Excerpt from Contributions to the Founding of the Theory of Transfinite Numbers This volume contains a translation of the two very important memoirs of Georg Cantor on transfinite numbers which appeared in the Mathematische Annalen for 1895 i 1897 under the title Beitrage zur Begrundung der transfiniten Mengenlehre It seems to me that since these memoirs are chiefly occupied with the investigation of the various transfinite cardinal and ordinal numbers and not with investigations belonging to what is usually described as the theory of aggregates or the theory of sets Mengenlehre theorie des ensembles the elements of the sets being real or complex numbers which are imaged as geometrical points in space of one or more dimensions the title given to them in this translation is more suitable These memoirs are the final and logically purified statement of many of the most important results of the long series of memoirs begun by Cantor in 1870 About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important

historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
