Nishi Amane and Modern Japanese Thought Thomas R.H. Havens, 2015-03-08 A nineteenth century aristocrat Nishi Amane 1829 1897 was one of the first Japanese to assert the supremacy of Western culture He was sent by his government to Leiden to study the European social sciences on his return to Japan shortly before the climactic Meiji Restoration of 1868 he introduced and adapted European utilitarianism and

positivism to his country's intellectual world. To modernize, Nishi held Japan must cast off the bonds of the Confucian world view in order to adopt new principles of empirical scholarly investigation and new standards of self improvement. Though a Confucian by upbringing, Nishi became thoroughly committed to Western intellectual values in his programs for the new Japanese society. In his roles of teacher, writer, and government administrator, he was influential at one of the most critical times in Japan's history. Postmodern, Feminist and Postcolonial Currents in Contemporary Japanese Culture Fuminobu Murakami, 2006-02-01. Using the Euro American theoretical framework of postmodernism, feminism, and postcolonialism, this book analyses the fictional and critical work of four contemporary Japanese writers: Murakami Haruki, Yoshimoto Banana, Yoshimoto Takaaki, and Karatani Kojin. In addition, the author reconsiders this Euro American theory by looking back on it from the perspective of Japanese literary work. Presenting outstanding analysis of Japanese intellectuals and writers who have received little attention in the West, the book also includes an extensive and comprehensive bibliography, making it essential reading for those studying Japanese literature, Japanese studies, and Japanese thinkers.

The Teaching and Teachings of Temple Buddhism in Contemporary Japan Stephen G. Covell, 2024-10-31. How have Buddhist teachings come to be in modern and contemporary Japan, and how are they taught? This pioneering work seeks to answer these questions by highlighting the public teachings of Temple Buddhism institutions, in particular Temple Buddhism kindergartens and Buddhist secondary schools and colleges. The community outreach provided by these Buddhist facilities is far greater than any other, with the possible exception of funerals; yet until now it has received little attention from scholars of Japanese religion. After determining what is taught in Buddhist education and how, Stephen Covell introduces readers to a select group of monks who undergo some of the most grueling practices in Japanese Temple Buddhism to determine if the public-facing teachings of Buddhist education are unique or similar to those of elite Buddhist practitioners. The teachings and sites of teaching examined here include, but are not limited to, classical doctrinal studies and temples focused on the education of Buddhist clergy. Covell uncovers the arguments made by priests involved in moral education, the dharma talks of famous ascetics, and the ways in which laws and legal codes have changed Buddhist education. He looks at what is taught on the ground, online, and in popular texts to discuss the current teachings embraced as Buddhism within the institutions of Temple Buddhism. Among his numerous findings is that such teachings and worldview are remarkably similar to those of New Religions and Buddhist lay movements as outlined by Japanese religion scholars and government bodies in charge of education. *The Teaching and Teachings of Temple Buddhism in Contemporary*

Question in China and Japan Germaine A. Hoston, 2021-02-09 The first decades of the twentieth century witnessed an explosion of nationalist sentiment in East Asia as in Europe This comprehensive work explores how radical Chinese and Japanese thinkers committed to social change in this turbulent era addressed issues concerning national identity social revolution and the role of the national state in achieving socio economic development Focusing on the adaptation of anarchism and then Marxism Leninism to non European contexts Germaine Hoston shows how Chinese and Japanese theorists attempted to reconcile a relatively new appreciation for the nation state with their allegiance to a vision of internationalist socialist revolution culminating in stateless socialism Given the influence of Western experience on Marxism Chinese and Japanese theorists found the Marxian national question to be not merely one of whether the working man has no country but rather the much more fundamental issue of the relative value of Eastern and Western cultures Marxism argues Hoston thus placed native Marxists in tension with their own heritage and national identity The author traces efforts to resolve this tension throughout the first half of the twentieth century and concludes by examining how the tension persists as Chinese and Japanese dissidents seek identity affirming modernity in accordance with the Western democratic model
