Contemporary International Politics:

Politics Without Sovereignty Christopher Bickerton, Philip Cunliffe, Alexander Gourevitch, 2006-12 Written by leading scholars this volume challenges the recent trend in international relations scholarship the common antipathy to sovereignty The classical doctrine of sovereignty is widely seen as totalitarian producing external aggression and internal repression Political leaders and opinion makers throughout the world claim that the sovereign state is a barrier to efficient global governance and the protection of human rights Two central claims are advanced in this book First that the sovereign state is being undermined not by the pressures of globalization but by a diminished sense of political possibility Second it demonstrates that those who deny the relevance of sovereignty have failed to offer superior alternatives to the sovereign state Sovereignty remains the best institution to establish clear lines of political authority and accountability preserving the idea that people shape collectively their own destiny The authors claim that this positive idea of sovereignty as self determination remains integral to politics both at the domestic and international levels *Politics Without Sovereignty* will be of great interest to students and scholars of political science international relations security studies international law development and European studies *Contemporary World Politics* Francis James Brown, 1939 Contemporary International Politics Robert D. Cantor, 1986 International Relations, Political Theory and the Problem of Order N. J. Rengger, 1999-11-04 This book seeks to offer a general interpretation and critique of both methodological and substantive aspects of International theory Contemporary international relations. Shaw, Laura C. Mahrenbach, Renu Modi, Xu Yi-chong, 2018-12-19 Published 35 years after Palgrave Macmillan's landmark *International Political Economy* IPE series was first founded this Handbook captures the state of the art of contemporary IPE It draws on the series history of focusing on the oft neglected study of the global South Providing interdisciplinary perspectives from scholars hailing from the global North and South the Handbook illustrates the theoretical innovations and empirical richness necessary to explain today's ever changing world This is a world in which the global South and North are not only being transformed by the end of bipolarity and the rise of the BRICS but also by diverse global crises and growing

cross border challenges It is a world where human development governance and security are becoming ever more elusive where profoundly altered by the rise of new technologies the structure of relations between nations itself is changing becoming increasingly interconnected both digitally and physically Understanding these issues is of critical importance to better anticipate current and future global transformations This Handbook is the ideal primer for all scholars practitioners and policy makers looking to do so **Contemporary International Politics** Bruce L. Sanders, Alan C. Durbin, 1971

Contemporary Issues in Politics & International Relations Nesrin Kenar, 2021-12-26 Conflict is a phenomenon as old as human history Although the actors and reasons have changed conflicts have occurred in every period of history In the pre Cold War era conflicts in the international system were experienced between states The conflicts during the Cold War mainly were interstate conflicts arising from the rivalry between the two blocs In this period it was expected that the threat to the security of a state would come from outside the borders of the state and from other states For this reason all the regulations made by the League of Nations which was established at the end of the First World War and the United Nations which was established after the Second World War to protect international peace and security included the measures to be taken against the attack or threat of attack by one state against another state However the developments that took place right after the end of the Cold War confirmed that the risk of interstate conflict decreased and new security threats emerged in this period The conflicts that emerged in the post Cold War period were separatist conflicts due to ethnic and religious reasons such as the former Yugoslavia and Georgia or intra border conflicts that occurred for other reasons such as in Syria Upon the inadequacy of international organizations and international law to intervene in intra border conflicts the concept of security was redefined and a transformation from the security of the state to the security of the individual took place New security threats such as environmental security human security food security terrorism weapons of mass destruction and pandemics have been identified One of the reasons for the decrease in conflicts between states in the post Cold War period is that states mostly use soft power instead of military force in achieving their foreign policy goals The structure of the international system is also a dynamic that affects conflicts After the end of the bipolar system the transformation of the international system is not yet complete One of the most critical problems in today's world is the competition and struggle between states to become the future superpower While the US wants the current status quo to continue China is trying to change the status quo in its favour The European Union is to become the dominant power in the international system after its transformation in the post Cold War period Global Politics in a Multiplex Era: Contemporary International Trends 18-09-2025, This book emerges from a period of profound transformation in international politics As we navigate the complex terrain of the 21st century traditional frameworks for understanding global affairs have proven increasingly inadequate The post Cold War optimism about liberal internationalism has given way to a more complicated reality characterized by multiple centers of power diverse forms of governance and interconnected challenges that transcend

traditional boundaries In conceptualizing this project I have drawn inspiration from Amitav Acharya's notion of a Multiplex Era an international system that resembles a multiplex cinema where different movies or in this case different international orders run simultaneously on other screens with viewers or states and societies choosing which ones to watch This metaphor captures the complexity diversity and interconnectedness that define contemporary international politics better than traditional concepts like unipolarity bipolarity or multipolarity My aim in this book is to provide a comprehensive analysis of current trends in international politics through this multiplex lens Rather than offering simplistic predictions or prescriptions I aim to illuminate the multifaceted nature of contemporary challenges and opportunities providing scholars policymakers and citizens with analytical tools that can help them navigate this complex landscape

Reframing the Buffer State in Contemporary International Relations Bibek Chand, 2023-05-17 This book explores buffer states agency beyond being highly interactive spaces for the competing strategic and security interests of larger powers Analyzing 21 political events the author offers a new conceptual framework for the buffer state which emphasizes strategic utility and agency Applying this to the case study of Nepal as a buffer state between India and China he offers a systematic analysis of Sino Indian interests in the wider region and Nepal's interactions with and reactions to them and argues that the buffer state in contemporary international relations is characterized by intense competitive overtures from its contending neighboring states However the buffer state is not just a spectator but an active participant that consistently assesses and reassesses its geopolitical position in between much larger competing powers This reading offers a new understanding of the buffer state as a highly dynamic political space wherein the levels of influence and strategies of bigger powers can be examined Aimed at a multidisciplinary audience this book will be of particular interest to scholars practitioners and students of international relations security studies strategic studies and Asian Studies
