Abstract: Contemporary speech and language interventions are not limited to disabilities but embrace the pragmatics of communication behaviors from the perspective of functional social participation. Accordingly, current speech and language therapies for deaf and hard-of-hearing children include a broad spectrum of approaches and techniques. This paper explores contemporary approaches and techniques for speech and oral language interventions for deaf and hard-of-hearing children using hearing devices, evidence of efficacy and how they are implemented in diverse clinical practices.

Keywords: speech; language; care; deaf and hard of hearing; child

1. Introduction

The outcomes of hearing impairment in children are well documented. Indeed, many studies have shown that depriving auditory input, at any degree, can not only impede auditory perception, but also affect the development of the peripheral and central auditory pathways [1]. Because of an altered auditory input, speech [2] and oral language [3] development can be limited, which will impact oral communication skills [4] and, eventually, social participation [5] including academic achievement [6], involvement in leisure activities [7] and, eventually, access to the job market [8].

The efficacy of technological care on hearing impairment has extensively been shown; early hearing aids and cochlear implants can attenuate sensory deprivation [9], promote auditory [10], speech [11] and oral language [12] development and, ultimately, support social participation [13]. However, as suggested in the late 1980s by William House, “intervention in deafness is 10% hardware and 90% software”, emphasizing that technological care is only one part of the intervention, the most important part being the care of the individual. Indeed, despite the huge sophistication of modern hearing devices, none can replace a normal auditory system. Thus, complementary therapeutic care is still needed.

As stated before, social participation is an optimal objective of hearing health care; while intervention on the deficit, either medically or technologically, traditionally used to be considered as the way to restore (some) hearing and thus social participation, contemporary perspectives propose a more global approach to intervention. Both WHO’s Model of Functioning, Disability, and Health [14] and the Human Development Model of Disability Creation Process [15] suggest that disability emerges from the interaction between the individual and his environment in the context of his own life habits (figure 1). Therefore, intervention should consider the individual’s deficit but also his incapacities, his environment and his life habits; this is especially true when communication is the core object of the intervention.

African-American Proverbs in Context Anand Prahlad,1996-07 Such sayings as Hard times make a monkey eat red pepper when he don t care for black The blacker the berry the sweeter the juice and Nothing ruins a duck but its bill convey not only axiomatic impact but also profound contextual meanings This study of African American proverbs is the first to probe deeply into these meanings and contexts Sw Anand Prahlad s interest in proverbs dates back to his own childhood in rural Virginia when he listened to his great grandmother s stories Very early he began collecting sayings In researching this book he spent five years listening for proverbs spoken in bars clubs churches and retirement homes on street corners

basketball courts and public buses at PTA meetings and bingo games To discover the full context of a proverb Prahlad considers four levels of meanings grammatical cultural situational and symbolic All these operate simultaneously when a proverb is spoken Part of the artistry in using proverbs comes from the complex interplay of the dimensions of their meanings From WPA interviews with former slaves from the lyrics of blues songs from extensive field research and from expressions of protest and cultural affirmation the author reveals the myriad ways African American proverbs thrive today

Studies in the History of the English Language III Christopher M. Cain, Geoffrey Russom, 2009-02-26 The essays of this volume employ diverse strategies for conceptualizing the history of English as at once chaotic and yet amenable to circumscribed analyses that incorporate a broad view of language change Several of the world's leading scholars of the English language contribute to the overall perspective that an elaboration of linguistic cultural and social contexts and a renewed emphasis on the concrete historical conditions of language change are necessary to approach some long standing obstacles in the study of the history of the English language Designed for students teachers and scholars of the English language Managing Chaos Strategies for Identifying Change in English SHEL III presents studies on all periods of the English language in a variety of theoretical and methodological modes Highlights include Anatoly Liberman's sweeping comparative revision of the history of palatalized and velarized consonants in English William Kretzschmar's et al wittily illuminating study of a suburban Atlanta Georgia town that epitomizes the specific ways in which inter regional linguistic variation can be maintained while local social factors drive dramatic change on an intra regional level Lesley Milroy's innovative analysis of recent unitary changes in global Englishes that cannot be accounted for by classic Labovian models that situate language change within small close networks of speakers who mediate variation in face to face interactions an observation that leads Milroy to propose two distinct but cross influencing levels of social dynamics in language change All of the essays of this volume include careful
