital imagery and the more sophisticated morphometrics that have entered the analytical fray since 1984 Beginning with a thoughtful introduction by the authors on modern human origins the book offers such insightful chapter contributions as Africa The Cradle of Modern People Crossroads of the Old World Late Hominin Evolution in Western Asia A River Runs through It Modern Human Origins in East Asia Perspectives on the Origins of Modern Australians Modern Human Origins in Central Europe The Makers of the Early Upper Paleolithic in Western Eurasia Neandertal Craniofacial Growth and Development and Its Relevance for Modern Human Origins Energetics and the Origin of Modern Humans Understanding Human Cranial Variation in Light of Modern Human Origins The Relevance of Archaic Genomes to Modern Human Origins The Process of Modern Human Origins The Evolutionary and Demographic Changes Giving Rise to Modern Humans The Paleobiology of Modern Human Emergence Elegant and thought provoking *The Origins of Modern Humans Biology Reconsidered* is an ideal read for students grad students and professionals in human evolution and paleoanthropology

Neandertal Lithic Industries at La Quina Arthur J. Jelinek, 2013-04-18 Although Neandertals lived in Europe and western Asia for more than 200 000 years we know surprisingly little about them or about their everyday lives Evidence of their behavior is largely derived from the surviving pieces of chipped stone and animal bone that resulted from their activities One of the largest concentrations of stone and bone artifacts left by Neandertals was at the famous archaeological site of La Quina in southwestern France This study of the significance of changes through time revealed by an analysis of the chipped stone at La Quina reports on the excavations of the Cooperative American French Excavation Project from 1985 to 1994 It moves beyond the largely descriptive and subjective approaches that have traditionally been applied to this kind of evidence and applies several important quantitative analytical techniques These new approaches incorporate the history of previous excavations at the site the results of the work of the Cooperative Project and the most recent scientific understanding of relevant climatic changes This is a major contribution to our understanding of Neandertal behavior and industry It adds new dimensions and perspectives based on innovative techniques of analysis The analytic methods applied to lithic artifacts that form the heart of the book are the product of considerations about how to best interpret a sequence of multiple contextual samples The author concludes the book with an extraordinarily useful chapter that places his findings into the larger context of our contemporary knowledge of Neandertal life in the region The book comes with a compact disc which includes coded observations used in the analysis in as many as 47 data fields for the more than 11 500 artifacts that will allow professionals and students to further explore the collection of lithic artifacts

Begun, 2012-12-20 A Companion to Paleoanthropology presents a compendium of readings from leading scholars in the field that define our current knowledge of the major discoveries and developments in human origins and human evolution tracing the fossil record from primate and hominid origins to the dispersal of modern humans across the globe Represents an accessible state of the art summary of the entire field of paleoanthropology with an overview of hominid taxonomy Features articles on the key discoveries in ape and human evolution in cranial postcranial and brain evolution growth and development Surveys the breadth of the paleontological record from primate origins to modern humans Highlights the unique methods and techniques of paleoanthropology including dating and ecological methods and use of living primate data to reconstruct behavior in fossil apes and humans

Processes in Human Evolution Francisco José Ayala, Camilo José Cela Conde, 2017 The discoveries of the last decade have brought about a completely revised understanding of human evolution due to the recent advances in genetics palaeontology ecology archaeology geography and climate science Written by two leading authorities in the fields of physical anthropology and molecular evolution Processes in Human Evolution presents a reconsidered overview of hominid evolution synthesising data and approaches from a range of inter disciplinary fields The authors pay particular attention to population migrations since these are crucial in understanding the origin and dispersion of the different genera and species in each continent and to the emergence of the lithic cultures and their impact on the evolution of cognitive capacities Processes in Human Evolution is intended as a primary textbook for university courses on human evolution and may also be used as supplementary reading in advanced undergraduate and graduate courses It is also suitable for a more general audience seeking a readable but up to date and inclusive treatment of human origins and evolution

Archaeologies of the Heart Kisha Supernant, Jane Eva Baxter, Natasha Lyons, Sonya Atalay, 2020-02-13 Archaeological practice is currently shifting in response to feminist indigenous activist community based and anarchic critiques of how archaeology is practiced and how science is used to interpret the past lives of people Inspired by the calls for a different way of doing archaeology this volume presents a case here for a heart centered archaeological practice Heart centered practice emerged in care based disciplines such as nursing and various forms of therapy as a way to recognize the importance of caring for those on whom we work and as an avenue to explore how our interactions with others impacts our own emotions and heart Archaeologists are disciplined to separate mind and heart a division which harkens back to the origins of western thought The dualism between the mental and the physical is fundamental to the concept that humans can objectively study the world without being immersed in it Scientific approaches to understanding the world assume there is an objective world to be studied and that humans must

remove themselves from that world in order to find the truth An archaeology of the heart rejects this dualism rather we see mind body heart and spirit as inextricable An archaeology of the heart provides a new space for thinking through an integrated responsible and grounded archaeology where there is care for the living and the dead acknowledges the need to build responsible relationships with communities and with the archaeological record and emphasize the role of rigor in how work and research is conducted The contributions bring together archaeological practitioners from across the globe in different contexts to explore how heart centered practice can impact archaeological theory methodology and research throughout the discipline
