Contest For The South China Sea:

Contest for the South China Sea Marwyn Samuels, 2013-11-05 First published in 1982 Wide ranging and fully documented this book is the first detailed study of the origins contexts and consequences of the long standing dispute between China Taiwan Vietnam and the Philippines over the Paracel and Spratly Archipelagos in the South China Sea one of the world s most strategically important inter ocean basins and China s southern maritime frontier Samuels analysis Highlights the impact of the shifting balance of power in Asia and the growing competition for oceanic resources Examines the implications of the dispute in terms of the historical and modern role of china as a maritime power in Asia *US-China Competition and the South China Sea Disputes* Huiyun Feng, Kai He, 2018-05-11 Traditionally the South China Sea SCS issue was not on the negotiation table between the United States and China However the tensions between the United States and China over the SCS have gradually simmered up to a strategic level Why and how did the SCS become a flashpoint between the United States and China Will the United States and China really go to war over the SCS Why did China adopt an assertive policy towards the South China Sea in the 2000s What will regional actors do in the face of this new normal of competition between China and the United States Will multilateral institutions in the Asia Pacific alleviate the potential conflicts over the SCS disputes How will US Chinese competition in the SCS shape the dynamics of Asian security This edited book addresses these questions systematically and theoretically with contributions from leading scholars in the field of US China relations and Asian security from the United States Australia the United Kingdom and Singapore It elevates the analysis of the SCS disputes from maritime and legal issues to the strategic level between the United States and China **Order, Contestation and Ontological Security-Seeking in the South China Sea** Anisa Heritage, Pak K. Lee, 2020-01-22 This book examines the South China Sea territorial disputes from the perspective of international order The authors argue that both China and the US are attempting to impose their respective preferred orders to the region and that the observed disputes are due to the clash of two competing order building projects Ordering the maritime space is essential for these two countries to validate their national identities and to achieve ontological security Because both are ontological security seeking states this imperative gives them little room for striking a grand bargain between them The book focuses on how China and the US engage in practices and discourses that build contest and legitimise the two major ordering projects they promote in the region It concludes that China must act in its legitimation strategy in accordance with contemporary publicly accepted norms and rules to create a legitimate maritime order while the US should support ASEAN in devising a multilateral resolution of the disputes **Vietnam and the South China Sea** Do Thanh Hai, 2016-12-01 Studies of the escalating tensions and competing claims in the South China Sea overwhelmingly focus on China and its increasingly assertive approach while the position of the other claimants is overlooked This book focuses on the attitude of Vietnam towards the South China Sea dispute It examines the position from a historical perspective shows how Vietnam s position is affected by its wish to

maintain good relations with China on a range of issues and outlines how Vietnam has occasionally made overtures to both the United States and Japan in order to bolster its position and considered the possibility so far resisted of taking China to formal arbitration under the auspices of the United Nations Convention on the Law of the Sea The book concludes by assessing the future prospects for Vietnam's position in the dispute

China's Naval Operations in the South China Sea Bruce Elleman, 2025-10-01 This book provides a history of the South China Sea conflict and lays out the stakes for each of the bordering states and China's interaction with them namely Vietnam the Philippines Brunei Malaysia Taiwan and Indonesia it also examines the U S government's role in the region China's Naval Operations in the South China Sea is highly topical it examines the evolving perception of the People's Republic of China's PRC of the South China Sea SCS and Beijing's accompanying maritime strategy to claim the islands and waters particularly in the context of the strategies of the neighbouring stake holding nations In addition to long standing territorial disputes over the islands and waters of the SCS China and the other littoral states Vietnam the Philippines Brunei Malaysia Taiwan and Indonesia have growing and often mutually exclusive interests in the offshore energy reserves and fishing grounds Many other countries outside of the region worry about the protection of sea lines of communication for military and commercial traffic oil tankers in particular These differences have been expressed in the increasing frequency and intensity of maritime incidents involving both naval and civilian vessels sometimes working in coordination against naval or civilian targets Each chapter on the littoral states closely examines that state's territorial claims to the islands and waters of the SCS its primary economic and military interests in these areas its views on the sovereignty disputes over the entire SCS its strategy to achieve its objectives and its views on the U S involvement in any and all of these issues Here is a history of the South China Sea SCS conflict and the stakes for each of the bordering states and China's PRC interaction with them it examines the US's role in the region It examines the PRC's perception of the SCS and its strategy to claim the islands and waters in the context of the strategies of other stake holding nations

The US Navy and the South China Sea Bruce A Elleman, 2024-08-13 This book explores the question Why is the US Navy in the South China Sea at all It traces the history of diplomatic economic and military tensions among the People's Republic of China the Soviet Union the United States and the Socialist Republic of Vietnam outlining the origins of the United States Vietnam relationship during the immediate post World War II period the turmoil of the Vietnam War during which China supported North Vietnam against a US backed South Vietnam and the decision of the US government to open relations with China beginning in 1972 It shows how from 1945 1975 the US government used its relations with Vietnam to exert diplomatic economic and military pressure on China to open negotiations leading to full recognition and further discusses the surprising action of the US Navy in 1974 to allow the Chinese Navy to take the Paracel Islands by force thereby denying control over these islands to a united Vietnam closely allied with the Soviet Union which was the common enemy of both China and the USA Overall the book demonstrates how the presence of the US Navy in the South China Sea is a crucial

element in much wider global US strategy **Security and International Politics in the South China Sea** Sam Bateman, Ralf Emmers, 2008-12-01 The South China Sea has long been regarded as a major source of tension and instability in East Asia. Managing the risk of possible conflict over disputed claims in the South China Sea has been a significant challenge for regional relations. This book explores international politics and security in the South China Sea. It outlines the history of the South China Sea disputes and the efforts that have been made to resolve these, assessing the broader strategic significance of the region for major geopolitical powers. In addition, new challenges have emerged of resource management, environmental protection and most recently of the security and safety of shipping against the threats of piracy and maritime terrorism. The book discusses the convergence of traditional and non-traditional security issues now appearing to provide a basis for co-operation in the South China Sea. It shows how the challenge of establishing co-operative relations is now being met largely through agreement between the Association of Southeast Asian Nations (ASEAN) and China in 2002 on the Declaration on the Conduct of Parties in the South China Sea and a range of recent measures for functional co-operation.

Security Dynamics in the South China Sea Howard M Hensel, 2024-05-16 This volume examines the South China Sea's regional security dynamics, highlighting the challenges and opportunities for both littoral and non-littoral states. The South China Sea is a vital pathway for the great container ships and tankers as well as for the naval vessels of today. Indeed, the security of the contemporary global economy is reliant more than ever upon the dependability of freedom of navigation through the waters of the South China Sea. This volume concentrates on the security of the South China Sea sub-region. It is designed to help illuminate the contemporary security dynamics within this important sub-region by highlighting its development, the contemporary challenges and opportunities confronting both the littoral states and the non-littoral powers that are active in the sub-region and the policy responses of those states as they seek to defend and promote their national interests. This book is composed of 16 chapters and is organized into five thematic sections. Part I of the book is designed to set the historical context. Part II examines some of the contemporary challenges and opportunities that present themselves in the sub-region while Part III focuses on Chinese policy in the South China Sea sub-region. Parts IV and V analyse and evaluate the contemporary policies of the various littoral and non-littoral powers that are active in the South China Sea sub-region. The collective analyses and assessments of the contemporary perceptions and policies of the various littoral and non-littoral powers active in the South China Sea in response to the traditional and non-traditional challenges within the sub-region that are examined in the chapters contained in Parts III, IV and V are framed against the material presented in Parts I and II. It provides the basis for observations concerning areas of conflicting and coinciding interests. In the concluding chapter of the book, this book will be of interest to students of the South China Sea maritime security, Asian politics and international relations. **China, Faits Accomplis and the Contest for East Asia** Joshua Hastey, 2023-04-28 This book explores China's use of *faits accomplis* in its periphery and offers the first formal model for the use of *faits accomplis* by rising powers. With

growing attention to great power competition and conflict in the gray zone between war and peace this book explains China's use of faits accomplis to revise the maritime status quo in the South and East China Seas Using formal modelling and case study analysis the book argues that while power shifts provide rising states with opportunities to impose faits accomplis to revise the status quo the use of faits accomplis also increase the likelihood of war with the dominant state's The book surveys existing understandings of how power shifts incentivize interstate competition in general and in the case of Sino American competition in particular and brings existing theory and novel modelling to explain China's differing strategies in the South and East China Seas in the first two decades of the 21st century The book concludes by using the lessons from these cases to assess the strategic options available to both states and conditions that make a peaceful resolution more likely This book will be of much interest to students of Chinese politics Asian security studies and International Relations

Great Power Competition as the New Normal of China-US Relations Jinghao Zhou, 2022-09-01 Will China-US relations come back to the normal track Does the confrontational approach work for China-US relations This book argues that it is an unrealistic hope to bring China-US relations back to the so called normal track because the great power competition will be a new normal of China-US relations and the USA will gain more from strategic competition than cooperation in the long run This book shows that the strategy of great power cooperation through competition is more positive and constructive than the approaches of peaceful coexist and maximum pressure This book does not intend to provide policy recommendations for governments to consider but mainly to explain why the great power competition is inevitable and why it is necessary to continuously work with China in some areas through strategic competition This book alarms the importance of understanding the nature of the Chinese Communist Party during the great power competition and aims to motivate both sides to revisit their foreign policy practice and come up with a better foreign policy strategy of handling China-US relations

US-China Strategic Competition S. Mahmud Ali, 2015-05-14 This book examines the nature and consequences of strategic competition between the US and China which affects the global security landscape and the emerging security architecture across the broader Asia Pacific region The author illustrates the evolution of Sino-US security interactions from the anti-Soviet alliance to temporary marginalization to eventual strategic competition and examines cases that could potentially escalate into greater conflicts The analysis offers tantalizing glimpses into both the dangers and promising opportunities presented by this strategic fork in the road making it of great interest to researchers and scholars in the fields of international relations and security studies

The United States, China, and the Competition for Control Melanie W. Sisson, 2024-11-22 This book considers whether the United States and the People's Republic of China have irreconcilable visions of world order The United States China and the Competition for Control evaluates the twin claims that China seeks to dismantle the post World War II international order and that the United States seeks to defend it It defines the post war order and examines how the United States and China have behaved within and in relation to it since 1945 An analysis of the

two states rhetoric and policy reveals that their preferences for international order are not as divergent as today's conventional wisdom suggests. The book therefore concludes that U.S. policies that treat China as a threat to international order are misplaced and offers policy recommendations for how the United States can both preserve the post-war order and protect its vital national interests. The book will be of interest to foreign policy practitioners, commentators and analysts as well as students and scholars of security studies, international relations and geopolitics.

Chinese-Japanese Competition and the East Asian Security Complex Jeffrey Reeves, Jeffrey Hornung, Kerry Lynn Nankivell, 2017-07-14. This edited volume examines contemporary diplomatic, economic and security competition between China and Japan in the Asia Pacific region, focusing on their respective foreign policies under President Xi Jinping and Prime Minister Shinzo Abe and regional security dynamics within and between Asian states and institutions.

Handbook on the United States in Asia Andrew T.H. Tan, 2018-09-28. The centre of gravity in today's global economy arguably now resides in Asia. As a result of this, the maintenance of geopolitical and economic security in Asia has become pivotal to global stability. This indispensable Handbook examines the crucial and multifaceted role of the United States as a force in the region that has been and continues to be necessary for the continuation of Asian prosperity.

China-Taiwan Relations in a Global Context George Wei, 2012-07-26. This book traces the development of Taiwan's relations with its diplomatic partners and its policy towards the political opponents of its political opponent mainland China. Paying particular attention to the powers that could exercise great influence in the future of East Asia, *China-Taiwan Relations in a Global Context* examines the main diplomatic strategies of Taiwan and its counterparts and the major problems

for Taiwanese foreign relations To date there is very little scholarship which examines the Taiwan Issue outside of the triangular Beijing Washington Taipei framework this book does exactly that The contributors examine the development of Taiwan s relationship with less prominent countries and governments and attempt to ascertain how such examinations could give rise to new variables that help explain the strategy and purpose of Taiwan s foreign policy as well as the reaction and response of mainland China This book provides readers with vital information about Taiwan s foreign policymaking and introduces rarely told stories about Taiwan s foreign relations The research demonstrates the ceaseless and unyielding diplomatic efforts of the Taiwanese for survival in a shrunken international space and renders for readers a better understanding of the complexity of Taiwan s relations with the rest of the world This book is essential reading for anyone interested in Taiwan studies Chinese politics Cross Strait relations and Asian foreign policy *Security Challenges In Contemporary Indo-pacific* Zhiqun Zhu,2025-04-02 The Indo Pacific is arguably the most important and most dynamic region in the world today with numerous opportunities and challenges This book covers major security challenges in the Indo Pacific region Both traditional security challenges such as border and maritime disputes arms races weapons of mass destruction and sovereignty and non traditional security challenges such as demography public health climate change and the environment are addressed Contributors who hail from Australia China India Japan the Philippines Singapore Taiwan the United States Vietnam and elsewhere carefully examine key security challenges facing some individual countries or the region as a whole and discuss policy implications moving forward *Ocean Governance and Conflict in the East and South China Sea* Christian Schultheiss,2025-10-01 This book tells the story of the negotiations between China Japan Taiwan the Philippines Vietnam and other Southeast Asian countries about the East and South China Sea disputes Tapping into formerly classified and newly available primary sources the book meticulously tracks these negotiations and their sudden U turns It is a story about the promises and perils of cooperation as much about pragmatic gradual and surprisingly resilient approaches to conflict resolution and ocean governance as it is about the expansion of states bargaining power through institutions The book hinges on the question of when and why disputing parties reach agreement on joint oil and gas development fisheries and codes of conduct and when and why negotiations end in impasse It is the first comprehensive and theoretically informed study of decades long dispute settlement efforts in a central region of the Indo Pacific where the expansion of China challenges the law of the sea and regional security *The South China Sea Arbitration* Stefan Talmon,Bing Bing Jia,2014-11-01 On 22 January 2013 the Republic of the Philippines instituted arbitral proceedings against the People s Republic of China PRC under the United Nations Convention on the Law of the Sea UNCLOS with regard to disputes between the two countries in the South China Sea South China Sea Arbitration On 19 February 2013 the PRC formally expressed its opposition to the institution of proceedings making it clear from the outset that it will not have any part in these arbitral proceedings and that this position will not change It is thus to be expected that over the next year and a half the Tribunal will

receive written memorials and hear oral submissions from the Philippines only The Chinese position will go unheard However the Tribunal is under an obligation before making its award to satisfy itself not only that it has jurisdiction over the dispute but also that the claims brought by the Philippines are well founded in fact and law UNCLOS Annex VII Article 9 This book aims to offer a not the Chinese perspective on some of the issues to be decided by the Tribunal and thus to assist the Tribunal in meeting its obligations under the Convention The book does not set out the official position of the Chinese government but is rather to serve as a kind of amicus curiae brief advancing possible legal arguments on behalf of the absent respondent The book does not deal with the merits of the disputes between the Philippines and the PRC but focuses on the questions of jurisdiction admissibility and other objections which the tribunal will have to decide as a preliminary matter The book will show that there are insurmountable preliminary objections to the Tribunal deciding the case on the merits and that the Tribunal would be well advised to refer the dispute back to the parties in order for them to reach a negotiated settlement The book brings together scholars of public international law from mainland China Taiwan and Europe united by a common interest in the law of the sea and disputes in the South China Sea This title is included in Bloomsbury Professional's International Arbitration online service **The U.S. Navy and the Rise of Great Power Competition** James J.

Wirtz, Jeffrey E. Kline, James A. Russell, 2023-12-22 This volume describes how technological and geo political trends are rapidly transforming maritime affairs A mix of original and previously published material this volume describes how the 21st century great power competition is changing the face of naval operations in general and U S Navy operations in the Western Pacific in particular The rise of an assertive China and its new anti access and area denial capabilities threaten the aircraft carrier based maritime dominance of the U S Navy Military and political trends in the Western Pacific and beyond suggest that the world is encountering a pivotal moment when existing weapons tactics and operations might be rendered obsolete by techno strategic change This volume considers these developments from three perspectives by describing 1 the techno strategic setting 2 the institutional constraints that impede the ability of the U S Navy to respond to these changes and 3 a new approach to naval force planning and strategy to cope with these developments The volume culminates in a discussion of sophisticated strategies and operational concepts that position the U S Navy and its maritime allies and partners to prevail in today's techno strategic churn This book will be of much interest to students of naval policy strategic studies Asia Pacific politics and International Relations
