Albert R. Roberts, 2009. This is a new edition of the wildly successful everyday reference for social workers. Couples in Collusion Dennis A. Bagarozzi, 2013. When a couple enters therapy, both partners have either explicit or implicit understandings of what can and more importantly cannot be discussed in therapy. Even when empirically tested assessments are used to help pinpoint areas of concern and conflict, couples may choose to identify only those areas that are relatively safe and do not seriously threaten each partner's sense of integrity and vulnerability. How is a therapist supposed to proceed when a couple comes in for a tune-up not realizing that their entire transmission needs to be serviced? Therapists know that some relationships like some transmissions can continue to function on some level even without proper care, sometimes even for years before the couple seeks therapy. If when they come in the therapist can help the couples to repair and regain their lost equilibrium, they'll be more likely to seek help when the transmission next begins to slip. In its clear, precise, prose, insightful case studies, and thought-provoking discussion questions, *Couples in Collusion* lays out guidelines for identifying, understanding, and dealing with the unspoken agreements and collusive systems that couples build up over time. Clinicians will find each chapter replete with concrete strategies they can use in practice as well as thorough explanations of the assessment tools, suggestions on how to use them, and even advice on how to build the tools into clinicians' limited budgets.

Case Conceptualization in Couple Therapy Michael D. Reiter, 2024-08-20. This textbook provides undergraduate and graduate students with a comprehensive and in-depth exploration of the primary models of couples counseling, allowing them to compare and contrast each theory alongside a single case. Designed to be the core text for couple therapy courses, the book begins by introducing the field as well as presenting Carissa and Steve, a couple whom readers will follow as each model is applied to their case. The chapters focus on 11 different theoretical models, such as Bowen family systems theory, emotionally focused couple therapy, the Gottman method, solution-focused couples counseling, narrative couple therapy, and more, with expert therapists writing on each of these unique models. Each chapter addresses the history of the model, the conceptualization of problem formation, diversity considerations, and the conceptualization of problem resolution. With session transcripts throughout, this book allows training therapists to easily compare, contrast, and apply the most prevalent models in couples counseling. This textbook is a core text for graduate marriage and family therapy, mental health counseling, clinical psychology, and social work students. The book is also useful for practicing professionals who want to explore how to apply a specific model of counseling to couples.
