American Artists Engage the Built Environment, 1960-1979 Susanneh Bieber, 2023-07-31 This volume reframes the development of US American avant garde art of the long 1960s from minimal and pop art to land art conceptual art site specific practices and feminist art in the context of contemporary architectural discourses Susanneh Bieber analyzes the work of seven major artists Donald Judd Robert Grosvenor Claes Oldenburg Robert Smithson Lawrence Weiner Gordon Matta Clark and Mary Miss who were closely associated with the formal aesthetic innovations of the period While these individual artists came to represent diverse movements Bieber argues that all of them were attracted to the field of architecture the work of architects engineers preservationists landscape designers and urban planners because they believed these practices more directly shaped the social and material spaces of everyday life This book's contribution to the field of art history is thus twofold First it shows that the avant garde of the long 1960s did not simply develop according to an internal logic of art but also as part of broader sociocultural discourses about buildings and cities Second it exemplifies a methodological synthesis between social art history and poststructural formalism that is foundational to understanding the role of art in the construction of a more just and egalitarian society The book will be of interest to scholars working in art history architecture urbanism and environmental humanism

When Race Trumps Merit Heather Mac Donald, 2023-04-18 Does your workplace have too few black people in top jobs It's racist Does the advanced math and science high school in your city have too many Asians It's racist Does your local museum employ too many white women It's racist too After the Black Lives Matter protests of 2020 prestigious American institutions from the medical profession to the fine arts pleaded guilty to systemic racism How else explain why blacks are overrepresented in prisons and underrepresented in C suites and faculty lounges their leaders asked The official answer for those disparities is disparate impact a once obscure legal theory that is now transforming our world Any traditional standard of behavior or achievement that impedes exact racial proportionality in any

enterprise is now presumed racist Medical school admissions tests expectations of scientific accomplishment in the award of research grants the enforcement of the criminal law all are under assault because they have a disparate impact on underrepresented minorities When Race Trumps Merit provides an alternative explanation for those racial disparities It is large academic skills gaps that cause the lack of proportional representation in our most meritocratic organizations and large differences in criminal offending that account for the racially disproportionate prison population The need for such a corrective argument could not be more urgent Federal science agencies now treat researchers skin color as a scientific qualification Museums and orchestras choose which art and music to promote based on race Police officers avoid making arrests and prosecutors decline to bring charges to avoid disparate impact on minority criminals When Race Trumps Merit breaks powerful taboos But it is driven by a sense of alarm supported by detailed case studies of how disparate impact thinking is jeopardizing scientific progress destroying public order and poisoning the appreciation of art and culture As long as alleged racism remains the only allowable explanation for racial differences we will continue tearing down excellence and putting lives as well as civilizational achievement at risk Four Artists of the Stieglitz Circle R.
