**Content, Expression and Structure** Elisabeth Engberg-Pedersen, 1996 This collection of papers offers an alternative to mainstream functional linguistics on two points Especially in American linguistics function and structure are often viewed almost as polar opposites in addition structure is often understood as being only a matter of linguistic form or expression as opposed to content The book tries to illustrate why function and structure must be understood as mutually dependent in relation to language and why the most interesting aspect of language structure is the way it structures the content side of language In this the book represents a reaffirmation of traditional concerns in structural linguistics especially with respect to the structural integrity of individual languages but with a reversal of traditional priority structure is not autonomous but must be understood on the basis of function Without being hostile to typological and universal generalizations the articles suggest that similarities between languages can only be responsibly discussed on the basis of an understanding that includes a respect for language differences The book contains discussions of a number of different languages including Nahuatl Danish Sign Language French and Tlapanec and focuses on the way meaning is organized in the grammar of Danish A final section sums up theoretical perspectives

[A New Architecture for Functional Grammar](#) J. Lachlan Mackenzie, María de los Angeles Gómez-González, 2008-08-22 This volume which represents a major advance on Simon Dik's final statement of the theory 1997 lays the foundation for the future evolution of FG towards a Functional Discourse Grammar It rises to the double challenge of specifying the interface between discourse and grammar and of detailing the expression rules that link semantic representation and morphosyntactic form The opening chapter by Kees Hengeveld sets out in programmatic form a new architecture for FG which both preserves the best of the traditional

model and offers a place for numerous recent insights The remaining chapters are devoted to refining and developing the programme laid down by Hengeveld bringing in data from a range of languages as well as theoretical insights inspired by adjoining frameworks Of special interest are an account by Matthew Anstey of how current proposals arise from the history of FG and various chapters in which the model is brought much closer to an account of real time language production notably including the first ever detailed account of the workings of expression rules by Dik Bakker and Anna Siewierska The final chapter also by Hengeveld draws together the findings of the various chapters culminating in an elaborated model that represents the most sophisticated statement of Functional Grammar currently available The volume thus gives a coherent account of FG as a theory which combines formal explicitness with a broad account of language functions **Structure and Function**

□ **A Guide to Three Major Structural-Functional Theories** Christopher S. Butler, 2003-06-30 Like its companion volume this book offers a detailed description and comparison of three major structural functional theories Functional Grammar Role and Reference Grammar and Systemic Functional Grammar illustrated throughout with corpus derived examples from English and other languages Whereas Part 1 confines itself largely to the simplex clause Part 2 moves from the clause towards the discourse and its context The first three chapters deal with the areas of illocution information structuring topic and focus theme and rheme given and new information etc and clause combining within complex sentences Chapter 4 examines approaches to discourse text and context across the three theories The fifth chapter deals with the learning of language by both native and non native speakers and applications of the theories in stylistics computational linguistics translation and contrastive studies and language pathology The final chapter assesses the extent to which each theory attains the goals it sets for itself and then outlines a programme for the development of an integrated approach responding to a range of criteria of descriptive and explanatory adequacy **Crucial Readings in Functional Grammar**

Matthew P. Anstey, J. Lachlan Mackenzie, 2012-03-12 Crucial Readings in Functional Grammar is an invaluable resource to anyone working in Functional Grammar student and scholar alike It contains important articles that have led to new avenues of research in the theory beyond Dik's two volume Functional Grammar 1997 each concluded with a short paragraph with suggestions for further research The book also contains an introduction to current Functional Grammar theory by the editors Crucial Readings is unique in bringing together in one volume the various ideas that complement Dik's canonical presentation of the theory The editorial contributions provide a comprehensive review of Functional Grammar publications

**Noam Chomsky and Language Descriptions** John Ole Askedal, Ian G. Roberts, Tomonori Matsushita, 2010 For sale in all countries except Japan For customers in Japan please contact Yushodo Co The general aim of the Senshu University Project The Development of the Anglo Saxon Language and Linguistic Universals is investigation of structural characteristics common to the Germanic languages such as English German and Norwegian and of works on and in the tradition of Generative Grammar founded by Noam Chomsky in the 1950s The central idea of Generative Grammar that the nature of

natural language syntax can be captured by a finite set of rules which are able to produce an infinite set of well formed structures has been highly evaluated and influential even in related fields such as biolinguistics philosophy psychology and computer science Noam Chomsky and Language Descriptions is a collection of articles that focus on the earliest but essential linguistic theory proposed by Noam Chomsky and articles that discuss specific topics pertaining to the study Germanic languages in particular English and German It is divided into two parts Part 1 Genesis of Generative Grammar and Part 2 Current Issues in Language Descriptions The present book will be of general interest to linguists who seek to understand the original idea of Generative Grammar and nature of the Germanic languages Mood in the Languages of Europe Björn Rothstein, Rolf Thieroff, 2010 This book is the first comprehensive survey of mood in the languages of Europe It gives readers access to a collection of data on mood Each article presents the mood system of a specific European language in a way that readers not familiar with this language are able to understand and to interpret the data The articles contain information on the morphology and semantics of the mood system the possible combinations of tense and mood morphology and the possible uses of the non indicative moods The papers address the explanation of mood from an empirical and descriptive perspective This book is of interest to scholars of mood and modality language contact and areal linguistics and typology *Structure and Function: From clause to discourse and beyond* C. S. Butler, 2003-01-01 Volume one of a two volume set outlining and comparing three approaches to the study of language labelled structural functionalist functional grammar FG role and reference grammar RRG and systemic functional grammar SFG *Subject Properties in Early Modern Germanic Languages* Pierre-Yves Modicom, 2025-04-21 This monograph is devoted to the cross linguistic profile of subjects in Early Modern Germanic languages The typologically complex question of subject criteria is addressed in a functional framework relying on recent developments in Construction Grammar The set of data is extracted from a parallel corpus made up of the 1587 German chapbook about the life of Dr Faustus and its English Dutch and Danish translations all of which had been published by 1592 At that time the syntactic features of English subjects were still comparable to Continental languages like Danish facilitating the inclusion of English in a cross Germanic analysis The analysis makes use of two comparative concepts of subjecthood argumental subjecthood centred on the argument structural characteristics of subjects and informational subjecthood which corresponds to the syntacticization of information structural properties Subjecthood is defined as a labile multi level configuration of argumental and informational parameters This approach sheds new light on notorious tricks of Germanic syntax such as oblique subjects expletives scrambling and subjectless passives Epistemic Modalities and Evidentiality in Cross-Linguistic Perspective Zlatka Guentchéva, 2018-04-09 This volume explores phenomena which come under the heading of epistemic modalities and evidentiality in more or less well known languages Germanic Romance Balto Slavic Hungarian Tibetan Lakandon and Yucatec Maya Arwak Chibchan Kogi and Ika It reveals cross linguistic variations in the structuring of these vast fields of enquiry and clearly demonstrates the relevance and interplay of multiple factors

involved in the analysis of these two conceptual domains Although the contributions present diverging descriptive traditions they are nonetheless within the broad domain of functional typological linguistics and give access to distinct yet comparable approaches They all converge around a number of key issues modal verbs the relationship between epistemic modality and evidentiality the relationship of modal notions with some tense and aspect notions the notions of inter subjectivity commitment and dis engagement the prosodic variation of modal adverbs the diachronic connections between negation and evidential markers the connection with mirativity The volume is of interest to linguists and advanced graduate students working in general and theoretical linguistics semantics pragmatics cognition and typology

**Language, Text, and Knowledge** Lita Lundquist, Robert J. Jarvella, 2010-12-14 The series serves to propagate investigations into language usage especially with respect to computational support This includes all forms of text handling activity not only interlingual translations but also conversions carried out in response to different communicative tasks Among the major topics are problems of text transfer and the interplay between human and machine activities

*Lexicalization and Language Change* Laurel J. Brinton, Elizabeth Closs Traugott, 2005-10-27 Lexicalization a process of language change has been conceptualized in a variety of ways Broadly defined as the adoption of concepts into the lexicon it has been viewed by syntacticians as the reverse process of grammaticalization by morphologists as a routine process of word formation and by semanticists as the development of concrete meanings In this up to date survey Laurel Brinton and Elizabeth Traugott examine the various conceptualizations of lexicalization that have been presented in the literature In light of contemporary work on grammaticalization they then propose a new unified model of lexicalization and grammaticalization Their approach is illustrated with a variety of case studies from the history of English including present participles multi word verbs adverbs and discourse markers as well as some examples from other Indo European languages The first review of the various approaches to lexicalization this book will be invaluable to students and scholars of historical linguistics and language change

Linguistic Diversity and Language Theories Zygmunt Frajzyngier, Adam Hodges, David S. Rood, 2005-01-01 From the refinement of general methodology to new insights of synchronic and diachronic universals to studies of specific phenomena this collection demonstrates the crucial role that language data play in the evolution of useful accurate linguistic theories Issues addressed include the determination of meaning in typological studies a refined understanding of diachronic processes by including intentional social statistical and level determined phenomena the reconsideration of categories such as sentence evidential or adposition and structures such as compounds or polysynthesis the tension between formal simplicity and functional clarity the inclusion of unusual systems in theoretical debates and fresh approaches to Chinese classifiers possession in Oceanic languages and English aspect This is a careful selection of papers presented at the International Symposium on Linguistic Diversity and Language Theories in Boulder Colorado The purpose of the Symposium was to confront fundamental issues in language structure and change with the rich variation of forms and functions observed

across languages     **Indexicality** Peter Juul Nielsen, María Sol Sansiñena, 2024-06-04 The book offers the first full scale focused treatment of linguistic indexicality as a tool for analysis and explanation of the organization of linguistic structures The book demonstrates the application of the concept of indexicality in the description of a broad range of linguistic phenomena from the internal workings of morphology via relations within syntactic constructions to lexical and grammatical elements designed to hook on to features outside the clause in the interactional context The book offers a focused treatment of the general nature of linguistic indexicality in the larger perspective of the semiotics of language including examinations of domain straddling indexical functions It presents studies of the role of indexicality in synchrony and diachrony with descriptive cases from a number of languages from diverse language families and it examines the way indexicality enters into the mechanisms of change including examinations of semiotic shifts from indexical to symbolic function and vice versa The book is relevant for researchers and students in historical and synchronic linguistics from a variety of linguistic frameworks with an interest in the role of semiotics in linguistic analysis     **Paradigms regained: Theoretical and empirical arguments for the reassessment of the notion of paradigm** Gabriele Diewald, Katja Politt, 2022 The volume discusses the breadth of applications for an extended notion of paradigm Paradigms in this sense are not only tools of morphological description but constitute the inherent structure of grammar Grammatical paradigms are structural sets forming holistic semiotic structures with an informational value of their own We argue that as such paradigms are a part of speaker knowledge and provide necessary structuring for grammaticalization processes The papers discuss theoretical as well as conceptual questions and explore different domains of grammatical phenomena ranging from grammaticalization morphology and cognitive semantics to modality aiming to illustrate what the concept of grammatical paradigms can and cannot yet explain     **Studies in Ditransitive Constructions** Andrej Malchukov, Martin Haspelmath, Bernard Comrie, 2010-12-23 This rich volume deals comprehensively with cross linguistic variation in the morphosyntax of ditransitive constructions constructions formed with verbs like give that take Agent Theme and Recipient arguments For the first time a broadly cross linguistic perspective is adopted The present volume consisting of an overview article and twenty odd in depth studies of ditransitive constructions in individual languages from different continents arose from the conference on ditransitive constructions held at the Max Planck Institute for Evolutionary Anthropology Leipzig in 2007 It opens with the editors survey article providing an overview of cross linguistic variation in ditransitive constructions followed by the questionnaire on ditransitive constructions compiled by the editors in order to elicit various properties of these patterns The editors overview discusses formal properties of ditransitive constructions as well as behavioral or syntactic and lexical properties i e the extension of ditransitive constructions across different verb classes The volume includes 23 contributions describing properties of ditransitive constructions in languages from all over the world written by leading experts Care has been taken that the contributions to the volume will be representative of structural geographic and genealogical diversity in the domain

of ditransitive constructions Thus the present volume provides a unique source of information on typological diversity of ditransitive constructions It is expected that it will be of central interest to all scholars and advanced students of linguistics especially to those working in the field of language typology and comparative syntax

**Explanations in Sociosyntactic Variation** Tanya Karoli Christensen, Torben Juel Jensen, 2022-01-20 New perspectives on how and why syntax varies between and within speakers focusing on explaining theoretical backgrounds and methods

**Studies in Language**, 1977

**Dimensions of Possession** Irène Baron, Michael Herslund, Finn Sørensen, 2001-01-01 Few linguistic concepts are more elusive than possession The present collection of articles selected from an international workshop held in Copenhagen in May 1998 confronts the subject from several angles lexicon the semantics of possession and the verb HAVE the syntax of genitives and other possessive structures the interaction of verbal and nominal constructions the semantic and textual implications of the alienable inalienable distinction etc and approaches formal semantics functional semantics and syntax as diachronic and typological comparisons The languages covered include both European languages such as Danish French Russian Spanish Portuguese and Latin and several American Australian African and Asian languages This volume in which the contributing scholars have sought to examine as many dimensions as possible is of interest to all linguists in particular those working in the field of typology and functional approaches to language

**Aspect in Mandarin Chinese** Richard Xiao, Tony McEnery, 2004-01-01 Chinese as an aspect language has played an important role in the development of aspect theory This book is a systematic and structured exploration of the linguistic devices that Mandarin Chinese employs to express aspectual meanings The work presented here is the first corpus based account of aspect in Chinese encompassing both situation aspect and viewpoint aspect In using corpus data the book seeks to achieve a marriage between theory driven and corpus based approaches to linguistics The corpus based model presented explores aspect at both the semantic and grammatical levels At the semantic level a two level model of situation aspect is proposed which covers both the lexical and sentential levels thus giving a better account of the compositional nature of situation aspect At the grammatical level four perfective and four imperfective aspects in Chinese are explored in detail This exploration corrects many intuition based misconceptions and associated misleading conclusions about aspect in Chinese common in the literature
