Bell Watching Edmund W. Jupp,2003-01-01 The aim of the Watching series is to draw attention to some of the very interesting items around us things that perhaps we don t notice as much as we might The first was Bridge Watching and when this was put on the Net it produced to the surprise of the author such a pleasant flood of e mail that another was written called Water Watching This too was kindly received So it was tempting to continue with the theme Many people know very little about bells and some sadly know nothing at all This is a pity for large or little they can be engaging objects You might think that Bell Hearing might be a better title but looking at bells has its own attraction too In England church bells are well known because of the sounds they make though many people have not seen the bells themselves Doorbells too are familiar items in many houses but are rarely regarded with any particular interest Some of these are not what is popularly imagined as bell shaped and are more properly chimes Then there are bicycle bells cowbells and many other kinds too all well worth a thought Things that are free are doubly attractive It costs nothing to enjoy the pleasures of getting to know these interesting objects Learning a little about the fascinating qualities of bells in general can be an enjoyable occupation and can start a lively curiosity about them The more you know about them the more interesting they become
