**The Sociological Revolution** Richard Kilminster, 2006-11-22 By controversially turning away from the current debates which surround social theory this book provides an historical analysis of the profound burden of sociology and its implications today

**Without God or His Doubles** Vaden House, 2022-02-07 Without God or His Doubles offers a sympathetic but critical interpretation of the philosophy of Richard Rorty Rorty is one of the most widely discussed of contemporary philosophers but there exist few attempts to deal with the full scope of Rorty's writings in a systematic fashion This book shows that the unifying theme that runs through Rorty's writings on epistemology the philosophy of science the philosophy of mind the philosophy of language and political philosophy is a quasi religious conception of human creativity and human freedom In other words Rorty's attempt to avoid both realism and relativism is best understood in relationship to his claim that traditional philosophy has been god obsessed The animating spirit of Rorty's philosophy is to complete the Enlightenment project to completely wean philosophy away from both God and the various god doubles Reason Nature Mind Man Science Art Rorty believes that a radical secularity will result in a kind of human emancipation and a heightened sense of human freedom The book concludes with a critique of Rorty's proposal for philosophy and culture after the final departure of all the gods

**Wittgenstein, Education and the Problem of Rationality** Michael A. Peters, 2021-01-21 This book develops an argument for a historicist and non foundationalist notion of rationality based on an interpretation of Wittgenstein of the Philosophical Investigations and On Certainty The book examines two notions of rationality a universal versus a constitutive conception and their significance for educational theory The former advanced by analytic philosophy of education as a form of conceptual analysis is based on a mistaken reading of Wittgenstein Analytic philosophy of education used a reading of Wittgenstein's philosophy of language to set up and justify an absolute universal and ahistorical notion of rationality By contrast the book examines the underlying influence of the later Wittgenstein on the historicist turn in philosophy of science as a basis for a non foundationalist and constitutive notion of rationality which is both historical and cultural and remains consistent with wider developments in philosophy hermeneutics and social theory This book aims to understand the philosophical motivation behind this view to examine its intellectual underpinnings and to substitute this universal conception of rationality by reference to a Hegelian interpretation of the later Wittgenstein that emphasizes his status as an anti foundational thinker

**Literary Hermeneutics** Tomasz Kalaga, 2015-06-18 This book analyses the most significant aspects of the evolutionary process which occurred in literary hermeneutics the shift from interpretation perceived as a methodology of reading to the ontological

function of exegesis Through the discussion of the theories of Friedrich Schleiermacher Eric Donald Hirsch Hans Georg Gadamer and Paul Ricoeur it focuses on the metamorphosis of the concepts of meaning interpretation and validity and demonstrates how the correlative changes in the essence and functions of these three elements transformed the art of understanding from being a methodological discipline to an ontological instrument for a re description of the interpreter s self The book highlights the development of those aspects of hermeneutic thought which are of particular significance in the contemporary debate over validity and criteria of interpretation The vision of hermeneutics proposed here contradicts the supposedly anachronistic character of the art of understanding and through a permanent departure from essentialist views and categories enables it to enter into a discussion with such literary orientations as neo pragmatism and reader response theory

**Emancipation and Illusion** Marie Fleming,2010-11-01

**Jurgen Habermas** Robert C. Holub,2013-01-11 The most important intellectual in the Federal Republic of Germany for the past three decades Habermas has been a seminal contributor to fields ranging from sociology and political science to philosophy and cultural studies Although he has stood at the centre of concern in his native land he has been less readily accepted outside Germany particularly in the humanities His theoretical work postulates the centrality of communication and understanding and as such his strategy of debate is marked by a politically informed unity of theory and practice Holub s book is the first detailed account of the major debates in which Habermas has engaged since the early sixties It stems from the conviction that his critics have not understood the political strategy behind his various interventions or the consistency that informs his intellectual activities Habermas is viewed in dialogue with important philosophical sociological and political currents in West Germany Holub demonstrates how Habermas pursues a course that incorporates various aspects of his opponents positions while simultaneously defending perceived threats to democracy and open discussion

**The Logic of the History of Ideas** Mark Bevir,2002-06-20 Human cultures generate meanings and the history of ideas broadly conceived is the study of these meanings An adequate theory of culture must therefore rest on a suitable philosophical enquiry into the nature of the history of ideas Mark Bevir s book explores the forms of reasoning appropriate to the history of ideas enhancing our understanding by grappling with central questions such as What is a meaning What constitutes objective knowledge of the past What are beliefs and traditions How can we explain why people held the beliefs they did The book ranges widely over issues and theorists associated with post analytic philosophy post modernism hermeneutics literary theory political thought and social theory

*Methodology for the Human Sciences* Donald E. Polkinghorne,1984-06-30 Methodology for the Human Sciences addresses the growing need for a comprehensive textbook that surveys the emerging body of literature on human science research and clearly describes procedures and methods for carrying out new research strategies It provides an overview of developing methods describes their commonalities and variations and contains practical information on how to implement strategies in the field In it Donald Polkinghorne calls for a renewal of debate over which methods are appropriate for the study of human beings proposing that

the results of the extensive changes in the philosophy of science since 1960 call for a reexamination of the original issues of this debate The book traces the history of the deliberations from Mill and Dilthey to Hempel and logical positivism examines recently developed systems of inquiry and their importance for the human sciences and relates these systems to the practical problems of doing research on topics related to human experience It discusses historical realism systems and structures phenomenology and hermeneutics action theory and the implications recent systems have for a revised human science methodology

*Performance Analysis* Madalena Soveral, Sara Zurletti, 2018-12-10 This collection of essays highlights different questions concerning music theory interpretation and performance Organized into four chapters the first section looks into interpretation from a hermeneutic perspective whereas the second analyses the application of this knowledge in musical practice The discussion turns in the third part to a new field of music theory broadly labelled as performance studies Focused on physical and psychological events this section broaches fundamental issues such as gesture bodily movement expression emotion a whole set of processes that act within the framework of performance The final section addresses the artistic practices in the 21st century across present day cultural contexts Proposing a space for reflection in which one tries to imagine the relation between the scientific field and the interpretative process this volume reflects the central issues of research in performance analysis establishing connections between different disciplines methodologies and research trends It will be of essential interest to researchers musicians and performers and music students
