Context For Discovery:

Modeling and Using Context Patrick Brézillon, Roy Turner, Carlo Penco, 2017-06-06 This book constitutes the proceedings of the 10th International and Interdisciplinary Conference on Modeling and Using Context CONTEXT 2017 held in Paris France in June 2017 The 26 full papers and 15 short papers presented were carefully reviewed and selected from 88 submissions The papers feature research in a wide range of disciplines related to issues of context and contextual knowledge and discuss commonalities across and differences between the disciplines approaches to the study of context They are organized in the following topical sections context in representation context modeling of human activities context in communication context awareness and various specific topics *Context and Semantics for Knowledge Management* Paul Warren, John Davies, Elena Simperl, 2011-09-15 Knowledge and information are among the biggest assets of enterprises and organizations However efficiently managing maintaining accessing and reusing this intangible treasure is difficult Information overload makes it difficult to focus on the information that really matters the fact that much corporate knowledge only resides in employees heads seriously hampers reuse The work described in this book is motivated by the need to increase the productivity of knowledge work Based on results from the EU funded ACTIVE project and complemented by recent related results from other researchers the application of three approaches is presented the synergy of Web 2 0 and semantic technology context based information delivery and the use of technology to support informal user processes The contributions are organized in five parts Part I comprises a general introduction and a description of the opportunities and challenges faced by organizations in exploiting Web 2 0 capabilities Part II looks at the technologies and also some methodologies developed in ACTIVE Part III describes how these technologies have been evaluated in three case studies within the project Part IV starts with a chapter describing the principal market trends for knowledge management solutions and then includes a number of chapters describing work complementary to ACTIVE Finally Part V draws conclusions and indicates further areas for research Overall this book mainly aims at researchers in academia and industry looking for a state of the art overview of the use of semantic and Web 2 0 technologies for knowledge management and personal productivity Practitioners in industry will also benefit in particular from the case studies which highlight cutting edge applications in these fields Smart Sensing and Context Gerd Kortuem, Joe Finney, Rodger Lea, Vasughi Sundramoorthy, 2007-10-05 This book constitutes the refereed proceedings of the Second European Conference on Smart Sensing and Context EuroSSC 2007 held in Kendal England October 2007 The 16 revised full papers and one invited paper were carefully reviewed and selected from over 51 submissions The papers are organized in topical sections on spatial and motion context human behavior as context context frameworks and platforms and sensing technologies and case studies *Context Management for Distributed and Dynamic Context-Aware Computing* Ricardo Couto Antunes da Rocha, Markus Endler, 2012-05-03 Research in context aware computing has produced a number of middleware systems for context management However development of

ubiquitous context aware applications is still a challenge because most current middleware systems are still focused on isolated and static context aware environments Context aware environments are inherently dynamic as a result of occasional additions or upgrade of sensors applications or context inference mechanisms Context Management for Distributed and Dynamic Context Aware Computing proposes a novel architecture for context management based on the concept of context domains allowing applications to keep context interests across distributed context management systems The authors describe a distributed middleware that implements the aforementioned concepts without compromising scalability and efficiency of context access

Context in Computing Patrick Brézillon, Avelino J. Gonzalez, 2014-12-09 This volume explores how context has been and can be used in computing to model human behaviors actions and communications as well as to manage data and knowledge It addresses context management and exploitation of context for sharing experience across domains The book serves as a user centric guide for readers wishing to develop context based applications as well as an intellectual reference on the concept of context It provides a broad yet deep treatment of context in computing and related areas that depend heavily on computing The coverage is broad because of its cross disciplinary nature but treats topics at a sufficient depth to permit a reader to implement context in his her computational endeavors The volume addresses how context can be integrated in software and systems and how it can be used in a computing environment Furthermore the use of context to represent the human dimension individually as well as collectively is explained Contributions also include descriptions of how context has been represented in formal as well as non formal structured approaches The last section describes several human behavior representation paradigms based on the concept of context as its central representational element The depth and breadth of this content is certain to provide useful as well as intellectually enriching information to readers of diverse backgrounds who have an interest in or are intrigued by using context to assist in their representation of the real world

Service Delivery Platforms Syed A. Ahson, Mohammad Ilyas, 2011-03-16 It is becoming increasingly important for telecom operators to be able to provide service delivery platforms SDP quickly and efficiently in order to improve the time to revenue of value added services Presenting a rapid architecture solution to meet this challenge Service Delivery Platforms Developing and Deploying Converged Multimedia Service

Wired/Wireless Internet Communications Thomas Braun, Georg Carle, Sonia Fahmy, Yevgeni Koucheryavy, 2006-05-19 This book constitutes the refereed proceedings of the 4th International Conference on Wired Wireless Internet Communications WWIC 2006 held in Bern Switzerland in May 2006 The book presents 29 revised full papers organized in topical sessions on wireless networks UMTS and OFDM mobile ad hoc networks power saving and sensor networks voice and video over wireless networks mobility TCP signalling charging and security

Formal and Practical Aspects of Autonomic Computing and Networking: Specification, Development, and Verification Cong-Vinh, Phan, 2011-10-31 Autonomic computing and networking ACN a concept inspired by the human autonomic system is a priority research area and a booming new paradigm in the field Formal

and Practical Aspects of Autonomic Computing and Networking Specification Development and Verification outlines the characteristics novel approaches of specification refinement programming and verification associated with ACN The goal of ACN and the topics covered in this work include making networks and computers more self organized self configured self healing self optimizing self protecting and more This book helpfully details the steps necessary towards realizing computer and network autonomy and its implications

Handbook of Research on Innovations in Systems and Software Engineering Díaz, Vicente García,Lovelle, Juan Manuel Cueva,García-Bustelo, B. Cristina Pelayo,2014-08-31 Professionals in the interdisciplinary field of computer science focus on the design operation and maintenance of computational systems and software Methodologies and tools of engineering are utilized alongside the technological advancements of computer applications to develop efficient and precise databases of information The Handbook of Research on Innovations in Systems and Software Engineering combines relevant research from all facets of computer programming to provide a comprehensive look at the challenges and changes in the field With information spanning topics such as design models cloud computing and security this handbook is an essential reference source for academicians researchers practitioners and students interested in the development and design of improved and effective technologies

Intelligent Informatics Ajith Abraham,Sabu M Thampi,2012-08-12 This book constitutes the thoroughly refereed post conference proceedings of the first International Symposium on Intelligent Informatics ISI 12 held in Chennai India during August 4 5 2012 The 54 revised papers presented were carefully reviewed and selected from 165 initial submissions The papers are organized in topical sections on data mining clustering and intelligent information systems multi agent systems pattern recognition signal and image processing and computer networks and distributed systems The book is directed to the researchers and scientists engaged in various fields of intelligent informatics

Advances in Next Generation Services and Service Architectures Anand R. Prasad,John F. Buford,Vijay K. Gurbani,2011 The book is intended to provide readers with a comprehensive reference for the most current developments in the field It offers broad coverage of important topics with eighteen chapters covering both technology and applications written by international experts

Advanced Health Telematics and Telemedicine Bernd Blobel,Peter Pharow,2003 In this publication leading experts present all the different aspects to be met for practically enabling advanced health telematics and telemedicine such as architectural issues electronic health records communication security and safety as well as the legal and ethical implications The international collaboration work s outcome ongoing efforts and future directions are discussed in deep and broad detail Represented by health professionals computer scientists managers lawyers and politicians the book addresses developers users and decision makers as well

Advances in Cryptology - EUROCRYPT 2023 Carmit Hazay,Martijn Stam,2023-04-14 This five volume set LNCS 14004 14008 constitutes the refereed proceedings of the 42nd Annual International Conference on Theory and Applications of Cryptographic Techniques Eurocrypt 2023 which was held in Lyon France in April 2023 The total of 109 full papers

presented were carefully selected from 415 submissions They are organized in topical sections as follows Theoretical Foundations Public Key Primitives with Advanced Functionalities Classic Public Key Cryptography Secure and Efficient Implementation Cryptographic Engineering and Real World Cryptography Symmetric Cryptology and finally Multi Party Computation and Zero Knowledge Mobile Data Management Kian-Lee Tan, Michael J. Franklin, John C.-S. Lui, 2003-06-29 Welcome to the Second International Conference on Mobile Data Management MDM2001 The conference serves as a forum for the exchange of technical ideas and research results in the areas of mobility and database management This year we have a very exciting program for MDM2001 Many quality papers were submitted to the conference All of the submitted papers were viewed by at least three PC members Due to the limitations of the program schedule as well as the desire to organize the conference using a single track format we selected only 18 papers for full presentation at the conference As a result many excellent papers could not be accepted The papers chosen for presentation span a large range of topics from network protocol issues up to the semantics of mobile applications The common theme of all these papers is their recognition of the central role played by data management techniques in the development of the emerging world of mobile and wireless applications We have loosely organized these papers into six areas 1 DATA MANAGEMENT ARCHITECTURES 2 CONTENT DELIVERY 3 DATA BROADCASTING 4 CACHING AND HOARDING 5 COPING WITH MOVEMENT 6 NETWORKS AND SYSTEMS ISSUES In addition to the research track we have sought to broaden the scope of the conference with an industrial session as well as poster presentations Overall the program strikes a comfortable balance between applied and theoretically oriented papers **Hybrid Artificial Intelligence Systems** Marios Polycarpou, André C.P.L.F. de Carvalho, Jeng-Shyang Pan, Michał Woźniak, Héctor Quintián, Emilio Corchado, 2014-05-21 This volume constitutes the proceedings of the 9th International Conference on Hybrid Artificial Intelligent Systems HAIS 2014 held in Salamanca Spain in June 2014 The 61 papers published in this volume were carefully reviewed and selected from 199 submissions They are organized in topical sessions on HAIS applications data mining and knowledge discovery video and image analysis bio inspired models and evolutionary computation learning algorithms hybrid intelligent systems for data mining and applications and classification and cluster analysis *Cooperative Design, Visualization, and Engineering* Yuhua Luo, 2007-09-04 This book constitutes the refereed proceedings of the 4th International Conference on Cooperative Design Visualization and Engineering CDVE 2007 held in Shanghai China in September 2007 The papers presented were carefully reviewed from numerous submissions The papers cover all current issues in cooperative design visualization and engineering ranging from theoretical and methodological topics to various systems and frameworks to applications in a variety of fields **The Handbook of Mobile Middleware** Paolo Bellavista, Antonio Corradi, 2016-04-19 Device miniaturization wireless computing and mobile communication are driving ubiquitous pervasive and transparent computing Supporting these rapidly evolving technologies requires middleware solutions that address connectivity level location dependent and context dependent issues The
