The book covers sources and methods that are well established in History such as archival research together with those that are less widely known. Even with more established methods however the aim is to present new insights and perspectives and to open researchers' minds to new methodological possibilities.

Handbook of International and Cross-Cultural Leadership Research Processes
Yulia Tolstikov-Mast, Franziska Bieri, Jennie L. Walker, 2021-11-29
An invaluable contribution to the area of leadership studies, the *Handbook of International and Cross Cultural Leadership Research Processes: Perspectives, Practice, Instruction* brings together renowned authors with diverse cultural, academic and practitioner backgrounds to provide a comprehensive overview and analysis of all stages of the research process. The handbook centers around authors' international research reflections and experiences with chapters that reflect and analyze various research experiences in order to help readers learn about the integrity of each stage of the international leadership research process with examples and discussions. Part I introduces philosophical traditions of the leadership field and discusses how established leadership and followership theories and approaches sometimes fail to capture leadership realities of different cultures and societies. Part II focuses on methodological challenges and opportunities. Scholars share insights on their research practices in different stages of international and cross cultural studies. Part III is forward looking in preparing readers to respond to complex realities of the leadership field: teaching, learning, publishing and applying international and cross cultural leadership research standards with integrity. The unifying thread amongst all the chapters is a shared intent to build knowledge of diverse and evolving leadership practices and phenomena across cultures and societies. The handbook is an excellent resource for a broad audience including scholars across disciplines and fields such as psychology, management, history, cognitive science, economics, anthropology, sociology and medicine as well as educators, consultants and graduate and doctoral students who are interested in understanding authentic leadership practices outside of the traditional Western paradigm.
