**Guide to Reprints** ,2007      **The Culture of the Book in Tibet** Kurtis R. Schaeffer,2014-10-07 The history of the book in Tibet involves more than literary trends and trade routes Functioning as material intellectual and symbolic object the book has been an instrumental tool in the construction of Tibetan power and authority and its history opens a crucial window onto the cultural intellectual and economic life of an immensely influential Buddhist society Spanning the fourteenth to the eighteenth centuries Kurtis R Schaeffer envisions the scholars and hermits madmen and ministers kings and queens who produced Tibet s massive canons He describes how Tibetan scholars edited and printed works of religion literature art and science and what this indicates about the interrelation of material and cultural practices The Tibetan book is at once the embodiment of the Buddha s voice a principal means of education a source of tradition and authority an economic product a finely crafted aesthetic object a medium of Buddhist written culture and a symbol of the religion itself Books stood at the center of debates on the role of libraries in religious institutions the relative merits of oral and written teachings and the economy of religion in Tibet A meticulous study that draws on more than 150 understudied Tibetan sources *The Culture of the Book in Tibet* is the first volume to trace this singular history Through a single object Schaeffer accesses a greater understanding of the cultural and social history of the Tibetan plateau      **A History of Modern Tibet, Volume 2** Melvyn C. Borderlands addresses a historical sequence that sealed the future of the Sino Tibetan borderlands It considers how starting in the late nineteenth century imperial formations and emerging nation states developed competing schemes of integration and debated about where the border between China and Tibet should be It also ponders the ways in which this border is internalised today creating within the People s Republic of China a space that retains some characteristics of a historical frontier The region of eastern Tibet called Kham the focus of this volume is a productive lens through which processes of place making and frontier dynamics can be analysed Using historical records and ethnography the authors challenge purely externalist approaches to convey a sense of Kham s own centrality and the agency of the actors involved They contribute to a history from below that is relevant to the history of China and Tibet and of comparative value for borderland studies
