Contemporary Issues in the Worldwide Anglican Communion offers unique perspectives on an organisation undergoing significant and rapid change with important religious and wider sociological consequences. The book explores what the academic research community, Anglican clergy and laypeople are suggesting are critical issues facing the Anglican communion as power and authority relations shift, including gender roles, changing families, challenges of an aging population, demands and opportunities generated by young people, mobility and mutations of worship communities, contested conformities to policies surrounding sexual orientation, impact of social class and income differences, variable patterns of congregational growth and decline, and global power and growth shifts from north to south.

Sexual Conduct

William Simon, John Gagnon, 2011-12-31 The first edition of Sexual Conduct published in 1973 swiftly became a landmark text in the sociology of sexuality It went on to profoundly shape the ideas of several generations of scholars and has become the foundation text of what is now known as the social constructionist approach to sexuality The present edition revised updated and containing new introductory and concluding materials introduces a classic text to a new generation of students and professionals Traditional views of human sexuality posit models of man and woman in which biological arrangements are translated into sociocultural imperatives This is best summarized in the phrase anatomy is destiny Consequently the almost exclusive concern has been with the power of biology and nature in sexual conduct as opposed to understanding the significance and impact of social life In Sexual Conduct Gagnon and Simon lucidly argue that sexual activities of all kinds may be understood as the outcome of a complex psychosocial process of development Using the social script theory the authors trace the ways in which sexuality is learned and fitted into particular moments in the lifecycle and in different modes of behavior Sexual Conduct is a major attempt to consider sexuality within a non biological social psychological framework It is a valuable

addition to the study of human sexuality and will be of interest to students of sociology psychology psychiatry social work and medicine

Current Issues in Clinical Psychology Eric Karas,2012-12-06 This is the third volume in the series of books based on the Annual Merseyside Course in Clinical Psychology In common with its predecessors its aim is to present a number of topics of interest to practitioners researchers trainers and trainees in the field with the intent not only to inform but variously also to question and to guide further enquiry Selection for this volume has taken a somewhat different stance to the previous two Whereas in former volumes an attempt has been made to cover standard areas of general and scientific interest to psychologists and others in related professions such as anorexia nervosa forensic issues long term care mental handicap community psychology anxiety and depression in this one issues which are of equal relevance but not necessarily of equal prominence in psychological texts are included We have not however neglected those areas more readily recognized as of major clinical import which are being progressively covered in this series This year we have the section Bereavement and the Care of the Dying Although for many this may not be a main focus it is a subject that few helpers do not encounter either directly or indirectly with their clients It would be impossible for this subject to not reflect the most human side of the caring professions and it is perhaps in this field that the objective subjective dilemma of the clinician can be seen in its most acute form
