**Contempt and Pity** Daryl Michael Scott, 2000-11-09 For over a century the idea that African Americans are psychologically damaged has played an important role in discussions of race In this provocative work Daryl Michael Scott argues that damage imagery has been the product of liberals and conservatives of racists and antiracists While racial conservatives often playing on white contempt for blacks have sought to use findings of black pathology to justify exclusionary policies racial liberals have used damage imagery primarily to promote policies of inclusion and rehabilitation In advancing his argument Scott challenges some long held beliefs about the history of damage imagery He rediscovers the liberal impulses behind Stanley Elkins's Sambo hypothesis and Daniel Patrick Moynihan's Negro Family and exposes the damage imagery in the work of Ralph Ellison the leading anti pathologist He also corrects the view that the Chicago School depicted blacks as pathological products of patriarchy New Negro experts such as Charles Johnson and E Franklin Frazier he says disdained sympathy seeking and refrained from exploring individual pathology Scott's reassessment of social science sheds new light on Brown v Board of Education revealing how experts reversed four decades of theory in order to represent segregation as inherently damaging to blacks In this controversial work Scott warns the Left of the dangers in their recent rediscovery of damage imagery in an age of conservative reform

Lowndes, 2008-10-01 The role the South has played in contemporary conservatism is perhaps the most consequential political phenomenon of the second half of the twentieth century The regions transition from Democratic stronghold to Republican base has frequently been viewed as a recent occurrence one that largely stems from a 1960s era backlash against left leaning social movements But as Joseph Lowndes argues in this book this rightward shift was not necessarily a natural response by alienated whites but rather the result of the long term development of an alliance between Southern segregationists and Northern conservatives two groups who initially shared little beyond opposition to specific New Deal imperatives Lowndes focuses his narrative on the formative period between the end of the Second World War and the Nixon years By looking at the 1948 Dixiecrat Revolt the presidential campaigns of George Wallace and popular representations of the region he shows the many ways in which the South changed during these decades Lowndes traces how a new alliance began to emerge by further examining the pages of the National Review and Republican party building efforts in the South during the campaigns of Eisenhower Goldwater and Nixon The unique characteristics of American conservatism were forged in the crucible of race relations in the South he argues and his analysis of party building efforts national institutions and the innovations of

particular political actors provides a keen look into the ideology of modern conservatism and the Republican Party

*American Protestantism in the Age of Psychology* Stephanie Muravchik, 2011-07-18 Many have worried that the ubiquitous practice of psychology and psychotherapy in America has corrupted religious faith eroded civic virtue and weakened community life But an examination of the history of three major psycho spiritual movements since World War II Alcoholics Anonymous The Salvation Army's outreach to homeless men and the clinical pastoral education movement reveals the opposite These groups developed a practical religious psychology that nurtured faith fellowship and personal responsibility They achieved this by including religious traditions and spiritual activities in their definition of therapy and by putting clergy and lay believers to work as therapists Under such care spiritual and emotional growth reinforced each other Thanks to these innovations the three movements succeeded in reaching millions of socially alienated and religiously disenchanted Americans They demonstrated that religion and psychology although antithetical in some eyes could be blended effectively to foster community individual responsibility and happier lives

**Managing Inequality** Karen R. Miller, 2017 In *Managing Inequality* Karen R Miller examines the formulation uses and growing political importance of northern racial liberalism in Detroit between the two World Wars In the wake of the Civil War many white northern leaders supported race neutral laws and anti discrimination statutes These positions helped amplify the distinctions they drew between their political economic system which they saw as forward thinking in its promotion of free market capitalism and the now vanquished southern system which had been built on slavery But this interest in legal race neutrality should not be mistaken for an effort to integrate northern African Americans into the state or society on an equal footing with whites During the Great Migration which brought tens of thousands of African Americans into Northern cities after World War I white northern leaders faced new challenges from both white and African American activists and were pushed to manage race relations in a more formalized and proactive manner The result was northern racial liberalism the idea that all Americans regardless of race should be politically equal but that the state cannot and indeed should not enforce racial equality by interfering with existing social or economic relations Miller argues that racial inequality was built into the liberal state at its inception rather than produced by antagonists of liberalism *Managing Inequality* shows that our current racial system where race neutral language coincides with extreme racial inequalities that appear natural rather than political has a history that is deeply embedded in contemporary governmental systems and political economies

Brown v. Board of Education James T. Patterson, 2001-03-01 2004 marks the fiftieth anniversary of the Supreme Court's unanimous decision to end segregation in public schools Many people were elated when Supreme Court Chief Justice Earl Warren delivered *Brown v Board of Education of Topeka* in May 1954 the ruling that struck down state sponsored racial segregation in America's public schools Thurgood Marshall chief attorney for the black families that launched the litigation exclaimed later I was so happy I was numb The novelist Ralph Ellison wrote another battle of the Civil War has been won The rest is up to us and I'm very glad What a wonderful world of possibilities are unfolded for the children Here in a concise moving narrative Bancroft Prize winning historian James T Patterson takes readers through the dramatic case and its fifty year aftermath A wide range of characters animates the story from the little known African Americans who dared to challenge Jim Crow with lawsuits at great personal cost to Thurgood Marshall who later became a Justice himself to Earl Warren who shepherded a fractured Court to a unanimous decision Others include segregationist politicians like Governor Orval Faubus of Arkansas Presidents Eisenhower Johnson and Nixon and controversial Supreme Court justices such as William Rehnquist and Clarence Thomas Most Americans still see *Brown* as a triumph but was it Patterson shrewdly explores the provocative questions that still swirl around the case Could the Court or President Eisenhower have done more to ensure compliance with *Brown* Did the decision touch off the modern civil rights movement How useful are court ordered busing and affirmative action against racial segregation To what extent has racial mixing affected the academic achievement of black children Where indeed do we go from here to realize the expectations of Marshall Ellison and others in 1954
