President, 1967 Social Problems Donileen R. Loseke, Joel Best, 2003 This collection of focused essays is directed at several levels of students of social problems It is accessible to the uninitiated who are not familiar with the constructionist literature and aimed at those who are not particularly interested in subtle theoretical and empirical issues of concern to academics studying social problems from constructionist perspectives Some readings focus on the construction of problems by scientists and other professionals others examine the work of social activists mass media and social service personnel Among the topics included are studies of social inequalities and individual deviance a comparison of the images of social problems in the United States with those in other countries and an examination of the importance of politics and power in constructing public images of social problems Constructionist perspectives have become the leading theoretical approach for sociology and allied fields in studying social problems Yet constructionists impact on the teaching of social problems has been far less dramatic Undergraduate courses on social problems are often subject to a theoretical barrage of eclectic perspectives Just as the first social problems textbooks did almost a century ago textbooks continue to present a series of unrelated chapters each devoted to a particular social problem Social Problems is an effort at systematic analysis rather than random thought on the subject Social Problems presents detailed case studies demonstrating how constructionist perspectives can actually be applied to understand particular social problems While these articles can be read alone the editors have organized these selections to correspond with the chapter topics in the second edition of Donileen Loseke's Thinking about Social Problems an accessible introduction to constructionist approaches At the same time some instructors who use this edited collection might wish to provide their own mix to the selection process Many of the contributions make multiple points and so reasonably could be used to illustrate other basic texts or classic studies in the field of social problems Donileen R Loseke is professor of sociology at the University of South Florida Joel Best is professor and chair Department of Sociology and Criminal Justice University of Delaware He has

also served as an advisory editor for Aldine in the area of social problems *Social Work and Disadvantage* Jonathan Parker, Peter B Burke, 2006-09-15 *Social Work and Disadvantage* explains the impact of stigmatization on siblings families and workers in the caring professions and its consequences for the people it affects and for society as a whole Contributors provide evidence from research and professional practice on transferability of health and social problems **European Social Problems** Stuart Isaacs, 2017-06-26 *European Social Problems* is the first book to examine social issues in Europe from the perspective of the social sciences It considers many of these social problems following the UK's leave vote Key topics examined here include immigration multiculturalism and religion health inequalities education riots and protest drugs and crime sexuality These core issues run as a thread through Europe and are experienced by Europeans themselves as social problems As such this text facilitates students direct engagement with some of the problematic constituents in their own lives This text is suitable for those studying social policy sociology politics international relations criminology and education studies In this way it functions as an accessible reader for final year undergraduates as well as postgraduate students **Patterns and consequences of drug use.- v.2.
