labour relations effects Graphs references and statistical tables      *Barriers to Entry* C.C.v. Weizsäcker, 2012-12-06 I was originally induced to think about barriers to entry by some research done for Charles River Associates Inc Boston on behalf of their client IBM Corporation Armonk N Y After the end of this research project I continued to work on entry barriers and related issues of market structure The results of this effort are reported here What I present is not a book in the traditional sense of the word Due to other research and administrative obligations I could not without substantial delay present a more finished product The rapid progress in the field of industrial organisation theory made me fear that my results could become obsolete if I further waited with their publication I hope that the early presentation of a progress report rather than a much later publication of a finished product is not only in my interest but also in the interest of economics      *Theory and Estimation of Macroeconomic Rationing Models* H.R. Sneessens, 2012-12-06 Introducing his book *The Theory of Unemployment Reconsidered* Professor Malinvaud expressed several years ago his hope to convey his strong belief that the reconsideration is a major step in the development of our science In view of the stimulating effect this approach has on economic research it seems now that many economists do indeed share Malinvaud's belief and are ready to devote their time and their skill to ensure the realization of that progress This book grown out of a Ph D thesis presented at the Universit Catholique de Louvain aims at contributing in its own way to that venture Looking towards econometric applications it illustrates that a framework which Malinvaud is based on the theory of temporary equilibrium with rationing provides the means of improving macro econometric modelling There has been so far a wide and pervasive fear that despite its analytical and theoretical usefulness the quantity rationing approach would be much too complex to be successfully implemented into econometric models The research the interested reader will discover in the subsequent pages should convince him that the difficulty faced by econometricians is essentially I am tempted to say merely one of developing an adequate methodology it should thus disappear once is made the initial research investment The empirical results presented towards the end of the book though preliminary already suggests that the effort is rewarding and should be continued My debts are many
