On the Edge of the Banda Zone Roy Ellen,2003-08-31 The impact of the Indonesian spice trade on global and more particularly European history has been widely acknowledged Although more recent studies have gone beyond the preoccupation with the colonial relationship to provide a more Asiatic view On the Edge of the Banda Zone is the first to focus an anthropological lens on the dynamics of trade in a specific area that incorporating the Seram Laut and Gorom archipelagoes and the adjacent mainland of east Seram in the Moluccas The point of departure for Roy Ellen s analysis is a description of trade relations in the east Seram zone between 1970 and 1990 but the wider importance of the data presented here is readily apparent For five hundred years and probably much longer it has served as a corridor between Eurasia and the southwestern Pacific and played a vital role in the production and distribution of nutmeg and other high value commodities that have for centuries had an impact on the global economy Drawing on the author s fieldwork as well as archival and secondary sources this ambitious eclectic volume demonstrates the enduring continuities in the local system as it comes into contact with the changing outside world It illuminates how barter ecological and ethnic divisions of labor exchange patterns and the organization of trade between the peoples of the New Guinea coast and east Seram help us make sense of long term cycles and trends

South Asian Studies as well as Asian Studies in general **Ecocultures** Steffen Böhm,Zareen Pervez Bharucha,Jules Pretty,2014-12-05 The world faces a perfect storm of social and ecological stresses including climate change habitat loss resource degradation and social economic and cultural change In order to cope with these communities are struggling to transition to sustainable ways of living that improve well being and increase resilience This book demonstrates how communities in both developed and developing countries are already taking action to maintain or build resilient and sustainable lifestyles These communities here designated as Ecocultures are exemplars of the art and science of sustainable living Though they form a diverse group they organise themselves around several common organising principles including an ethic of care for nature a respect for community high ecological knowledge and a desire to maintain and improve personal and social wellbeing Case studies from both developed and developing countries including Australia Brazil Finland Greenland India Indonesia South Africa UK and USA show how based on these principles communities have been able to increase social ecological and personal wellbeing and resilience They also address how other more mainstream communities are beginning to transition to more sustainable resilient alternatives Some examples also illustrate the decline of ecocultures in the face of economic pressures globalisation and climate change Theoretical chapters examine the barriers and bridges to wider application of these examples Overall the volume describes how ecocultures can provide the global community with important lessons for a wider transition to sustainability and will show how we can redefine our personal and collective futures around these principles The Austronesians Peter Bellwood,James J. Fox,Darrell Tryon,2006-09-01 The Austronesian speaking population of the world are estimated to number more than 270 million people living in a broad swathe around half the globe from Madagascar to Easter Island and from Taiwan to New Zealand The seventeen papers in this volume provide a general survey of these diverse populations focusing on their common origins and historical transformations The papers examine current ideas on the linguistics prehistory anthropology and recorded history of the Austronesians **Asian Anthropology** Jan Van Bremen,Eyal Ben-Ari,Syed Farid Alatas,2004-08-02 Asian Anthropology raises important questions regarding the nature of anthropology and particularly the production and consumption of anthropological knowledge in Asia Instead of assuming a universal standard or trajectory for the development of anthropology in Asia the contributors to this volume begin with the appropriate premise that anthropologies in different Asian countries have developed and continue to develop according to their own internal dynamics With chapters written by an international group of experts in the field Asian Anthropology will be a useful teaching tool and a valuable resource for scholars working in Asian anthropology **The Flaming Womb** Barbara Watson Andaya,2006-07-31 The Princess of the Flaming Womb the Javanese legend that introduces this pioneering study symbolizes the many ambiguities attached to femaleness in Southeast Asian societies Yet despite these ambiguities the relatively egalitarian nature of male female relations in Southeast Asia is central to arguments claiming a coherent identity for the region This challenging work by

senior scholar Barbara Watson Andaya considers such contradictions while offering a thought provoking view of Southeast Asian history that focuses on women's roles and perceptions Andaya explores the broad themes of the early modern era 1500-1800 the introduction of new religions major economic shifts changing patterns of state control the impact of elite lifestyles and behaviors drawing on an extraordinary range of sources and citing numerous examples from Thai Vietnamese Burmese Philippine and Malay societies In the process she provides a timely and innovative model for putting women back into world history Andaya approaches the problematic issue of Southeast Asia by considering ways in which topography helped describe a geo-cultural zone and contributed to regional distinctiveness in gender construction She examines the degree to which world religions have been instrumental in re-constructing conceptions of gender an issue especially pertinent to Southeast Asian societies because of the leading role so often played by women in indigenous ritual She also considers the effects of the expansion of long distance trade the incorporation of the region into a global trading network the beginnings of cash cropping and wage labor and the increase in slavery on the position of women Erudite nuanced and accessible *The Flaming Womb* makes a major contribution to a Southeast Asia history that is both regional and global in content and perspective

The Peopling of East Asia Roger Blench, Laurent Sagart, Alicia Sanchez-Mazas, 2005-03-20 Recent findings in the fields of East Asian archaeology linguistics and genetics are collected together here making this an ideal reference tool for scholars in all disciplines working on the reconstruction of the East Asian past
