Morality and Masculinity in the Carolingian Empire Rachel Stone, 2011-10-20 What did it mean to be a Frankish nobleman in an age of reform How could Carolingian lay nobles maintain their masculinity and their social position while adhering to new and stricter moral demands by reformers concerning behaviour in war sexual conduct and the correct use of power This book explores the complex interaction between Christian moral ideals and social realities and between religious reformers and the lay political elite they addressed It uses the numerous texts addressed to a lay audience including lay mirrors secular poetry political polemic historical writings and legislation to examine how biblical and patristic moral ideas were reshaped to become compatible with the realities of noble life in the Carolingian empire This innovative analysis of Carolingian moral norms demonstrates how gender interacted with political and religious thought to create a distinctive Frankish elite culture presenting a new picture of early medieval masculinity

The History of Courts and Procedure in Medieval Canon Law Wilfried Hartmann, Kenneth Pennington, 2016-09-09 By the end of the thirteenth century court procedure in continental Europe in secular and ecclesiastical courts shared many characteristics As the academic jurists of the *Ius commune* began to

excavate the norms of procedure from Justinian's great codification of law and then to expound them in the classroom and in their writings they shaped the structure of ecclesiastical courts and secular courts as well. These essays also illuminate striking differences in the sources that we find in different parts of Europe. In northern Europe the archives are rich but do not always provide the details we need to understand a particular case. In Italy and Southern France the documentation is more detailed than in other parts of Europe but here too the historical records do not answer every question we might pose to them. In Spain detailed documentation is strangely lacking if not altogether absent. Iberian conciliar canons and tracts on procedure tell us much about practice in Spanish courts. As these essays demonstrate, scholars who want to peer into the medieval courtroom must also read letters, papal decretals, chronicles, conciliar canons and consilia to provide a nuanced and complete picture of what happened in medieval trials. This volume will give sophisticated guidance to all readers with an interest in European law and courts.

Regional Variations in Matrimonial Law and Custom in Europe, 1150-1600

Mia Korpiola, 2011-12-09. Much research has been done on medieval marriage in the last decades. However, few books have a pronouncedly comparative approach. This book discusses how much was regional and universal in medieval marriage law and practices in Europe. The sources used range from secular and canon law to court practice and from images to private correspondence. Articles discuss medieval and Reformation Belgium, England, France, Germany, Italy, Lithuania and Sweden. Both marriage formation and marital property, two intertwined aspects, are considered in the articles. The book offers fresh evidence on the scope of regional variation tolerated by the Church, regional practices and European trends. Contributors are James A. Brundage, Cecilia Cristellon, Trevor Dean, Charles Donahue Jr., Caroline Dunn, Mia Korpiola, Jurgita Kunsmanait, Anu Lahtinen, Anthony Musson, Philip L. Reynolds, Kirsi Salonen, Silvana Seidel Menchi and Monique Vleeschouwers. Van Melkebeek.

Legal Procedure and Practice in Medieval Denmark

Per Andersen, 2011-05-23. This book offers a comprehensive examination of how the Fourth Lateran Council's prohibition against trial by ordeal was implemented in Danish secular law and how it required both a fundamental restructuring of legal procedure and an entirely different approach to jurisprudence in practice.

The Routledge Handbook of Public Taxation in Medieval Europe

Denis Menjot, Mathieu Caesar, Florent Garnier, Pere Verdés Pijuan, 2022-11-30. Beginning in the twelfth century, taxation increasingly became an essential component of medieval society in most parts of Europe. The state-building process and relations between princes and their subject cities or between citizens and their rulers were deeply shaped by fiscal practices. Although medieval taxation has produced many publications over the past decades, there remains no synthesis of this important subject. This volume provides a comprehensive overview on a European scale and suggests new paths of inquiry. It examines the fiscal systems and practices of medieval Europe, including essential themes such as medieval fiscal

theory and the power to tax royal and urban taxation and Church taxation It goes on to survey the entire European continent as well as including comparative chapters on the non European medieval world exploring questions on how taxation developed and functioned what kinds of problems authorities encountered assessing their fiscal power and the circulation of fiscal cultures and practices across cities and kingdoms The book also provides a glossary of the most important types of medieval taxes giving an essential definition of key terms cited in the chapters The Routledge Handbook of Public Taxation in Medieval Europe will appeal to a large audience from seasoned scholars who need a comprehensive synthesis to students and younger scholars in search of an overview of this critical subject

Feuding and Peace-Making in Eleventh-Century France Stephen D. White, 2024-10-28 The essays in this volume discuss feuding and peacemaking in France during a period extending from the mid 10th to the early 12th century They treat various aspects of so called dispute processing a term coined by legal anthropologists to refer to the political processes and discursive practices through which conflict is mediated politically socially legally and culturally Each of the essays can be read both as one element in a larger critique of the theory that a feudal revolution in c 1000 initiated a century long era of feudal anarchy in France and as a study on a particular topic in medieval European legal and political history These include feuding violence the emotional dimensions of conflicts among elites the role of norms and normative argument in disputes the uses of unilateral ordeals and judicial duels in litigation and alternative strategies for terminating disputes

Shifting Landmarks Jeffrey A. Bowman, 2018-10-18 In a major contribution to the debate among medievalists about the nature of social and political change in Europe around the turn of the millennium Jeffrey A Bowman explores how people contended over property during the tenth and eleventh centuries in the province of Narbonne He examines the system of courts and judges that weighed property disputes and shows how disputants and judges gradually adapted modified and reshaped legal traditions The region which comprised Catalonia and parts of Mediterranean France possessed a distinctive legal culture characterized by the prominent role of professional judges a high level of procedural sophistication and an intense attachment to written law particularly the Visigothic Code At the same time disputants relied on a range of strategies including custom curses and judicial ordeals to resolve conflicts Chronic tensions stemmed from conflicting understandings of property rights rather than from pervasive violence the changes Bowman tracks are less signs of a world convulsed in struggle than of a world coursing with vitality In *Shifting Landmarks* property disputes serve as a bridge between the author's inquiry into learned ideas about justice land and the law and his close examination of the rough and tumble practice of daily life Throughout Bowman finds intimate connections among ink and parchment sweat and earth

Marriage Litigation in the Western Church, 1215–1517 Wolfgang P. Müller, 2021-09-16 Examines how late medieval church courts were used for marriage cases and how this varied dramatically across Europe

Contact and Exchange in Later Medieval Europe Hannah Skoda, Patrick Lantschner, R. L. J. Shaw, 2012 The complexity of the interplay and relationships over various borders in medieval Europe is here fully teased out The processes by which ideas objects texts and political thought and experience moved across boundaries in the Middle Ages form the focus of this book which also seeks to reassess the nature of the boundaries themselves it thus appropriately reflects a major theme of Dr Malcolm Vale's work which the essays collected here honour They suggest ways of breaking down established historiographical paradigms of Europe as a set of distinct polities achieving a more nuanced picture in which people and objects were constantly moving and challenging previous conceptions of units and borders The first section examines the construction of boundaries and units in the later Middle Ages via topics ranging from linguistic units to social stratifications and geographically from the Netherlands and Scotland to Gascony and the Iberian peninsula it reveals how much the relationship between exchange and boundaries was reciprocal The second section considers the mechanisms by which it took place from West Africa to Italy and Flanders and discusses the actual exchange of people texts and unusual artefacts Overall the essays bear witness to the constant interplay and interconnections throughout

medieval Europe and beyond Contributors Paul Booth Maria João Violante Branco Rita Costa Gomes Mario Damen Jan Dumolyn Jean Dunbabin Jean Philippe Genet Michael Jones Maurice Keen Frédéric Lachaud Patrick Lantschner Guilhem P. Pin R. L. J. Shaw Hannah Skoda Erik Spindler John Watts **Conflict in Medieval Europe** Warren C. Brown, Piotr Górecki, 2017-05-15 Conflict is defined here broadly and inclusively as an element of social life and social relations Its study encompasses the law not just disputes concerning property but wider issues of criminality coercion and violence status sex sexuality and gender as well as the phases and manifestations of conflict and the behaviors brought to bear on it It engages too with the nature of the transformation spanning the Carolingian period and its implications for the meanings of power violence and peace Conflict in Medieval Europe represents the American school of the study of medieval conflict and social order Framed by two substantial historiographical and conceptual surveys of the field it brings together two generations of scholars the pioneers who continue to expand the research agenda and younger colleagues who represent the best emerging work on this subject The book therefore both marks the trajectory of conflict studies in the United States and presents a set of original highly individual contributions across a shifting conceptual range indicative of a major transition in the field
