Contemporary International Theory And The Behavior Of States:

The Soviet Study of International Relations Allen Lynch, 1989-07-28 Current divergence from traditional Leninist orthodoxy is attributed to such phenomena as nuclear warfare continued Western prosperity and the Sino Soviet split according to this systematic analysis of Soviet foreign policy

Contemporary international theory and the behavior of states Joseph Frankel, 1973 *International Relations in the Nuclear Age* Henry L. Bretton, 1985-11-01 This timely introduction to the study of international relations places special emphasis on the politics of international economics and the nuclear threat Written for beginning students the book combines comprehensive and realistic introductory material basic to the study of international relations with in depth case studies of major issues and problem areas such as management of the world economy and management of world military power East West and North South rich nation vs poor nation conflicts and the struggle for resources and ways and means of preventing World War III Readers untrained in economics will find the subject matter introduced before it is discussed in its applied form Henry L Bretton has published widely on Western and non Western government politics and international relations He is currently Distinguished Professor of Political Science at the State University of New York College at Brockport

Power, Politics, Law: International Law and State Behaviour During International Crises Radhika Withana, 2008-07-31 This volume addresses the question as to where international law fits into the making and implementation of foreign policy during an international crisis in which a State is considering and or may actually use force Empirical literature on the law State behaviour relationship during international crises has not been able to answer this question adequately The limitations of existing empirical literature are identified as stemming from the limitations of existing positivist realist and functionalist theoretical explanations of the law State behaviour relationship These theoretical approaches which underpin existing empirical literature on international crises assume that international law matches what is referred to in this book as its rule book image This is the notion of international law as a finite set of objective politically neutral rules that can be applied so as to distinguish objectively between legal and illegal action The rule book image of international law does not match reality but the assumption that it is true underpins both theoretical literature and references to international law in political rhetoric The rule book image and the reality of international law have been reconciled within the theory of International law as Ideology ILI as developed by Shirley Scott This book hypothesises that an ILI perspective offers a better explanation of the law State behaviour relationship during international crises than rival explanations grounded in positivism realism or functionalism Four case studies of State behaviour of the US the Soviet Union and the PRC during the Korean War 1950 1953 of the US and UK during the Suez crisis 1956 of the US and the Soviet Union during the Cuban Missile Crisis 1962 and of the US and an alliance of Latin American States during the Dominican Republic crisis 1965 are used to test the hypothesis The findings confirm the greater explanatory efficacy of ILI and demonstrate that the significance of international law to foreign policy decision making during international crises is more than that of

detering the use of force as is assumed by rival theoretical approaches grounded in a rule book image of international law International law is shown to serve as a vehicle for inter State competition during international crises *International Relations Theory and the Asia-Pacific* G. John Ikenberry, Michael Mastanduno, 2003 Looking at approaches to understanding the interactions among three critical players China Japan and the United States the authors of this text show that understanding the effects of cultural divides between Asian and American policymakers is crucial to building effective policies in the future Contemporary International Law and China's Peaceful Development Lingliang Zeng, 2020-10-30 This book discusses selected frontier and hot theoretical and practical issues of international law in the 21st century and in the process of China's peaceful development strategy such as interactions between harmonious world international law and China's peaceful development close connections of China rule of law with international rule of law issues of international law resulted from the war of Former Yugoslavia establishment of ICC DPRK nuclear test Iraq War Independence of Crimea features of WTO rule of law and its challenges as well as legal and practical disputes between China and other members in the WTO recent tendency of regional trade agreements and characteristics of Chinese practices in this aspect legal issues in relations between China and the European Union with a view of the framework of China EU Comprehensive Strategic Partnership War and Change in World Politics Robert Gilpin, 1981-10-30 War and Change in World Politics introduces the reader to an important new theory of international political change Arguing that the fundamental nature of international relations has not changed over the millennia Professor Gilpin uses history sociology and economic theory to identify the forces causing change in the world order The discussion focuses on the differential growth of power in the international system and the result of this unevenness A shift in the balance of power economic or military weakens the foundations of the existing system because those gaining power see the increasing benefits and the decreasing cost of changing the system The result maintains Gilpin is that actors seek to alter the system through territorial political or economic expansion until the marginal costs of continuing change are greater than the marginal benefits When states develop the power to change the system according to their interests they will strive to do so either by increasing economic efficiency and maximizing mutual gain or by redistributing wealth and power in their own favour **Ancient Chinese Thought, Modern Chinese Power** Yan Xuetong, 2013-08-25 From China's most influential foreign policy thinker a vision for a Beijing Consensus for international relations The rise of China could be the most important political development of the twenty first century What will China look like in the future What should it look like And what will China's rise mean for the rest of world This book written by China's most influential foreign policy thinker sets out a vision for the coming decades from China's point of view In the West Yan Xuetong is often regarded as a hawkish policy advisor and enemy of liberal internationalists But a very different picture emerges from this book as Yan examines the lessons of ancient Chinese political thought for the future of China and the development of a Beijing consensus in international relations Yan it becomes clear is neither a communist who

believes that economic might is the key to national power nor a neoconservative who believes that China should rely on military might to get its way Rather Yan argues political leadership is the key to national power and morality is an essential part of political leadership Economic and military might are important components of national power but they are secondary to political leaders who act in accordance with moral norms and the same holds true in determining the hierarchy of the global order Providing new insights into the thinking of one of China's leading foreign policy figures this book will be essential reading for anyone interested in China's rise or in international relations Contender States and Modern Chinese International Thought Ferran Perez Mena, 2024-05-17 This book contends that the development of modern Chinese international thought has been profoundly shaped by the distinctive nature of the Chinese state as a contender state and its global positioning since 1912 The argument posited demonstrates that notwithstanding the varied perspectives on the international held by Chinese intellectuals throughout the 20th century there exist commonalities across the periods analyzed in this book In essence the book emphasizes that the shared elements influencing the production of modern Chinese international thought do not derive from a unified cultural Chinese identity but rather stem from China's evolving geopolitical position in the modern world *The Routledge Handbook of Russian International Relations Studies* Maria Lagutina, Natalia Tsvetkova, Alexander Sergunin, 2023-02-27 This handbook examines the study of international relations IR in Russia giving a comprehensive analysis of historical theoretic conceptual geographical and institutional aspects It identifies the place and role of Russia in global IR and discusses the factors that facilitate or impede the development of Russian IR studies The contributors represent diverse Russian regions and IR schools and offer an overview of different intellectual traditions and key IR paradigms in the post Soviet era Filling the vacuum in international understanding of the Russian perspective on pivotal international issues they demonstrate the continuity and change in Russia's international policy course over the past three decades and explain how different foreign policy schools and concepts have affected Russian foreign policy making and the decision making process Providing a unique contribution to the discussion on non Western IR theory this handbook will appeal to scholars and students of international relations Russian studies world politics and international studies **The G20 and International Relations Theory** Steven Slaughter, Edward Elgar Publishing, 2019 The future of the G20 is uncertain despite being developed to address the 2008 global financial crisis This book considers the significance of the G20 by engaging various accounts of International Relations theory to examine the political drivers of this form of global governance International Relations theory represents an array of perspectives that analyse the factors that drive the G20 how the G20 influences world politics and in what ways the G20 could or should be reformed in the future People (Jen), State and Inter-state Relations Huipeng Shang, 2023-10-17 This book explores the relationship between the human constant Jen of the four large scale civilizational societies China the USA Japan and India and their international behavior response patterns and interaction with the international system The book analyzes the characteristics and limitations of the current

international system as well as the way it is related to the Western type of human constant It also analyzes the challenges facing China in its integration into the international system This book aims to explore international relations from the combined psychological and cultural perspective The key concept of this book is Jen which contains a distinct Chinese cultural experience into the theory of international relations Unlike other IR books to treat state as the main political actor the book analyzes both the political aspects of state as an organizational entity and its civilizational aspects as a civilizational entity hence it proposes a new ontology of international relations By integrating the concept of Jen based on the unique Chinese cultural experience into the theory of international relations the book reveals the interactive nature of relationship between the international system and human constant The book explains the causal relationship between state s behavior and its human constant analyzes the cultural characteristics of state actors and the international system and tries to provide a new theoretical framework for understanding culture and modernity **International Relations** Manuela

Spindler,2013-04-10 The book is written for active learners those keen on cutting their own path through the complex and at times hardly comprehensible world of THEORY in International Relations To aid this process as much as possible this book employs the didactical and methodical concept of integrating teaching and self study The criteria for structured learning about IR theory will be derived from an extensive discussion of the questions and problems of philosophy of science Part 1 Theory of IR refers to the scientific study of IR and covers all of the following subtopics the role and status of theory in the academic discipline of IR the understanding of IR as a science and what a scientific theory is the different assumptions upon which theory building in IR is based the different types of theoretical constructions and models of explanations found at the heart of particular theories and the different approaches taken on how theory and the practice of international relations are linked to each other The criteria for the structured learning process will be applied in Part 2 of the book during the presentation of five selected theories of International Relations The concept is based on learning through example that is the five theories have been chosen because when applying the criteria developed in Part 1 of the book each single theory serves as an example for something deeply important to learn about THEORY of IR more generally Human Rights in the World

International Relations Thomas J. Biersteker,Peter J. Spiro,Chandra Lekha Sriram,Veronica I. Raffo,2006-10-19 This unique volume examines the opportunities for and initiates work in interdisciplinary research between the fields of

international law and international relations disciplines that have engaged little with one another since the Second World War. Written by leading experts in the fields of international law and international relations, it argues that such interdisciplinary research is central to the creation of a knowledge base among IR scholars and lawyers for the effective analysis and governance of macro and micro phenomena. International law is at the heart of international relations, but due to challenges of codification and enforceability, its apparent impact has been predominantly limited to commercial and civil arrangements. International lawyers have been saying for years that law matters in international affairs, and now current events are proving them right. International Law and International Relations makes a powerful contribution to the theory and practice of global security by initiating a research agenda, building an empirical base, and offering a multidisciplinary approach that provides concrete answers to real-world problems of governance. This book will be of great interest to all students of international law, international relations, and governance.

Global International Relations in Southeast Asia Chanintira na Thalang, Yong-Soo Eun, 2024-08-02. This edited volume explores the contours of Global International Relations (IR) in terms of teaching and research in Southeast Asia and China, with the purpose of revealing existing and hidden pre-theories, conceptual frameworks, and theoretical contributions to Global IR rooted in local histories, contemporary experiences, and indigenous thought. The exploration is conducted within a context where scholars across regions are progressively taking strides to reshape IR, which has long gravitated towards Western experiences, thought, and knowledge into a more inclusive discipline. Otherwise known as the Global IR project, these efforts aim not only to amplify marginalized voices and experiences but also introduce new conceptual and theoretical tools derived from a diverse range of experiences. While some of these insights provide new understandings, others offer useful implications that transcend national and regional boundaries, fostering cross-regional discussions about the diverse realities within our world. An essential read for scholars and students of IR with an interest in Global IR, IR theory in general, and the development of IR in parts of Southeast Asia.

Darwin and International Relations Bradley A. Thayer, 2014-07-11. Pathbreaking and controversial, *Darwin and International Relations* offers the first comprehensive analysis of international affairs of state through the lens of evolutionary theory. Bradley A. Thayer provides a new method for investigating and explaining human and state behavior while generating insights into the origins of human and animal warfare, ethnic conflict, and the influence of disease on international relations. Using ethnological and statistical studies of warfare among tribal societies, Thayer argues that humans wage war for reasons predicted by evolutionary theory: to gain and protect vital resources but also for the physically and emotionally stimulating effects of combat. Thayer demonstrates that an evolutionary understanding of disease will become a more important part of the study of international relations as new strains of diseases emerge and advances in genetics make biological warfare a more effective weapon for states and terrorists. He also explains the deep causes of ethnic conflict by illuminating how xenophobia and ethnocentrism evolved in humans. He notes that these behaviors once contributed to our

ancestors success in radically different environments but they remain a part of us Darwin and International Relations makes a major contribution to our understanding of human history and the future of international relations
