Introduction to Content Delivery Networks (CDN) Shehan Marasinghe,2020-07 Lightning fast web loading is one of the major promises that almost every modern web hosting company mentions in their advertisements Achieving this goal involves a lot of methodologies because the web load time depends on many factors such as the size of web page content blocks the performance level of the server the distance between server and visitor Content Delivery Networking CDN is a methodology to increase the web load speed by reducing the distance between the server and the visitor A CDN can be defined as a group of servers that are located in different geographical locations to facilitate the distribution of content via the web in an efficient and timely manner The main goal of a CDN is to serve content from the closest server to the visitor instead of getting served from the origin web server **A Practical Guide to Content Delivery Networks** Gilbert Held,2010-10-12 Following in the tradition of its popular predecessor A Practical Guide to Content Delivery Networks Second Edition offers an accessible and organized approach to implementing networks capable of handling the increasing data requirements of today s always on mobile society Describing how content delivery networks CDN function it provides

Web Content Delivery Xueyan Tang,Jianliang Xu,Samuel T. Chanson,2006-01-17 The concept of content delivery also known as content distribution is becoming increasingly important due to rapidly growing demands for efficient distribution and fast access of information in the Internet Content delivery is very broad and comprehensive in that the contents for distribution cover a wide range of types with significantly different characteristics and performance concerns including

HTML documents images multimedia streams database tables and dynamically generated contents Moreover to facilitate ubiquitous information access the network architectures and hardware devices also vary widely They range from broadband wired fixed networks to bandwidth constrained wireless mobile networks and from powerful workstations PCs to personal digital assistants PDAs and cellular phones with limited processing and display capabilities All these levels of diversity are introducing numerous challenges on content delivery technologies It is desirable to deliver contents in their best quality based on the nature of the contents network connections and client devices This book aims at providing a snapshot of the state of the art research and development activities on web content delivery and laying the foundations for future web applications The book focuses on four main areas 1 web content delivery 2 dynamic web content 3 streaming media delivery and 4 ubiquitous web access It consists of 17 chapters written by leading experts in the field The book is designed for a professional audience including academic researchers and industrial practitioners who are interested in the most recent research and development activities on web content delivery

Web Content Caching and Distribution Chi-Hung Chi, Maarten van Steen, Craig Wills, 2004-10-06 Since the start of the International Workshop on Web Caching and Content Distribution WCW in 1996 it has served as the premiere meeting for researchers and practitioners to exchange results and visions on all aspects of content caching distribution and delivery Building on the success of the previous WCW meetings WCW 2004 extended its scope and covered interesting research and deployment areas relating to content services as they move through the Internet This year WCW was held in Beijing China Although it was the first time that WCW was held in Asia we received more than 50 high quality papers from five continents Fifteen papers were accepted as regular papers and 6 papers as synopses to appear in the proceedings The topics covered included architectural issues routing and placement caching in both traditional content delivery networks as well as in peer peer systems systems management and deployment and performance evaluation We would like to take this opportunity to thank all those who submitted papers to WCW 2004 for their valued contribution to the workshop This event would not have been possible without the broad and personal support and the invaluable suggestions and contributions of the members of the program committee and the steering committee
