Establishing a Performance Index for Construction Project Managers Virendra Kumar Paul, Sushil Kumar Solanki, Abhijit Rastogi, Parnika Singh Yadav, 2023-03-07 Assessment of professional competence for project managers and the measure of project success is well trodden ground in the research and professional project management literature Whilst standards and certifications like PMBOK and the IPMA competence baseline have been developed as a guide for the development of project managers competence the manifestation of these competencies into good performance is neither guaranteed nor always easily ascertainable This book presents a brand new

comprehensive and reliable quantitative tool to assess the performance of a construction project manager Though the performance of a project construction manager may be judged on time and cost criteria of a project there is still no one conclusive evaluation tool based on the varied criteria or competencies that are usually ascribed to them This book develops a performance index for construction project professionals which can be indicative of their performance measured over varied attributes over the lifetime of their professional development This index has the potential to provide all project stakeholders with better control over selecting appropriate resources for managing projects and drive the project professional from within towards improving his her credentials with every project This book can be used by aspiring and practising project managers for measuring their own performance and assessing their relative strengths and weaknesses Organizations can use the tool as a benchmark to select the best of their human resources for their projects and training institutions can use the tool to set a baseline highlight areas for intervention and indicate the readiness of trainees to face real world projects

Network Scheduling Techniques for Construction Project Management M. Hajdu, 1996-12-31 Industrial financial commercial or any kinds of project have at least one common feature the better organized they are the higher the profit or the lower the cost Project management is the principle of planning different projects and keeping them on track within time cost and resource constraints The need for effective project management is ever increasing The complexity of the environment we live in requires more sophisticated methods than it did just a couple of decades ago Project managers might face insurmountable obstacles in their work if they do not adapt themselves to the changing circumstances On the other hand better knowledge of project management can result in better plans schedules and last but not least more contracts and more profit This knowledge can help individuals and firms to stay alive in this competitive market and in the global sense utilize the finite resources of our planet in a more efficient way
