## Abstract

**Purpose** – Most papers and books on conducting literature reviews primarily emphasize achieving technical quality, ensuring reproducibility and validating results. Notwithstanding the need for technical excellence, there is also a need for relevance. The purpose of this study is to address that need and offer practical and constructive suggestions for enhancing the meaningful contribution of a literature review, thereby increasing its impact and relevance for publication.

**Design/methodology/approach** – In this conceptual paper, the authors explore strategies to enhance the relevance and contribution of a literature review. By clarifying the needs of diverse audiences and the principles of generating new insights, the authors provide a broad range of options without being prescriptive. Recognizing that every literature review is unique, this paper contrasts various approaches to offer flexible and adaptable guidance.

**Findings** – Literature reviews can be enjoyable to read and write, offering a wide range of substantial contributions that meet the expectations of readers and journal editors. This paper offers practical suggestions for prospective authors to make their reviews more relevant, invaluable and engaging, and summarizes these suggestions in a comprehensive checklist.

**Research limitations/implications** – The paper is not exhaustive but rather complements prevalent literature review methodologies.

**Originality/value** – Existing literature offers limited guidance on enhancing a review's contribution to science, academic inquiry and society. This paper fills that gap by providing both academic considerations and practical recommendations, drawing on the author's extensive experience in reviewing and conducting literature reviews.
