Blevins, 2016 This volume provides an introduction to word and paradigm models of morphology and the general perspectives on linguistic morphology that they embody The recent revitalization of these models is placed in the larger context of the intellectual lineage that extends from classical grammars to current information theoretic and discriminative learning paradigms The synthesis of this tradition outlined in the volume highlights leading ideas about the organization of morphological systems that are shared by word and paradigm approaches along with strategies that have been developed to formalize these ideas and ways in which the ideas have been validated by experimental methodologies An extended comparison of contemporary word and paradigm variants isolates the central assumptions about morphological units and relations that distinguish implicational from realizational models and clarifies the relation of these models to morpheme based accounts Designed to be accessible to a wide readership this book will serve both as an introduction to morphology and morphological theory from the word and paradigm perspective for non specialists and for morphologists as a detailed account of the history of the ideas that underlie these models      *Olivier Messiaen's System of Signs* Andrew Shenton, 2017-07-05 Andrew Shenton's groundbreaking cross disciplinary approach to Messiaen's music presents a systematic and detailed examination of the compositional techniques of one of the most significant musicians of the twentieth century as they relate to his desire to express profound truths about Catholicism It is widely accepted that music can have mystical and transformative powers but because pure music has no programme Messiaen sought to refine his compositions to speak more clearly about the truths of the Catholic faith by developing a sophisticated semiotic system in which aspects of music become direct signs for words and concepts Using interdisciplinary methodologies

drawing on linguistics cognition studies theological studies and semiotics Shenton traces the development of Messiaen's sign system using examples from many of Messiaen's works and concentrating in particular on the *Motations sur le mystère de la Sainte Trinité* or organ suite which contains the most sophisticated and developed use of a sign system and represents a profound exegesis of Messiaen's understanding of the Catholic triune God By working on issues of interpretation Shenton endeavours to bridge the traditional gap between scholars and performers and to help people listen to Messiaen's music with spirit and understanding
