The English Catalogue of Books Published from January, 1835, to January, 1863, 1864 Resilient Operation of Distribution Grids with Distributed-Hierarchical Architecture Elisabeth Drayer, 2018-11-20 This thesis is about the design and the implementation of a resilient grid operation for the distribution grid This research question is induced by the advancing of three trends Decarbonisation decentralisation and digitalisation These three trends transform the hitherto passive distribution grid into an active system that contains an active operation The term resilience describes capabilities of the system to absorb to adapt and to recover from faults and disturbances This concept is realised on the one hand with the choice of the operation architecture on the other hand for the choice of possible methods and functions This thesis develops a distributed hierarchical operation architecture For this architecture several methods have been developed that optimally benefit from the operation architecture and that allow the fully automated operation of the distribution grid For that purpose a heuristic optimisation has been developed to solve problems like voltage profile violations and congestions Another important method especially with regard to resilience is the self healing capability to resupply clients after permanent faults

Birmingham free libraries. Catalogue of the reference department John Davis Mullins, 1869 **Medieval Art, Architecture and Archaeology in the Dioceses of Aberdeen and Moray** Jane Geddes, 2016-04-14 Exploring the medieval heritage of Aberdeenshire and Moray the essays in this volume contain insights and recent work presented at the British Archaeological Association Conference of 2014 based at Aberdeen University The opening historical chapters establish the political economic and administrative context of the region looking at both the secular and religious worlds and include an

examination of Elgin Cathedral and the bishops palaces The discoveries at the excavations of the kirk of St Nicholas which have revealed the early origins of religious life in Aberdeen city are summarized and subsequent papers consider the role of patronage Patronage is explored in terms of architecture the dramas of the Reformation and its aftermath highlighted through essentially humble parish churches assailed by turbulent events and personalities The collegiate church at Cullen particularly its tomb sculpture provides an unusually detailed view of the spiritual and dynastic needs of its patrons The decoration of spectacular ceilings both carved and painted at St Machar s Cathedral Provost Skene s House and Crathes Castle are surveyed through the eyes of their patrons and the viewers below Saints and religious devotion feature in the last four chapters focusing on the carved wooden panels from Fetteresso which display both piety and a rare glimpse of Scottish medieval carnal humour the illuminated manuscripts from Arbuthnott the Aberdeen Breviary and Historia Gentis Scotorum The medieval artistic culture of north east Scotland is both battered by time and relatively little known With discerning interpretation this volume shows that much high quality material still survives while the lavish illustrations restore some glamour to this lost medieval world *The Battle of the Styles* Bernard Porter,2011-03-17 The present day Foreign Office in Whitehall is an imposing building whose genesis is bizarre In 1857 a competition was held to pick an architect which provoked a huge row between the rival Classical and Gothic schools which a Goth George Gilbert Scott won but was then forced to re design in Classical The circumstances surrounding this fiasco furnish the starting point for this book which then goes on to analyse the debate that preceded this decision for the light it sheds on the complex nature of British culture and society then Among issues raise were contemporary and conflicting understandings of Britain s or England s national and imperial identities of religion and morality of history modernity and progress and of class and gender The debate offers an unusual insight into the relationship between all these matters and high culture generally This account of it should be of great value to cultural and social historians as well as to any architectural historians interested in the broader historical context surrounding this and other great monuments of the time Transgressive Design Strategies for Utopian Cities Bertug Ozarisoy,Hasim Altan,2023-03-24 This book critically examines the philosophy of the term transgression and how it shapes the utopian vision of contemporary urban design scenarios The aim of this book is to provide scholarly yet accessible graphic novel illustrations to inform narratives of urban manifestos Through four select case studies from the UK Cyprus and Germany the book highlights the paradoxes and contradictions in architecture and provides detailed evaluation of the limits and contemporary forms of sustainable urban regeneration The book proposes an utopian urban vision approach to social political and cultural relations trends and tensions both locally and globally and seeks to inspire an awakening in architectural discourse The book argues that the philosophical undermining of transgression is the result of a phenomenon from a different perspective its philosophical background social construction experimental research process and design implications on the city As such the book provides a critical examination of how architectural design interventions contribute

to sustainable urban regeneration and gentrification and can impact local communities This book provides a significant contribution to both undergraduate and postgraduate students as well as early career researchers working in architecture planning and sustainable urban design It offers effective guidance on adopting the state of the art graphical illustrations into their own design projects while considering contradictions between architectural discourse and the philosophy of transgression
