Courts And Modern Medicine:

The Expert Witness in Islamic Courts Ron Shaham, 2010-04-15 Islam's tense relationship with modernity is one of the most crucial issues of our time. Within Islamic legal systems with their traditional preference for eyewitness testimony, this struggle has played a significant role in attitudes toward expert witnesses. Utilizing a uniquely comparative approach, Ron Shaham here examines the evolution of the role of such witnesses in a number of Arab countries from the premodern period to the present. Shaham begins with a history of expert testimony in medieval Islamic culture, analyzing the different roles played by male experts, especially physicians and architects, and females, particularly midwives. From there, he focuses on the case of Egypt, tracing the country's reform of its traditional legal system along European lines beginning in the late nineteenth century. Returning to a broader perspective, Shaham draws on a variety of legal and historical sources to place the phenomenon of expert testimony in cultural context. A truly comprehensive resource, *The Expert Witness in Islamic Courts* will be sought out by a broad spectrum of scholars working in history, religion, gender studies, and law. *The Oxford Handbook of the History of Medicine* Mark Jackson, 2011-08-25 In three sections, the *Oxford Handbook of the History of Medicine* celebrates the richness and variety of medical history around the world. It explores medical developments and trends in writing history according to period, place, and theme. *Gender and the Mexican Revolution* Stephanie J. Smith, 2009 The state of Yucatan is commonly considered to have been a hotbed of radical feminism during the Mexican Revolution. Challenging this romanticized view, Stephanie Smith examines the revolutionary reforms designed to break women's ties to tradition and religion. Ethics and Law in Modern Medicine D. Vukadinovich, S. Krinsky, 2001-10-31 Los Angeles attorney D. Vukadinovich and S. Krinsky, law Tulane University, present 11 detailed hypothetical case studies as the basis for a group discussion and role playing in a course or seminar on bioethics. Each makes specific reference to appended excerpts from relevant state and federal case law, statutes, and regulations that health care professionals, administrators, and attorneys deal with on a regular basis. Medicine, Public Health and the Qājār State Hormoz Ebrahimnejad, 2004-08-30 The starting point for this volume is a previously unstudied nineteenth-century Persian text concerning hospital reform and of great importance for understanding the history of medical care in nineteenth-century Iran. The volume provides surprising new insights into the interrelation of medical practice, public health, and politics in Qajar Iran. Rather than showing a straightforward replacement, it reveals that Western medicine was assimilated through dialogue into

traditional medical systems It argues that institutional changes preceded intellectual transitions insofar as the first reforms in the medical system were implemented at an institutional level as part of the development of the Qajar state and with the active involvement of traditional court physicians Full edited text with translation and commentary With illustrations

Medicine in Iran H. Ebrahimnejad, 2013-12-17 This book traces how medicine in modern Iran was both theoretically and institutionally transformed in the 19th and 20th centuries It explores the process by which local physicians in a non colonial context assimilated the emerging modern medicine and the institutional devices that accommodated this transition

The Jewish Law Annual Bernard S. Jackson, 1998-01-29 Most bioethicists concern themselves with common law when considering the mores that inform practitioners operating in the framework of medical institutions These questions are generally addressed from the perspective of secular ethics Many Jewish physicians however Contributors to this volume address medical issues such as organ transplantation physician's fees new reproductive technologies informed consent and medical confidentiality in the context of Jewish law Jewish thought is presented as of great relevance to both the history of medical ethics and contemporary medico legal issues The volume concludes with a chronicle of Jewish Law in the State of Israel and a survey of recent literature

International Medical Malpractice Law Dieter Giesen, 1988-09 This monograph is the most comprehensive comparative law study of legal responsibility arising from medical care presently available It is written for doctors as well as health care administrators and legal professionals Focusing on the problems of civil liability it presents the development points of contact with and differences between the modern law of medical liability stemming from both the Common Law and Civil Law traditions of England Scotland Eire New Zealand Australia Canada the United States South Africa France Belgium West Germany Switzerland and Austria It demonstrates the extent to which both problems of medical law and trends towards their solution are already familiar in these legal systems The work describes principles and trends not by confronting the reader with national reports and separate chapters on different legal systems rather the relevant legal problems are analyzed from an integrative comparative viewpoint The main thrust of the presentation is the analysis of numerous court decisions the number of which is rising ominously in the United States on the civil liability of doctors and hospitals for damages arising from substandard treatment or inadequate disclosure of information to the patient References to the legal and medical literature indexes and a refined system of cross references together with an important collection of appendices covering legal and ethical declarations make this work accessible as a handbook and reference work for the legal and social problems encountered today in the wide area of law ethics and medicine
