*Philosophy and the 'Dazzling Ideal' of Science* Graham McFee,2019-08-27 Recent decades have seen attacks on philosophy as an irrelevant field of inquiry when compared with science In this book Graham McFee defends the claims of philosophy against attempts to minimize either philosophy s possibility or its importance by deploying a contrast with what Wittgenstein characterized as the dazzling ideal of science This dazzling ideal incorporates both the imagined completeness of scientific explanation whereby completing its project would leave nothing unexplained and the exceptionless character of the associated conception of causality On such a scientistic world view what need is there for philosophy In his defense of philosophy and its truth claims McFee shows that rejecting such scientism is not automatically anti scientific and that it permits granting to natural science properly understood its own truth generating power Further McFee argues for contextualism in the project of philosophy and sets aside the pervasive and pernicious requirement for exceptionless generalizations while relating his account to interconnections between the concepts of person substance agency and causation

*Rethinking Thomas Kuhn's Legacy* Yafeng Shan,2024-08-09 Thomas Kuhn is widely considered as one of the most important philosophers of science in the 20th century and his *The Structure of Scientific Revolutions* is regarded as one of the most influential works in the philosophy of science This book not only revisits his legacy in the history and philosophy of science but also explores and

reflects on the prospect of the Kuhnian philosophy Moreover it includes the edited text of Kuhn's *Does Knowledge Grow* which was never published before Comprised of 15 newly written chapters by leading Kuhn scholars and philosophers of science across the globe from ten countries this book is of great interest to researchers and advanced students but also to general readers Studies in the Philosophy of Logic and Knowledge Timothy John Smiley, Thomas Baldwin, 2004 Questions about knowledge and about the relation between logic and language are at the heart of philosophy Eleven distinguished philosophers from Britain and America contribute papers on such questions All the contributions are examples of recent philosophy at its best The first half of the book constitutes a running debate about knowledge evidence and doubt The second half tackles questions about logic and its relation to language *Philosophy and Living* Ralph Blumenau, 2014-04-30

Philosophy can be very abstract and apparently remote from our everyday concerns In this book Ralph Blumenau brings out for the non specialist the bearing that thinkers of the past have on the way we live now on the attitude we have towards our lives towards each other and our society towards God and towards the ethical problems that confront us The focus of the book is those aspects of the history of ideas which have something to say to our present preoccupations After expounding the ideas of a particular thinker there follows a discussion of the material and how it relates to issues that are still alive today indented from the margin and set in a different typeface based on the author's classroom debates with his own students Another feature of the book is the many footnotes which refer the reader back to earlier and forward to later pages of the book They are intended to reinforce the idea that throughout the centuries philosophers have often grappled with the same problems sometimes coming up with similar approaches and sometimes with radically different ones *Agency and Self-awareness* Johannes Roessler, Naomi Eilan, 2003 Leading philosophers and psychologists join forces to investigate a set of problems to do with agency and self awareness in seventeen specially written essays In recent years there has been much psychological and neurological work purporting to show that consciousness and self awareness play no role in causing actions and indeed to demonstrate that free will is an illusion The essays in this volume subject the assumptions that motivate such claims to sustained interdisciplinary scrutiny Patients with Anarchic Hand syndrome sometimes find their hands perform apparently goal directed actions which the patients disown yet seem to be unable to suppress for example reaching out for someone else's food in a restaurant On the face of it these patients lack the kind of control and self awareness we ordinarily take ourselves to have when acting intentionally Questions raised by this phenomenon include What is involved in being aware of an action as one's own What is the nature of the control these patients are lacking and which characterizes normal intentional actions What is the relation between a priori explanations of consciousness and self consciousness on the one hand and empirical work on the information processing mechanisms involved in action control on the other Questions of action control and self awareness tend to be treated separately in both philosophy and psychology The central idea behind this volume is that outstanding unresolved issues on both topics and in both disciplines can only be

resolved by an interdisciplinary examination of the relations between them The editors useful introductory essay offers a guide to cross disciplinary reading of the contributions and makes connections between them explicit The book will be compulsory reading for psychologists and philosophers working on action explanation and for anyone interested in the relation between the brain sciences and consciousness

**Social Efficiency and Instrumentalism in Education** James M. Magrini, 2014-04-03 Distinct among contemporary philosophical studies focused on education this book engages the history of phenomenological thought as it moves from philosophy proper the European phenomenological hermeneutic tradition through curriculum studies It thus presents the best of both worlds for the reader there is a play or movement from philosophy proper to educational philosophy and then back again in order to locate and explicate what is intimated suggested and in some cases left unsaid by educational philosophers This amounts to a work on education philosophy that elucidates through various permutations within the unique foci of each essay the general phenomenological theme of the fundamental ontology of the human being as primordial learner Reflecting his experience as scholar teacher and perennial learner the author suggests how research in phenomenology might prove beneficial to the enhancement of both the theoretical and practical aspects of education readers are invited to envision education as far more than merely a means by which to organize an effective learning experience in which knowledge is assimilated and skill sets are efficiently imparted but rather as a holistic and integrated process in which knowing acting and valuing are original ways of Being in the world

*Could there have been Nothing?* Geraldine Coggins, 2010-11-24 The first book length study of metaphysical nihilism an analytical treatment of one of the most intriguing and fundamental questions in contemporary analytic metaphysics Could there have been nothing at all No physical universe no people no living beings no planets no atoms no matter no energy nothing
