Author: Knud Illeris (2003). *Three Dimensions of Learning: Contemporary learning theory in the tension field between the cognitive, the emotional and the social*. 272 pages. Paperback. Malabar, Florida: Krieger. ISBN: 87 7867 1213

Review by: Krista Poscente, University of Calgary, Canada.

Three Dimensions of Learning: Contemporary learning theory in the tension field between the cognitive, the emotional and the social by Knud Illeris intends to “present a generally accessible, coherent understanding of human learning...and attempts to cover the whole subject area in accordance with current knowledge in this field” (p. 21). With this ambitious intention, Illeris provides a comprehensive review of learning theory. Initially, Illeris examines each dimension of cognitive, emotional and social learning separately. Later, Illeris integrates the separate dimensions to explain the complex learning process as one whole.

Illeris intended this book to be a textbook covering the entire breadth of current learning theories. As such, the intended audience would primarily be academics concerned with education and learning. To shape Illeris’ theory of learning, he briefly summarizes viewpoints from many different scholars and theorists. Such brevity requires a certain amount of familiarity with learning theories and theorists. The *Three Dimensions of Learning* is not light reading material, but it is well worth the required concentration.

The structure of the book and the development of Illeris’ understanding of the learning process are clearly laid out in the first chapter. Every chapter ends with an excellent summary of the key points. These summaries simplify the complexity of the ideas Illeris illustrates in each chapter.

Chapter One begins with Illeris’ definition of learning. Illeris defines three different processes of learning: cognitive process, emotional process, and social process. These processes can be studied independently, but they occur simultaneously. Illeris clearly states that learning is a holistic human process, yet he neglects to recognize other possible dimensions of learning such as physical or spiritual.

The next two chapters cover the cognitive learning process or “how we learn something” (p. 63). Illeris begins with Piaget and thus rejects the behaviourist paradigm. Kolb’s model of experiential learning is an important component to Illeris’ definition of learning. There are two German words for the English word experience: Erlebnis (life experience) and Erfahrung (effected consciousness). The cognitive dimension of learning refers to Erfahrung, an event of understanding. Included in the cognitive domain are reflection, meta-learning and Mezirow’s
