*Contemporary Chinese Novels and Short Stories, 1949-1974* Meishi Tsai, 1979      *Contemporary Chinese Novels and Short Stories, 1949-1974* Meishi Tsai, 2020-03-17 An annotated bibliography of contemporary Chinese novels and short stories published between 1949 and 1974 Includes succinct summaries and bibliographic details including references to translations for virtually all fictional works published in China during this period Also includes author title and subject indexes      *The United States and China* John King Fairbank, 1983 Focusing on China during the last twenty five years the author illuminates the country's traditions customs political structure and economy      **Seeing Stars** Dennis J. Frost, 2020-03-17 In *Seeing Stars* Dennis J. Frost traces the emergence and evolution of sports celebrity in Japan from the seventeenth through the twenty first centuries Frost explores how various constituencies have repeatedly molded and deployed representations of individual athletes revealing that sports stars are socially constructed phenomena the products of both particular historical moments and broader discourses of celebrity Drawing from media coverage biographies literary works athletes memoirs bureaucratic memoranda interviews and films Frost argues that the largely unquestioned mass of information about sports stars not only reflects but also shapes society and body culture He examines the lives and times of star athletes including sumo grand champion Hitachiyama female Olympic medalist Hitomi Kinue legendary pitcher Sawamura Eiji and world champion boxer Gushiken Yoko demonstrating how representations of such sports stars mediated Japan's emergence into the putatively universal realm of sports unsettled orthodox notions of gender facilitated wartime mobilization of physically fit men and women and masked lingering inequalities in postwar Japanese society As the first critical examination of the history of sports celebrity outside a Euro American context this book also sheds new light on the transnational forces at play in the production and impact of celebrity images and dispels misconceptions that sports stars in the non West are mere imitations of their Western counterparts      *Great Walls of Discourse and Other Adventures in Cultural China* Haun Saussy, 2020-03-23 China and the West us and them the subject and the non subject these and other dualisms furnish China watchers both inside and outside China with a pervasive ready made set of definitions immune to empirical disproof But what does this language of essential difference accomplish The essays in this book are an attempt to cut short the recitation of differences and to answer this question In six interpretive studies of China the author examines the ways in which the networks of assumption and consensus that make communication possible within a discipline affect collective thinking about the object of study Among other subjects these essays offer a historical and historiographical introduction to the problem of comparison and deal with translation religious proselytization semiotics linguistics cultural bilingualism writing systems the career of postmodernism in China and the role of China as an imaginary model for postmodernity in the West Against the reigning simplifications these essays seek to restore the interpretation of China to the complexity and impurity of the historical situations in which it is always caught The chief goal of the essays in this book is not

to expose errors in interpreting China but to use these misunderstandings as a basis for devising better methodologies for comparative studies

*Anarchist Modernity* Sho Konishi, 2020-05-11 Mid nineteenth century Russian radicals who witnessed the Meiji Restoration saw it as the most sweeping revolution in recent history and the impetus for future global progress Acting outside imperial encounters they initiated underground transnational networks with Japan Prominent intellectuals and cultural figures from Peter Kropotkin and Lev Tolstoy to Saigo Takamori and Tokutomi Roka pursued these unofficial relationships through correspondence travel and networking despite diplomatic and military conflicts between their respective nations Tracing these non state networks *Anarchist Modernity* uncovers a major current in Japanese intellectual and cultural life between 1860 and 1930 that might be described as cooperatist anarchist modernity a commitment to realizing a modern society through mutual aid and voluntary activity without the intervention of state governance These efforts later crystallized into such movements as the Nonwar Movement Esperantism and the popularization of the natural sciences Examining cooperatist anarchism as an intellectual foundation of modern Japan Sho Konishi offers a new approach to Japanese history that fundamentally challenges the logic of Western modernity It looks beyond this foundational construct of modern history writing to understand people practices and cultural expressions that have been forgotten or dismissed as products of anti modern nativist counter urges against the West

**The Red Brush** Wilt L. Idema, Beata Grant, 2020-03-23 One of the most exciting recent developments in the study of Chinese literature has been the rediscovery of an extremely rich and diverse tradition of women s writing of the imperial period 221 B C E 1911 C E Many of these writings are of considerable literary quality Others provide us with moving insights into the lives and feelings of a surprisingly diverse group of women living in Confucian China a society that perhaps more than any other is known for its patriarchal tradition Because of the burgeoning interest in the study of both premodern and modern women in China several scholarly books articles and even anthologies of women s poetry have been published in the last two decades This anthology differs from previous works by offering a glimpse of women s writings not only in poetry but in other genres as well including essays and letters drama religious writing and narrative fiction The authors have presented the selections within their respective biographical and historical contexts This comprehensive approach helps to clarify traditional Chinese ideas on the nature and function of literature as well as on the role of the woman writer

**Superstitious Regimes** Rebecca Nodostup, 2010-07-01 We live in a world shaped by secularism the separation of numinous power from political authority and religion from the political social and economic realms of public life Not only has progress toward modernity often been equated with secularization but when religion is admitted into modernity it has been distinguished from superstition That such ideas are continually contested does not undercut their extraordinary influence These divisions underpin this investigation of the role of religion in the construction of modernity and political power during the Nanjing Decade 1927 1937 of Nationalist rule in China This book explores the modern recategorization of religious practices and

people and examines how state power affected the religious lives and physical order of local communities It also looks at how politicians conceived of their own ritual role in an era when authority was meant to derive from popular sovereignty The claims of secular nationalism and mobilizational politics prompted the Nationalists to conceive of the world of religious association as a dangerous realm of superstition that would destroy the nation This is the first superstitious regime of the book's title It also convinced them that national feeling and faith in the party state would replace those ties the second superstitious regime     *Shredding the Tapestry of Meaning* John Solt, 2020-03-23 Kitasono Katue was a leading avant garde literary figure first in Japan and then throughout the world from the 1920s to the 1970s In his long career Kitasono was instrumental in creating Japanese language work influenced by futurism dadaism and surrealism before World War II and in contributing a Japanese voice to the international avant garde movement after the war This critical biography of Kitasono examines the life poetry and poetics of this controversial and flamboyant figure including his wartime support of the Japanese state Using Kitasono as a window on Japanese literature in the twentieth century John Solt analyzes the relationship of Japanese writers to foreign literary movements and the influence of Japanese writers on world literature     *From Miracle to Maturity* Barry Eichengreen, Dwight H. Perkins, Kwanho Shin, 2020-05-11 The economic growth of South Korea has been a remarkable success story After the Korean War the country was one of the poorest economies on the planet by the twenty first century it had become a middle income country a member of the Organization of Economic Cooperation and Development the club of advanced economies and home to some of the world's leading industrial corporations And yet many Koreans are less than satisfied with their country's economic performance given the continuing financial volatility and sluggish growth since the Korean economic crisis of 1997 1998 *From Miracle to Maturity* offers a comprehensive qualitative and quantitative analysis of the growth of the Korean economy starting with the aggregate sources of growth growth of the labor force the stock of capital and productivity and then delving deeper into the roles played by structural change exports foreign investment and financial development The authors provide a detailed examination of the question of whether the Korean economy is now underperforming and ask if so what can be done to solve the problem     *Power of Place* James Robson, 2020-03-17 Throughout Chinese history mountains have been integral components of the religious landscape They have been considered divine or numinous sites the abodes of deities the preferred locations for temples and monasteries and destinations for pilgrims Early in Chinese history a set of five mountains were co-opted into the imperial cult and declared sacred peaks yet demarcating and protecting the boundaries of the Chinese imperium The Southern Sacred Peak or Nanyue is of interest to scholars not the least because the title has been awarded to several different mountains over the years The dynamic nature of Nanyue raises a significant theoretical issue of the mobility of sacred space and the nature of the struggles involved in such moves Another facet of Nanyue is the multiple meanings assigned to this place political religious and cultural Of particular interest is the negotiation of this space by Daoists and Buddhists The history of their interaction leads

to questions about the nature of the divisions between these two religious traditions James Robson's analysis of these topics demonstrates the value of local studies and the emerging field of Buddhist Daoist studies in research on Chinese religion

**Spectacle and Sacrifice** David Johnson, 2020-03-17 This book is about the ritual world of a group of rural settlements in Shanxi province in pre 1949 North China Temple festivals with their giant processions elaborate rituals and operas were the most important influence on the symbolic universe of ordinary villagers and demonstrate their remarkable capacity for religious and artistic creation The great festivals described in this book were their supreme collective achievements and were carried out virtually without assistance from local officials or educated elites clerical or lay Chinese culture was a performance culture and ritual was the highest form of performance Village ritual life everywhere in pre revolutionary China was complex conservative and extraordinarily diverse Festivals and their associated rituals and operas provided the emotional and intellectual materials out of which ordinary people constructed their ideas about the world of men and the realm of the gods It is David Johnson argues impossible to form an adequate idea of traditional Chinese society without a thorough understanding of village ritual Newly discovered liturgical manuscripts allow him to reconstruct North Chinese temple festivals in unprecedented detail and prove that they are sharply different from the Daoist and Buddhist based communal rituals of South China

Realms of Literacy David B. Lurie, 2020-03-17 In the world history of writing Japan presents an unusually detailed record of transition to literacy Extant materials attest to the social cultural and political contexts and consequences of the advent of writing and reading from the earliest appearance of imported artifacts with Chinese inscriptions in the first century BCE through the production of texts within the Japanese archipelago in the fifth century to the widespread literacies and the simultaneous rise of a full fledged state in the late seventh and eighth centuries David B Lurie explores the complex processes of adaptation and invention that defined the early Japanese transition from orality to textuality Drawing on archaeological and archival sources varying in content style and medium this book highlights the diverse modes and uses of writing that coexisted in a variety of configurations among different social groups It offers new perspectives on the pragmatic contexts and varied natures of multiple simultaneous literacies the relations between languages and systems of inscription and the aesthetic dimensions of writing Lurie's investigation into the textual practices of early Japan illuminates not only the cultural history of East Asia but also the broader comparative history of writing and literacy in the ancient world

**When Empire Comes Home** Lori Watt, 2020-03-17 Following the end of World War II in Asia the Allied powers repatriated over six million Japanese nationals from colonies and battlefields throughout Asia and deported more than a million colonial subjects from Japan to their countries of origin Depicted at the time as a postwar measure related to the demobilization of defeated Japanese soldiers this population transfer was a central element in the human dismantling of the Japanese empire that resonates with other post colonial and post imperial migrations in the twentieth century Lori Watt analyzes how the human remnants of empire those who were moved and those who were left

behind served as sites of negotiation in the process of the jettisoning of the colonial project and in the creation of new national identities in Japan Through an exploration of the creation and uses of the figure of the repatriate in political social and cultural realms this study addresses the question of what happens when empire comes home Technology of Empire Daqing Yang, 2011-04-18 Nearly half a century ago the economic historian Harold Innis pointed out that the geographical limits of empires were determined by communications and that historically advances in the technologies of transport and communications have enabled empires to grow This power of communications was demonstrated when Japanese Emperor Hirohito's radio speech announcing Japan's surrender and the dissolution of its empire was broadcast simultaneously throughout not only the Japanese home islands but also all the territories under its control over the telecommunications system that had in part made that empire possible In the extension of the Japanese empire in the 1930s and 1940s technology geo strategy and institutions were closely intertwined in empire building The central argument of this study of the development of a communications network linking the far flung parts of the Japanese imperium is that modern telecommunications not only served to connect these territories but more important made it possible for the Japanese to envision an integrated empire in Asia Even as the imperial communications network served to foster integration and strengthened Japanese leadership and control its creation and operation exacerbated long standing tensions and created new conflicts within the government the military and society in general Experimental Arts in Postwar Japan Miryam Sas, 2020-03-17 In the years of rapid economic growth following the protest movements of the 1960s artists and intellectuals in Japan searched for a means of direct impact on the whirlwind of historical and cultural transformations of their time Yet while the artists often called for such direct encounter their works complicate this ideal with practices of interruption self reflexive mimesis and temporal discontinuity In an era known for idealism and activism some of the most cherished ideals intimacy between subjects authenticity a sense of home are limitlessly desired yet always just out of reach In this book Miryam Sas explores the theoretical and cultural implications of experimental arts in a range of media Casting light on important moments in the arts from the 1960s to the early 1980s this study focuses first on underground post shingeki theater and then on related works of experimental film and video buto dance and photography Emphasizing the complex and sophisticated theoretical grounding of these artists through their works practices and writings this book also locates Japanese experimental arts in an extensive sustained dialogue with key issues of contemporary critical theory

Negotiating Urban Space Si-yen Fei, 2020-03-17 Urbanization was central to development in late imperial China Yet its impact is heatedly debated although scholars agree that it triggered neither Weberian urban autonomy nor Habermasian civil society This book argues that this conceptual impasse derives from the fact that the seemingly continuous urban expansion was in fact punctuated by a wide variety of dynastic urbanisms Historians should the author contends view urbanization not as an automatic by product of commercial forces but as a process shaped by institutional frameworks and

cultural trends in each dynasty This characteristic is particularly evident in the Ming As the empire grew increasingly urbanized the gap between the early Ming valorization of the rural and late Ming reality infringed upon the livelihood and identity of urban residents This contradiction went almost unremarked in court forums and discussions among elites leaving its resolution to local initiatives and negotiations Using Nanjing a metropolis along the Yangzi River and onetime capital of the Ming as a central case the author demonstrates that prompted by this unique form of urban rural contradiction the actions and creations of urban residents transformed the city on multiple levels as an urban community as a metropolitan region as an imagined space and finally as a discursive subject Neo-Confucianism in History Peter K. Bol,2020-03-17

Where does Neo Confucianism a movement that from the twelfth to the seventeenth centuries profoundly influenced the way people understood the world and responded to it fit into our story of China s history This interpretive at times polemical inquiry into the Neo Confucian engagement with the literati as the social and political elite local society and the imperial state during the Song Yuan and Ming dynasties is also a reflection on the role of the middle period in China s history The book argues that as Neo Confucians put their philosophy of learning into practice in local society they justified a new social ideal in which society at the local level was led by the literati with state recognition and support The later imperial order in which the state accepted local elite leadership as necessary to its own existence survived even after Neo Confucianism lost its hold on the center of intellectual culture in the seventeenth century but continued as the foundation of local education It is the contention of this book that Neo Confucianism made that order possible *Gender Struggles* Christopher

Gerteis,2020-03-17 In the formative years of the Japanese labor movement after World War II the socialist unions affiliated with the General Council of Trade Unions the labor federation known colloquially as Sohyo formally endorsed the principles of women s equality in the workforce and put in place measures to promote women s active participation in union activities However union leaders did not embrace the legal framework for gender equality mandated by their American occupiers rather they pressured thousands of women labor activists to assume supportive roles that privileged a male centered social agenda By the late 1950s even Japan s radical socialist unions had reestablished the primacy of conservative gender norms channeling women s labor activism to support political campaigns that advantaged a male headed household and that relegated women s wage earning value to the periphery of the household economy By showing how unions raised the wages of male workers in part by transforming working class women into middle class housewives Christopher Gerteis demonstrates that organized labor s discourse on womanhood not only undermined women s status within the labor movement but also prevented unions from linking with the emerging woman led neighborhood centered organizations that typified social movements in the 1960s a misstep that contributed to the decline of the socialist labor movement in subsequent decades **Public Law, Private Practice** Darryl E. Flaherty,2020-03-17 Long ignored by historians and

repudiated in their time practitioners of private law opened the way toward Japan s legal modernity From the seventeenth to

the turn of the twentieth century lawyers and their predecessors changed society in ways that first samurai and then the state could not. During the Edo period 1600-1868 they worked from the shadows to bend the shogun's law to suit the market needs of merchants and the justice concerns of peasants. Over the course of the nineteenth century legal practitioners changed law from a tool for rule into a new epistemology and laid the foundation for parliamentary politics during the Meiji era 1868-1912. This social and political history argues that legal modernity sprouted from indigenous roots and helped delineate a budding nation's public and private spheres. Tracing the transition of law regimes from Edo to Meiji, Darryl E. Flaherty shows how the legal profession emerged as a force for change in modern Japan and highlights its lasting contributions in founding private universities, political parties, and a national association of lawyers that contributed to legal reform during the twentieth century.
