Contradictions Of Consumption:

Contradictions of Consumption Tim Edwards, 2000 A critical introduction to the field that manages to be both considered and argumentative and stands out distinctly from the more culturalist alternatives available it should provide a strong text for undergraduate courses Don Slater Goldsmiths College University of London How has consumer society developed What are the social divisions politics and policies associated with consumption How do consumer practices have social significance This lively and accessible text shows how consumption is increasingly important in dominating our individual lives and indeed the entire development and direction of contemporary society nationally and internationally Consumption is inherently contradictory in its nature and meaning The most rapturous form of shopping for example clothes purchasing on unlimited plastic in a shopping mall may turn into the most tortuous as the shopper tires the clothes don't fit and the car park is cramped Tim Edwards argues that the practice of consumption itself and consumer society more widely is often socially divisive and iniquitous and examines the extent to which consumer power is real or illusory He provides a thorough analysis and critique of the theories practices and politics of consumer society In particular this book addresses the social divisions of consumption through topics such as fashion advertising and marketing as well as more classical and contemporary theories of consumer society It will appeal to a wide range of students in sociology cultural studies social policy and the politics of identity

Handbook of Social Problems George Ritzer, 2004 Ritzer's Handbook of Social Problems offers a comprehensive treatment of today's major societal issues The articles are authored by some of the top scholars in the field and address problem areas that will capture the interests of students and professors alike The international coverage is most welcome in this time of intensifying global inequalities Nancy Jurik Arizona State University The Handbook of Social Problems A Comparative International Perspective provides a unique broadly comparative perspective on the current state of social problems and deviance in a variety of societies around the world Editor George Ritzer along with leading U S and international sociologists examines the relationship between social problems and a society's level of development and affluence The essays in this volume focus on four interrelated issues involved in the relationship between social problems and the level of development and affluence Less developed and less affluent societies are more likely to experience a range of social problems than developed and affluent societies Affluence causes or at least brings with it a series of social problems that do not exist in less affluent societies It is only with affluence that certain things can come to be imagined as social problems such as excessive consumption The very affluence of a society makes it vulnerable to problems that would not be

social problems in poorer societies The Handbook explores the theory of the weakness of the strong in other words strong or wealthy nations may have greater vulnerability to some social problems than less developed or affluent societies This theory is clearly illustrated in this volume by the aftermath of September 11 2001 depicting the vulnerability of the U S to social problems in far removed corners of the world In addition the international and comparative essays in this volume cover other important issues such as the impact of modern technologies on social problems ecological problems global inequality health as a social problem and much more The Handbook of Social Problems is a vital resource for sociologists and graduate students as well as an excellent addition to any academic library **Anthropologica** ,2004 **Inside Consumption S.**

Ratneshwar,David Glen Mick,2005 Following on from The Why of Consumption this book examines motivational factors in diverse consumption behaviours In a world where consumption has become the defining phenomenon of human life and society it addresses the effects of critical life events on consumption motives and the sociological and intergenerational influences on consumer motives and preferences Its cross disciplinary approach brings together some of the leading scholars from diverse subject areas to examine the central question about consumption why This is a unique and invaluable contribution to the area and an essential asset for all those involved in researching teaching or studying consumption and consumer behaviour **Contradictions in Food Consumption** Hanna Leipämaa-Leskinen,2015 This study asked consumers to identify the possible contradictions in their food consumption The article takes the so called antinomies of taste health vs indulgence convenience vs care extravagance vs economy novelty vs tradition and together vs alone by Warde and M kel as a starting point The empirical part of the research analyses between which opposing poles the contradictions emerge when the consumers themselves are asked Findings from a survey 745 respondents indicate that consumers prefer to engage in food related activities that would be more aesthetic healthful tasty convenient caring and economic but state significant barriers for not being able to fulfil these desires Finally the article draws theoretical conclusions about the connections between the prevailing food consumption related contradictions and contemporary consumer society

Headstrong and Unorthodox Pioneers for a Critical Theory of Consumption Michael-Burkhard Piorkowsky,Karl Kollmann,2023-08-28 This volume offers contributions on the fundamentals of current consumption theory and consumption research which have developed almost entirely from originally unorthodox approaches against traditional micro and macroeconomic theory The inspiration came mainly from social economic behavioural research and ecological economics But the reception is very patchy and the history is largely forgotten With reference to the work of earlier authors new arguments are offered to the current discussion about delimitations and paradoxes in consumption and the still narrowly understood consumer role It is as much about rework in sharpening the understanding of consumption and consumers in their lifeworlds as it is about indications of fruitfulness for the analysis of open questions It is about arguments for a paradigmatic reorientation of consumer research and policy The contributions address in particular ambivalences options and future
