language therapists and podiatrists *Handbook of Adult Development and Learning* Carol Hoare, 2006-03-30 Adult development and learning have always existed as two separate fields of study with development falling under psychology and learning under education. Recent advances in theory, research and practice, however, have made it clear that an important reciprocal relationship exists between them: advances in development frequently lead to learning and conversely learning quite often fuels development. The synchronicity between development and learning is responsible for positive changes in many capacities including insight, intelligence, reflective and meta-cognition, personality expression, interpersonal competence and self-efficacy. This synchronicity is also leading to the growth of a new discipline at the borders of adult development and learning. The *Handbook of Adult Development and Learning* is the first to bring together the leading scholars from both adult development and learning to explore what will form the foundation for this new discipline, the latest research at the intersection of these fields. It examines six major aspects of their intersection: foundations, key areas of integration, the self-system, higher reaches of development and learning, essential contexts and specific applications. An introductory chapter explains why it is so important to recognize and fuel the growth of this new discipline. Subsequent chapters review the latest theoretical and empirical literature and provide a rich itinerary for future research. This handbook is a must-read for all who promote optimal aging. It will be an invaluable reference for scholars in development and education as well as a rich resource for policy makers and practitioners such as corporate executives and human resource personnel. [Clinical Psychology Reflections](#) Connor Whiteley, Perfect for university psychology students and clinical psychologists alike.
