explains the need to develop semiotic theory further in order to acknowledge all the sign systems that practitioners have exploited in successful television drama

The Still Life in the Fiction of A. S. Byatt Elizabeth Hicks, 2010-08-11 This book explores the ways in which English writer A S Byatt's visual still lifes descriptions of real or imagined artworks and what are termed verbal still lifes scenes such as laid tables rooms and market stalls are informed by her veneration of both realism and writing It examines Byatt's adoption of the Barthesian concept of textual pleasure showing how her ekphrastic descriptions involve consumption and take time to unfold for the reader thereby highlighting the limitations of painting It also investigates the ways in which Byatt's still lifes demonstrate her debts to English modernist author Virginia Woolf French writer Marcel Proust and the Pre Raphaelite Brotherhood of nineteenth century Britain A number of Byatt's verbal still lifes are read as semiotic markers of her characters particularly with regard to economic status and class Further her descriptions uniting food and sexuality are perceived as part of her overall representation of pleasure Finally Byatt's employment of vanitas iconography in many of her portrayals of death is discussed showing how her recurring motif of Keats's Ode on a Grecian Urn teases out the still life's inherent tension between living passion and cold artwork

Curating and Re-curating the American Wars in Vietnam and Iraq Christine Sylvester,2019 We have long saved and curated objects from wars to commemorate the war experience These objects appear at national museums and memorials and are often mentioned in war novels and memoirs Through them we institutionalize narratives and memories of national identity as well as international power and purpose While people interpret war in different ways and there is no ultimate authority on the experiences of any war curators of war objects make different choices about what to display or write about none of which are entirely problematic good or accurate This book asks whose vantage points on war are made available and where for public consumption it also questions whose war experiences are not represented are minimized or ignored in ways that advantage contemporary militarism Christine Sylvester looks at four sites of war memory the National Museum of American History the Vietnam Veterans Memorial Arlington National Cemetery and selected novels and memoirs of the American wars in Vietnam and Iraq to consider the way war knowledge is embedded in differing sites of memory and display While the museum shows war aircraft and a laptop computer used by a journalist covering the American war in Iraq visitors to the Vietnam Memorial or Arlington Cemetery find more prosaic and civilian items on view such as baby pictures slices of birthday cake or even car keys In addition memoirs and novels of these wars tend to curate ghastly horrors of wars as experienced by soldiers or civilians For Sylvester these sites of war memory and curation provide ways to understand dispersed war authority and interpretation and to consider which sites invite viewers to revere a war and which reflect personal experiences that show the undersides of these wars Sylvester shows that scholars policymakers and other citizens need to consider different types of situated memory and knowledge in order to fully grasp war rather than idealize it
