Rosenthal,Andreas Poggel,2024-11-12 Telotopia is a cultural architectural model of a socially stable and just ecologically sustainable rich in culture and desirable culture of the future This design is based on findings in human evolutionary and cultural historical development on examples of historical ethnological cultures as well as on findings in human sciences such as among others psychology and pedagogy This is not just about mere utopian imagination The actualization of a culture in the shape of Telotopia seems to be realistically possible In fact it s relatively easy if it meets with the corresponding interest In addition this cultural architectural model is to found the new scientific branch of Telotopistics This is about the finding that a social development can only produce a desired and

workable result unless it is more vague and unspecified than a building plan for an ordinary detached house Even the social complex contains many structures that need to be planned for today but these can also be desirably planned The present model is to encourage developing a cultural architectural understanding of these structures for a desirable culture of the future In terms of discussion and practice the New Culture Workshop serves the development of a new culture The present edition is a cost effective version in smart print
