Continuities In Polands Permanent Transition:

Continuities in Poland's Permanent Transition H. Wydra, 2001-02-02 This book examines change in post 1989 Poland by linking it analytically to the continuity of Poland's past. It argues that the first reality of objective institutional change is underpinned by the continuity of second realities. Based on an interdisciplinary analysis of the Polish case, this study proposes a new conceptual framework for the study of transitional societies and revises standard assumptions in transitology and democratization studies.

Communism and the Emergence of Democracy Harald Wydra, 2007-02-08 Before democracy becomes an institutionalised form of political authority, the rupture with authoritarian forms of power causes deep uncertainty about power and outcomes. This book connects the study of democratisation in eastern Europe and Russia to the emergence and crisis of communism. Wydra argues that the communist past is not simply a legacy but needs to be seen as a social organism in gestation where critical events produce new expectations, memories and symbols that influence meanings of democracy. By examining a series of pivotal historical events, he shows that democratisation is not just a matter of institutional design but rather a matter of consciousness and leadership under conditions of extreme and traumatic incivility. Rather than adopting the opposition between non democratic and democratic, Wydra argues that the communist experience must be central to the study of the emergence and nature of democracy in post communist countries. Poland's EU

Accession Sergiusz Trzeciak, 2018-01-12 This book examines the process of Poland's accession negotiations to the European Union between 1998-2003. An empirical study based on Robert Putnam's two level game model, it charts the influence and role of key domestic actors and groups on the negotiations, especially in three critical controversial areas: areas where EU accession threatened to bring about a profound transformation to Polish life, agriculture with particular emphasis on direct payments and production quotas, the purchase of real estate by foreigners and the free movement of labour. This book demonstrates the complex interaction between the domestic and international level of negotiations and furthermore shows how critical this link can be to negotiation outcomes at the international level. It reveals how susceptible Poland's negotiation process was to domestic pressure, particularly public opinion and interest groups. Drawing heavily on qualitative analysis such as press releases, news wires, policy documents as well as quantitative analyses such as the use of opinion polls and supported by in depth unrestricted interviews with key Polish decision makers, this book examines the dynamics of policy formation in Poland and shows how this translated into the final conditions of accession. **Politics in Europe** M. Spring Will Be Ours Andrzej Paczkowski, 2010-11-01 The Spring Will Be Ours focuses on the turbulent half century from the outbreak of World War II in 1939 which started the chain of events that would lead to the communist takeover of Poland to 1989 when futile attempts to reform the communist system gave way to its total transformation Andrzej Paczkowski shows how the communists captured and consolidated power describes their use of terror and propaganda and illuminates the changes that took place within the governing elite He also documents the political opposition to the regime both inside Poland and abroad that resulted in upheavals in 1956 1968 1970 1976 and 1980 His narrative makes evident the pressures that the elite felt from above from Moscow and from below from the population and from within the party The history of Poland and the Poles is of special interest because on numerous occasions in the twentieth century this relatively small country influenced developments on a global scale

Constructing the Limits of Europe Rumena Filipova, 2022-04-30 This comparative study harks back to the revolutionary year of 1989 and asks two critical questions about the resulting reconfiguration of Europe in the aftermath of the collapse of communism Why did Central and East European states display such divergent outcomes of their socio political transitions Why did three of those states Poland Bulgaria and Russia differ so starkly in terms of the pace and extent of their integration into Europe Rumena Filipova argues that Poland s Bulgaria s and Russia s dominating conceptions of national identity have principally shaped these countries foreign policy behavior after 1989 Such an explanation of these three nations diverging degrees of Europeanization stands in contrast to institutionalist rationalist interest based accounts of democratic transition and international integration in post communist Europe She thereby makes a case for the need to include ideational factors into the study of International Relations and demonstrates that identities are not easily malleable and may not be as fluid as often assumed She proposes a theoretical middle ground argument that calls for qualified post positivism as an integrated perspective that combines positivist and post positivist orientations in the study of IR

Dunn, 2024-07-01 This edited volume situates Ren Girard in relation to the Western philosophical tradition Each chapter engages the French anthropologist in dialogue with a key figure from the history of Western philosophy from Plato to Kierkegaard The pivotal question of Ren Girard and the Western Philosophical Tradition revolves around Girard s assertion Since the attempt to understand religion on the basis of philosophy has failed we ought to try the reverse method and read philosophy in the light of religion Major philosophers influenced Girard and contributed valuable insights into questions of desire religion violence and the sacred At the same time he felt that Western philosophy often if not always neglected the founding violence that lies at the origin of culture This is the first collective scholarly effort at situating Ren Girard in relation to the Western philosophical tradition Volume 1 features chapters on Plato Augustine of Hippo Niccol Machiavelli Thomas Hobbes Blaise Pascal Baruch Spinoza Jean Jacques Rousseau Adam Smith Immanuel Kant Georg Wilhelm Friedrich Hegel Friedrich Wilhelm Joseph Schelling Alexis de Tocqueville S ren Kierkegaard and Ren Girard **Handbook of Contemporary European Social Theory** Gerard Delanty, 2006-09-27 This innovative publication maps out the broad and interdisciplinary field of contemporary European social theory It covers sociological theory the wider theoretical traditions in the social sciences including cultural and political theory anthropological theory social philosophy and social thought in the broadest sense of the term This volume surveys the classical heritage the major national traditions and the fate of social theory in a post national and post disciplinary era It also identifies what is distinctive about European social theory in terms of themes and traditions It is divided into five parts disciplinary traditions national traditions major schools key themes and the reception of European social theory in American and Asia Thirty five contributors from nineteen countries across Europe Russia the Americas and Asian Pacific have been commissioned to utilize the most up to date research available to provide a critical international analysis of their area of expertise Overall this is an indispensable book for students teachers and researchers in sociology cultural studies politics philosophy and human geography and will set the tone for future research in the social sciences

Novels and the Sociology of the Contemporary Arpad Szokolczai, 2016-04-14 This book substantiates two claims First the modern world was not simply produced by objective factors rooted in geographical discoveries and scientific inventions to be traced to economic technological or political factors but is the outcome of social cultural and spiritual processes Among such factors beyond the Protestant ethic Max Weber the rise of the absolutist state and its disciplinary network Michel Foucault or court society Norbert Elias a prime role is played by theatre The modern reality is deeply theatricalized Second a special access for studying this theatricalized world is offered by novels The best classical novels not simply can be interpreted as describing a world like the theatre but they capture and present a world that has become thoroughly transformed into a global theatre The theatre effectively transformed the world and classical novels effectively analyze this theatricalized reality

much better than the main instruments supposedly destined to study reality philosophy and sociology Thus instead of using the technique of sociology to analyze novels the book will treat novels as a royal road to analyze a theatricalized reality in order to find our way back to a genuine and meaningful life
