Throughout the world the number of festivals has grown exponentially in the last two decades as people celebrate local and regional cultures but perhaps more importantly as local councils and other groups seek to use festivals both to promote tourism and to stimulate rural development However most studies of festivals have tended to focus almost exclusively on the cultural and symbolic aspects or on narrow modelling of economic multiplier impacts rather than examining their long term implications for rural change This book therefore has an original focus It is structured in two parts the first discusses broad issues affecting music festivals globally especially in the context of rural revitalisation The second part looks in more detail at a range of types of festivals commonly found throughout North America Europe and Australasia such as country music jazz opera and alternative music festivals The authors draw on in depth research undertaken over the past five years in a range of Australian places which traces the overall growth of festivals of various kinds examines four of the more important and distinctive music festivals and makes clear conclusions on their significance for rural and regional change Rural Change in Australia John Connell,2016-04-08 New twenty first century economic social and environmental changes have challenged

and reshaped rural Australia They range from ageing populations youth out migration immigration policies that seek to place skilled migrants in rural Australia tree changers agricultural restructuring and new relationships with indigenous populations Challenges also exist around the patchwork economy and the wealth that the mining boom offers some areas while threatening regional economic decline in others Rural Australia is increasingly not simply a place of production of agriculture and minerals but an idea that individuals seek and are encouraged to consume The socio economic implications of drought water rights and changing farming practices have prefaced new social cultural and economic reforms This book provides a contemporary perspective on rapidly evolving population economic and environmental changes in rural and regional Australia itself a significant concept Bringing together a range of empirical studies the book builds on established rural studies themes such as population change economic restructuring and globalisation in agriculture but links such changes to environmental change culture class gender and ethnic diversity Presenting original and in depth interventions on these issues and their intersections this book assembles the best of contemporary research on rural Australia
