**Evil and a Selection of its Theological Problems** Benjamin Arbour,John R. Gilhooly,2017-01-06 Recent formulations of the inductive continual problem of evil require us to consider new responses to the charge that there is something irrational about believing in God given the type and amount of evil in the world Furthermore fresh approaches to the problem of evil offer suggestive ways to enter a new line of inquiry in regards to both theistic defences against various articulations of the problem of evil and also theodicy Finally developments in contemporary theology especially analytic philosophical theology likewise require new treatments of the problem of evil This volume on the problem on evil presents a series of essays that incorporate responses to these developments The articles fall

into three broad sections The first critiques and examines the analytic inductive problem of evil on the basis of its modal underpinnings the discourse of possible worlds and issues related to hiddenness and vagueness The second part presents a narrative response to the problem of evil Its approaches attempt to show the way in which peculiar features of narrative such as dramatic irony verisimilitude and distinctions between person type propositions offer fresh ways to encapsulate our feelings about evil and our response to the theological problems raised by encounters with evil Such existential concerns are valuable for our thinking about these matters The third section relates the problem of evil to developments in contemporary analytic theology such as open theism idealism and the felix culpa theodicy

symposium In every case discussion at the symposium led to revisions in some cases to extensive revisions The editor suggested still further revisions but in every case the author was the final judge of the work that appears under his name

**Vision and Mind** Alva Noë, Evan Thompson, 2002-10-25 The philosophy of perception is a microcosm of the metaphysics of mind Its central problems What is perception What is the nature of perceptual consciousness How can one fit an account of perceptual experience into a broader account of the nature of the mind and the world are at the heart of metaphysics Rather than try to cover all of the many strands in the philosophy of perception this book focuses on a particular orthodoxy about the nature of visual perception The central problem for visual science has been to explain how the brain bridges the gap between what is given to the visual system and what is actually experienced by the perceiver The orthodox view of perception is that it is a process whereby the brain or a dedicated subsystem of the brain builds up representations of relevant figures of the environment on the basis of information encoded by the sensory receptors Most adherents of the orthodox view also believe that for every conscious perceptual state of the subject there is a particular set of neurons whose activities are sufficient for the occurrence of that state Some of the essays in this book defend the orthodoxy most criticize it and some propose alternatives to it Many of the essays are classics Contributors G E M Anscombe Dana Ballard Daniel Dennett Fred Dretske Jerry Fodor H P Grice David Marr Maurice Merleau Ponty Zenon Pylyshyn Paul Snowdon and P F Strawson

**Niels Bohr and Contemporary Philosophy** J. Faye, H. Folse, 2013-03-09 Since the Niels Bohr centenary of 1985 there has been an astonishing international surge of scholarly analyses of Bohr's philosophy Now for the first time in *Niels Bohr and Contemporary Philosophy* Jan Faye and Henry Folse have brought together sixteen of today's leading authors who have helped mould this new round of discussions on Bohr's philosophy In fifteen entirely new previously unpublished essays we discover a surprising variety of the different facets of Bohr as the natural philosopher whose framework of complementarity shaped the final phase of the quantum revolution and influenced two generations of the century's leading physicists There is much on which the authors included here agree but there are also polar disagreements which assure us that the philosophical questions revolving around Bohr's new viewpoint will continue to be a subject of scholarly interest and discussion for years to come This collection will interest all serious students of history and philosophy of science and foundations of physics

Contemporary Philosophical Naturalism and Its Implications Bana Bashour, Hans D. Muller, 2013-10-15 One of the most pervasive and persistent questions in philosophy is the relationship between the natural sciences and traditional philosophical categories such as metaphysics epistemology and the mind Contemporary Philosophical Naturalism and Its Implications is a unique and valuable contribution to the literature on this issue It brings together a remarkable collection of highly regarded experts in the field along with some young theorists providing a fresh perspective This book is noteworthy for bringing together committed philosophical naturalists with one notable and provocative exception thus diverging from the growing trend towards anti naturalism The book consists of four sections the first deals with the metaphysical implications of naturalism in which two contributors present radically different perspectives The second attempts to reconcile reasons and forward looking goals with blind Darwinian natural selection The third tackles various problems in epistemology ranging from meaning to natural kinds to concept learning The final section includes three papers each addressing a specific feature of the human mind its uniqueness its representational capacity and its morality In this way the book explores the important implications of the post Darwinian scientific world view
