Representations of Child Soldiers in Contemporary African Narratives Ademola Adesola, 2024-09-11 In Representations of Child Soldiers in Contemporary African Narratives Ademola Adesola examines the dominant factors that writers privilege in their portrayals of child soldiering in sub Saharan Africa In his textual interpretive analyses of selected novels in the African child soldier genre Adesola contends that critical discussions of African child soldier literature have depended on the interpretive frameworks supplied by Western humanitarian discourses which oversimplify and de historicize experiences of war in Africa The author argues that such reductive decontextualization of war realities serve to champion a narrow vision of war in African contexts centered on a moral and humanitarian urge for Western intervention Regardless of whether the casus belli legitimating those wars are genuine or not those conflicts and children s involvement in them are understood within the same racist colonial and ethnocentric stereotypes about Africa that have been privileged in Western thought and the Western moral political imagination for centuries Thus in studying African child soldier narratives this book provides an alternative reading of novels whose settings feature African ethnopolitical conflicts such as in Sierra Leone Liberia Congo Brazzaville Nigeria notable for their exploitation of children for military ends The author maintains that these works are significant in the varying ways they reify and challenge the Western ideas of child and childhood as well as privilege child soldiers as social actors whose intricate makeups disavow being simply understood as innocent victims or irredeemable perpetrators of atrocities

The Future of Aid Jonathan Glennie, 2020-11-29 International cooperation has never been more needed but the current system of aid is outdated and ineffective The Future of Aid calls for a wholesale restructuring of the aid project a totally new approach fit for the challenges of the 21st century Global Public Investment Across the world billions of people are struggling to get by in unequal and unsustainable societies and international public finance which should be part of the answer is woefully deficient Engagingly written by a well known

expert in the field The Future of Aid calls for a series of paradigm shifts From a narrow focus on poverty to a broader attack on inequality and sustainability From seeing international public money as a temporary last resort to valuing it as a permanent force for good From North South transfers to a collective effort with all paying in and all benefitting From outdated post colonial institutions to representative decision making From the othering and patronising language of foreign aid to the empowering concept of Global Public Investment Ten years ago in The Trouble with Aid Jonathan Glennie highlighted the dangers of aid dependency and the importance of looking beyond aid Now he calls for a revolution in the way that we think about the role of public money to back up our ambitious global objectives In the wake of the COVID 19 crisis it is time for a new era of internationalism The SAGE Encyclopedia of Children and Childhood Studies Daniel Thomas
