Contested Social Orders And International Politics:

Contested Social Orders and International Politics David Skidmore, 1997 Political scientists historians economists and sociologists who are concerned with international relations will find this a challenging and welcome addition to the theoretical literature that will shed new light on many longstanding debates within the field **The Ideological Origins of Great Power Politics, 1789-1989** Mark L. Haas, 2018-09-05 How do leaders perceive threat levels in world politics and what effects do those perceptions have on policy choices Mark L Haas focuses on how ideology shapes perception He does not delineate the content of particular ideologies but rather the degree of difference among them Degree of ideological difference is he believes the crucial factor as leaders decide which nations threaten and which bolster their state's security and their own domestic power These threat perceptions will in turn impel leaders to make particular foreign policy choices Haas examines great power relations in five periods the 1790s in Europe the Concert of Europe 1815 1848 the 1930s in Europe Sino Soviet relations from 1949 to 1960 and the end of the Cold War In each case he finds a clear relationship between the degree of ideological differences that divided state leaders and those leaders' perceptions of threat level and so of appropriate foreign policy choices These relationships held in most cases regardless of the nature of the ideologies in question the offense defense balance and changes in the international distribution of power Revolutionary Contagion and International Politics Chad E. Nelson, 2022 A unique theory of what happens when leaders fear a revolution abroad will spread to their own country and how that affects international relations When do leaders fear that a revolution elsewhere will spread to their own politics and what are the international effects of this fear In *Revolutionary Contagion* Chad E Nelson develops and tests a theory that explains how states react to ideologically driven revolutions that have occurred in other nations To do this he analyzes four key revolutionary movements over two centuries liberalism communism fascism and Islamism He further explains that the key to understanding the response to revolutions lies in focusing on the extent to which leaders fear upheaval in their own countries According to the theory Nelson argues fear of contagion is driven more by the characteristics of the host rather than the activities of the infecting agents In other words leaders will fear revolutionary contagion when they have significant revolutionary opposition movements that have an ideological affinity with the revolutionary state A powerful theory of the profound effects revolutions have on international relations this book shows why one simply cannot make sense of international politics including patterns of alliances and wars in certain situations without considering the fear of contagion **Power, Order, and Change in World Politics** G. John Ikenberry, 2014-08-21 This volume brings together leading scholars to analyse the central issues of power order and change in world politics

International Political Economy James H. Nolt, 2014-12-17 This book offers a completely new and unique introduction to the economics of international relations It treats all the traditional major themes of international relations theory while giving each a refreshing new twist with the incorporation of the influence of private power particularly in the realm of war and

peace It reframes the history of the modern global economy and politics by thoroughly purging the myth of the market a systematic blindness to private power It not only draws on but also illuminates major themes and empirical findings of comparative politics business history business strategy business cycle theory social evolutionary theory as well as the practical wisdom of traders and investors Part one introduces the major concepts of competing theories of international relations emphasizing a unique approach corporatism Part two introduces the critical importance dynamic and oppositional analysis of issues Part three traces the rise of the modern world from the mercantilist period until the rise of modern corporate organizations and the demise of imperialism in the crucible of World War I Part four begins with the origins of the contemporary dominance of business internationalism before and during World War II then analyzes three major facets of the postwar era the unification of much of Europe the industrialization of the Third World and the Cold War and its aftermath The final chapter considers the present and future of a fairly peaceful yet economically unstable world This book presents a refreshing and exciting portrayal of the global economy which challenges every major subject from money to markets to the business cycle This book eschews the economics of dull averages to restore the drama of contending business forces struggling for wealth and in the process influencing war and peace
