Becomings Johanna Kirk, 2024-06-04 This book explores postmodern choreographic engagements of pregnant bodies in the US over the last 70 years Johanna Kirk discusses how choreographers negotiate identification with the look of their pregnant bodies to maintain a sense of integrity as artists and to control representations of their gender and physical abilities while pregnant Across chapters the artists discussed include Anna Halprin Trisha Brown Twyla Tharp Sandy Jamrog Jane Comfort Jody Oberfelder Jawole Willa Jo Zollar Miguel Guti rrez Yanira Castro No mie LaFrance and Meg Foley By presenting their bodies in performance these artists demonstrate how their experiences surrounding pregnancy intersect not only with their artform and its history but also with their personal experiences of race gender and sexual identification In these pages Johanna Kirk argues that choreography offers them tools that are alternative to medicine or other forms of social representation for understanding what how pregnant bodies do and feel and what they can mean for individuals and their communities The works within these chapters invite readers to see dancing bodies and pregnant bodies in new ways and for their potential to manifest new possibilities This study will be of great interest to students and scholars exploring dance theatre and performance race and gender

Dynamic Neuroscience Zhe Chen, Sridevi V. Sarma, 2017-12-27 This book shows how to develop efficient quantitative methods to characterize neural data and extra information that reveals underlying dynamics and neurophysiological mechanisms Written by active experts in the field it contains an exchange of innovative ideas among researchers at both computational and experimental ends as well as those at the interface Authors discuss research challenges and new directions in emerging areas with two goals in mind to collect recent advances in statistics signal processing modeling and control methods in neuroscience and to welcome and foster innovative or cross disciplinary ideas along this line of research and discuss important research issues in neural data analysis Making use of both tutorial and review materials this book is written for neural electrical and biomedical engineers computational neuroscientists statisticians computer scientists and clinical engineers

Engineering & Computer Graphics Workbook Using SolidWorks 2010 Ronald Barr, 2010-05-10 Engineering Computer Graphics Workbook Using SolidWorks 2010 is an exercise based workbook that uses step by step tutorials to cover the fundamentals of SolidWorks 2010 The intended audience is college undergraduate engineering majors but it could also be used in pre college

introductory engineering courses or by self learners The text follows an educational paradigm that was researched and developed by the authors over many years The paradigm is based on the concurrent engineering approach to engineering design in which the 3 D solid model data serves as the central hub for all aspects of the design process The workbook systematically instructs the students to develop 3 D models using the rich tools afforded in SolidWorks The exercises then proceed to instruct the students on applications of the solid model to design analysis using finite elements to assembly modeling and checking to kinematic simulation to rapid prototyping and finally to projecting an engineering drawing The workbook is ideally suited for courses in which a reverse engineering design project is assigned This book contains clear and easy to understand instructions that enable the students to robustly learn the main features of SolidWorks with little or no instructor input

In Search of Coherence Marcel Jousse, 2016-11-10 Marcel Jousse's anthropology of mimism is a plea for a change of civilization Our present day Western civilization has decomposed the human being into a mind soul spirit and a body put writing as the apex of this human's expression and set this human as the conqueror of his world Jousse pleads for a threefold re composition a human compound expressing himself as a whole and in exchange with a cosmos that he mimes and infuses with consciousness What is needed is an evolution neither progressive nor regressive but an evolution in depth reconnecting the new with the old in short coherence

How to Make Dances in an Epidemic David Gere, 2004-09-15 David Gere who came of age as a dance critic at the height of the AIDS epidemic offers the first book to examine in depth the interplay of AIDS and choreography in the United States specifically in relation to gay men The time he writes about is one of extremes A life threatening medical syndrome is spreading its transmission linked to sex Blame is settling on gay men What is possible in such a highly charged moment when art and politics coincide Gere expands the definition of choreography to analyze not only theatrical dances but also the protests conceived by ACT UP and the NAMES Project AIDS quilt These exist on a continuum in which dance protest and wrenching emotional expression have become essentially indistinguishable Gere offers a portrait of gay male choreographers struggling to cope with AIDS and its meanings

The Functional Role of Critical Dynamics in Neural Systems Nergis Tomen, J. Michael Herrmann, Udo Ernst, 2019-07-23 This book offers a timely overview of theories and methods developed by an authoritative group of researchers to understand the link between criticality and brain functioning Cortical information processing in particular and brain function in general rely heavily on the collective dynamics of neurons and networks distributed over many brain areas A key concept for characterizing and understanding brain dynamics is the idea that networks operate near a critical state which offers several potential benefits for computation and information processing However there is still a large gap between research on criticality and understanding brain function For example cortical networks are not homogeneous but highly structured they are not in a state of spontaneous activation but strongly driven by changing external stimuli and they process information with respect to behavioral goals So far the questions relating to how critical dynamics may support computation in this complex setting and whether they can outperform other information processing schemes remain open Based on the workshop Dynamical Network States Criticality and Cortical Function held in March 2017 at the Hanse Institute for Advanced Studies HWK in Delmenhorst Germany the book provides readers with extensive information on these topics as well as tools and ideas to answer the above mentioned questions It is meant for physicists computational and systems neuroscientists and biologists

Audio IC Users Handbook R M MARSTON, 1997-08-14 A vast range of audio and audio associated ICs are readily available for use by design engineers and technicians This handbook is a comprehensive guide to the most popular and useful of these devices including about 370 circuits with diagrams It deals with ICs such as low frequency linear amplifiers dual pre amplifiers audio power amplifiers charge coupled device delay lines bar graph display drivers and power supply regulators It shows how to use these devices in circuits ranging from simple signal conditioners and filters to complex graphic equalisers stereo amplifier systems and echo reverb delay line systems Not only does this Handbook contain a huge collection of circuits using state of the art and readily available ICs but also it gives a thorough grounding in theoretical information relating to the various aspects of modern audio systems and to various dedicated types of audio ICs Newnes Circuits Manuals and User s Handbooks by Ray Marston cover a wide range of electronics subjects in an easy to read and non mathematical manner presenting the reader with many practical applications and circuits They are specifically written for the practising design engineer technician and the experimenter as well as the electronics students and amateur The ICs and other devices used in the practical circuits are modestly priced and readily available types with universally recognised type numbers Ray Marston has proved through hundreds of circuits articles and books that he is one of the leading circuit designers and writers in the world He has written extensively for Popular Electronics Electronics Now Electronics and Beyond Electronics World Electronics Today International and Electronics Australia amongst others Other books by Ray Marston from Newnes include Modern CMOS Circuits Manual Power Control Circuits Manual Modern TTL Circuits Manual Electronic Alarm Circuits Manual Optoelectronics

Attack-and-Defense Games for Control Systems Huanhuan Yuan, Yuan Yuan, Huapeng Dong, Yuanqing Xia, Mengbi Wang, 2024-08-06 This vital work for researchers and graduate students focuses on resilience estimation and control of cyber physical networked systems using attacker defender game theory It presents attack and defense strategies and describes the design and resilience of control systems to withstand cyberattacks Complex control systems including cyber physical and cloud control systems are in open network environments and are often confronted with threats from cyberspace physical space and even cloud service With diversified and intelligent attack patterns and improvements in attack capabilities non contact damage can be widespread In this book the authors use a formal mathematical approach to introduce their recent research findings to describe and design attack and defense strategies

using game theoretic method The book is divided into three sections focusing on strategies for resilience against deception attacks and DoS attacks and protecting cloud control systems against threats In these sections the authors address topics such as secure and distributed filtering attack detection and disturbance rejection resilient state estimation and resilient control and techniques such as Stackelberg games hierarchical games and active eavesdropping Through this book readers will be able to design effective defense strategies for complex control system to achieve resilience for closed control cyber physical systems network and cloud systems This book is a vital resource for graduate students and academic researchers who are familiar with the concepts related to cyberattack and defense and who have a related research background To maximize their benefit from this book readers are recommended to have a strong mathematical foundation as the book takes a mathematical approach to the concepts and strategies described within

A Companion to Contemporary Documentary Film Alexandra Juhasz, Alisa Lebow, 2020-06-03 A Companion to Contemporary Documentary Film presents a collection of original essays that explore major issues surrounding the state of current documentary films and their capacity to inspire and effect change Presents a comprehensive collection of essays relating to all aspects of contemporary documentary films Includes nearly 30 original essays by top documentary film scholars and makers with each thematic grouping of essays sub edited by major figures in the field Explores a variety of themes central to contemporary documentary filmmakers and the study of documentary film the planet migration work sex virus religion war torture and surveillance Considers a wide diversity of documentary films that fall outside typical canons including international and avant garde documentaries presented in a variety of media
