Russian people and the contrast of their destiny to the North American people who he says are dominating the Earth for a brief period of increasing splendour Steiner explains how elemental beings responsible for the balance of land and sea have created conditions where various peoples are enabled to develop their gifts and fulfil their destinies Thus he speaks of Finland as the ancient conscience of Europe Russia as the future bearer of the Christ imbued Spirit Self and the differing but complementary environments of Germany and Britain Strikingly he states that no souls on Earth love one another more than those living in Central Europe and those living in the British Isles Rudolf Steiner also speaks of the necessary work of luciferic and ahrimanic beings that collaborate to enable the solid spatial forms of our physical bodies Likewise they influence our etheric and astral bodies facilitating thinking feeling and will to be imbued with life and consciousness 50

Transnational Influences on Values and Practices in Nordic Educational Leadership Leif Moos, 2013-03-15 This book explores to what extent transnational influences change national local values and practices in the Nordic educational systems It provides country cases and thematic chapters that give nuanced insights into the influence of transnational agencies on national governance and discourses It describes how national discourses and regulation influences

school leadership values culture and practice in competition with traditional values The transnational and global discourse on educational leadership is mostly formed according to Anglo American thinking and tradition Pivotal foundations of this discourse are strong hierarchical societies class societies with liberal democracies and clearly streamed education systems The Nordic discourse however builds on a more equal society and flat hierarchies with participatory democracy and on comprehensive schooling with strong local community roots Leadership thinking and practices are formed by the culture and context they are part of they are primarily shaped by the national local values traditions and practices and only partially shaped by politics discourses and literature Due to the fact that a great deal of the literature that is being used in the Nordic contexts is of Anglo American origin and many of the research projects have Anglo American foundations it is difficult to distinguish the sources for leadership thinking and practice This book distinguishes the Nordic from the Anglo American thinking and presents important findings and arguments for leadership practitioners inside as well as outside the Nordic countries
