Contes Et Scenarios Katherine T. Brearley, 1960 **Polarization and Deep Contestations** Tanja A. Börzel, Thomas Risse, Stephanie B. Anderson, Jean A. Garrison, 2024-10-29 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations This book explores the deep contestations of the liberal script in the contemporary United States from a variety of perspectives US democracy today is in crisis because of a profound ideological and affective polarization The chapters in this volume show that Donald Trump's grip on the Republican Party is a symptom and a catalyst but not the cause of the contemporary contestations of the liberal script in the US To discern their major drivers from a long-term perspective each chapter takes a step back and asks three main questions 1 How can we best describe the current contestations of the liberal script in the US exploring the extent to which the US is unique in comparison to other liberal democracies facing similar contestations 2 What are the main drivers and root causes that explain the current contestations and the crisis of American democracy they may precipitate 3 What are the likely consequences for the future of American democracy The conclusions do not lead us to expect a return to the norm of internal contestations of the liberal script that are common in liberal democracies and have characterized the US throughout its history Political economic and cultural polarization is by now deeply entrenched in American society and is eroding mutual toleration as the basis of American democracy In other words the resilience of US liberal democracy is at stake It is unlikely that we will see the US liberal script bounce back in the near future This volume has emerged from research carried out as part of the Cluster of Excellence Contestations of the Liberal Script SCRIPTS which analyzes the contemporary controversies about liberal ideas institutions and practices on the national and international level from a historical global and comparative perspective It connects academic expertise in the social sciences and area studies and collaborates with research institutions in all world regions Operating since 2019 and funded by the German Research Foundation DFG SCRIPTS unites eight major Berlin-based research institutions Freie Universität Berlin the Humboldt Universität zu Berlin the Berlin Social Science Center WZB the Hertie School the German Institute for Economic Research DIW the Berlin branch of the German Institute of Global and Area Studies GIGA the Centre for East European and International Studies ZOIS and the Leibniz Zentrum Moderner Orient ZMO

The Conte Du Graal Cycle Thomas Hinton, 2012 A new study of the continuations to Chrétien's Conte du Graal shows their crucial influence on the development of Arthurian literature Chrétien de Troyes's late twelfth-century Conte du Graal has inspired writers and scholars from the moment of its composition to the present day The challenge represented by its unfinished state was quickly taken up and over the next fifty years the romance was supplemented by a number of continuations and prologues which eventually came to dwarf Chrétien's text In one of the first studies to treat the Conte du Graal and its continuations as a unified work Thomas Hinton considers the whole corpus as a narrative cycle Through a combination of close textual readings and manuscript analysis the author argues that the unity of the narrative depends on a balanced tension between centripetal and centrifugal dynamics He traces how the authors scribes and illuminators of the cycle worked

to produce coherence even as they contended with potentially disruptive forces multiple authorship differences of intention and changes in the relation between text audience and book Finally he tackles the long held orthodoxy that places the Perceval Continuations on the margins of literary history Widening the scope of enquiry to consider the corpus's influence on thirteenth century verse romances this study re-situates the Conte du Graal cycle as a vital element in the evolution of Arthurian literature Thomas Hinton is Junior Research Fellow in Modern Languages at Jesus College Oxford
