Academic Integrity and the Role of the Academic Library Josh Seeland, Jason Openo, 2024-09-01 This book presents the growing interconnection of two pillars from the world's higher education institutions academic integrity and libraries It provides sound examples to extant questions and conversations about whose job it is to teach academic integrity and what library work is The role of libraries in supporting academic integrity is not always clear and has not been fully explored Drawing from library literature and that of academic integrity more broadly readers are exposed to how libraries are necessary in a holistic approach to academic integrity Education about academic integrity and the prevention of academic misconduct for not only students but other institutional stakeholders are demonstrated as occurring optimally in positive supportive and proactive ways The book details numerous ways in which librarians can work with faculty and other stakeholders using established frameworks such as information literacy and blended librarianship as well as innovative platforms and content Other contributions involve the identification of potential academic misconduct and administration of academic integrity policies to complete the cycle recommended by the frameworks of global educational quality organizations QAA TEQSA Initiatives presented in the book include those at the course level and institution wide initiatives involving curriculum policy and supports for faculty and students Also contained are efforts occurring at a national level within professional networks in addition to international library curriculum This book provides inspiration to institutions and academic libraries of any size and scope to embrace this emerging role in creating cultures of academic integrity

information The articles selected for this compendium are well thought out and organized and are drawn from the fields of information and library science and business management Since most special libraries are corporate libraries the selections are taken from these different disciplines to provide perspectives from both a business standpoint and an information management one The selections contain many different predictions about libraries and librarians of the future They focus on new roles and highlight the importance of the profession With the rapid growth of technology end users are being inundated with choices They need expert advice from experienced practitioners Currently much of the literature focuses solely on the management of libraries as opposed to environment in which libraries operate The purpose of this reader is to correct that
