Contributions to Islamic Economic Theory Masudul Alam Choudhury, 1986-06-18 Studies in Islamic Economics Ahmed Akgunduz, 2009-06-26 This book contains two major subjects Firstly some academic papers about Islamic Banking The main characteristic of Islamic banking in comparison to traditional banking is that it is more concerned with the profitability and length of the proposed investment rather than collateral Projects with high profitability and low collateral that might otherwise be rejected can be funded through Islamic banking This leads to a banking behavior that is similar to development banks and microfinance institutions that have been very successful in many Third World countries Academic research shows that Islamic banking is not a negligible or merely temporary phenomenon Contributors Dr M Umer Chapra Dr Ahmet Akgunduz Dr Arjen van Klink Drs Bastiaan A Verhoef and Ismail Zsoy Secondly some research articles about religion and development Islam summarizes the root cause of the great social upheavals that have been suffered particularly in this century in two phrases One is So long as I am full what is it to me if others die of hunger And the other is You struggle and labor so that I can live in ease and comfort Islam demonstrates that if hunger and poverty are to be eradicated it will be through applying the Quranic injunction of almsgiving social assistance and mutual help vujub u zakat Being steadfast in performing prayers giving zakat and the prohibition against earning without working e g usury and interest hurmet i Rib God has permitted trade and forbidden usury Contributors Dr Ahmet Akgunduz Dr Arif Ersoy Dr Hamet Baar and Dr Bunyamin Duran *The Foundations of Islamic Political Economy* Masudul Alam Choudhury, Uzir Abdul Malik, 2016-07-27 This rigorously written book on the areas of Islamic principle theory and application is expected to break new ground in modern economic analysis both for the Islamically inclined and others The main features of the book include analytical treatments of the essential axioms and instruments of Islamic Political Economy their expected application and a comparative perspective both in respect to contemporary Islamic literature as well as comparative economic theory **The Principles of Islamic Political Economy** Masudul Alam Choudhury, 2016-07-27 This book examines the methodological development of the principles of Islamic political economy in its theoretical and applied aspects This is carried out in a general equilibrium framework using the theory of social choice Thus a comparative study is also undertaken here in these areas while developing the theory of Islamic political economy In these respects this book appears to be the first one of its kind **Islamic Economic Alternatives** K.S. Jomo, 2016-07-27 The global Islamic resurgence of the last two decades has spawned parallel intellectual efforts to articulate an alternative Islamic way of life This volume critically assesses much of what is said to be Islamic economics today its theories assumptions concepts and the alternatives it claims to offer While critical of much of contemporary Islamisation and the interests such economic policies protect the current relevance of progressive policy

Resource Mobilization and Investment in an Islamic Economic Framework Zaidi Sattar, 1990-01-01 The contemporary understanding of economic resources has almost entirely to do with those elements that are capable of meeting either directly or indirectly the needs of mankind These elements or resources both human and natural are the things that every state attempts as a fundamental principle of progress and prosperity to preserve mobilize and invest In the Islamic world in particular this is an issue that occupies a very basic position in all development strategy and planning particularly as in most cases the Islamic world continues to suffer from backwardness and from the adverse effects of the colonialization that was itself one of the major reasons for underdevelopment in the spheres of politics economics and culture

What Is Wrong with Islamic Economics? Muhammad Akram Khan,2013-01-01 I read with great interest the current state of Islamic economics and finance as examined by Muhammad Akram Khan who has given a fresh outlook for the readers to find out its limitations and to search for its solutions Khan has read widely in the subject matter and presented his views with reference to literature and thoughtful and logical arguments While many may not agree with his arguments or will have a better explanation I find his arguments at least worthy of examination to strengthen the arguments of those who might oppose him Although Khan is critical of the subject matter he is very sympathetic to the greater objectives of Islamic economics and provides his own prescriptions to achieve those objectives M Kabir Hassan University of New Orleans US This is a very thought provoking book coming at a crucial stage in the development of Islamic economics and finance Although the reader may not agree with some of the conclusions reached it is clearly a scholarly and extensively researched piece of work it should be read by all serious students of the subject area Amongst other things it throws light on the reasons why the practical implementation of Islamic economics and finance particularly in relation to the financial system and financial institutions has not always conformed to the true theoretical foundations laid down by Islamic scholars John Presley Loughborough University UK and recipient of Islamic Development Bank Prize in Islamic Finance 2001 2002 Islamic economic system is a type of capitalism with a spiritual dimension is a major conclusion of this book I applaud this insight of Muhammad Akram Khan The same can be perhaps said of Islamic finance which in its hurry to build viable and efficient financial institutions has ignored the very same need to start with profits and risk sharing principle and no riba principles to build pricing models to anchor the new sub discipline The good news is that in the course of time to come Akram s advocacy may be realised since such serious works have already begun Mohamed Ariff University Putra Malaysia and Bond University

Australia Although there are many books on Islamic economics this critical but sympathetic account by Muhammad Akram Khan is worthy of attention The author has clearly read widely on the subject and appreciates the limitations of much that he has read Islamic economics is a work in progress and by focusing on its shortcomings Khan challenges the assumptions of many working in the field His discussion of methodology is insightful and even the prohibition of riba for many the defining characteristic of Islamic finance is examined from a fresh perspective While many will not agree with the analysis and the conclusions even critics should be able to appreciate the strengths of the arguments made In summary this is a worthwhile and in many respects an innovative survey of the state of Islamic economics and finance It deserves to be widely read Rodney Wilson Durham University UK What is Wrong with Islamic Economics takes an objective look at the state of the art in Islamic economics and finance It analyses reasons for perceived stagnation and also suggests a way forward As well as probing various myths the book presents several innovative ideas and a methodology for developing the subject on new foundations It also highlights weaknesses in the conventional position on prohibition of interest which has led Islamic banks devise a series of legal tricks The author notes how the original aim of devising a new brand of banking has become less prominent whilst Islamic banks now position themselves more closely to conventional banks The book also offers insights into how certain traditional thinking has seemingly ignored the egalitarian spirit of the law of zakah and created a scenario where zakah is not able to help the billions of poor people around the globe This detailed book will appeal to students professors researchers Islamic banks and finance houses consulting companies accounting firms and regulatory bodies Professional economists libraries in research and training organizations as well as anyone with a general interest in the topic will find much to interest them
